In spite of all the assistance offered by electronic control systems, the latest generation of passenger car chassis still relies on conventional chassis elements. With a view towards driving dynamics, this book examines these conventional elements and their interaction with mechatronic systems. First, it describes the fundamentals and design of the chassis and goes on to examine driving dynamics with a particularly practical focus. This is followed by a detailed description and explanation of the modern components. A separate section is devoted to the axles and processes for axle development. With its revised illustrations and several updates in the text and list of references, this new edition already includes a number of improvements over the first edition.

"This collection of essays marking the twenty-fifth anniversary of the publication of Michael Omi and Howard Winant's *Racial Formation in the United States* demonstrates the importance and influence of the concept of racial formation. The range of disciplines, discourses, ideas, and ideologies makes for fascinating reading, demonstrating the utility and applicability of racial formation theory to diverse contexts, while at the same time presenting persuasively original extensions and elaborations of it. This is an important book, one that sums up, analyzes, and builds on some of the most important work in racial studies during the past three decades."—George Lipsitz, author of *How Racism Takes Place* "*Racial Formation in the Twenty-First Century* is truly a state-of-the-field anthology, fully worthy of the classic volume it honors—timely, committed, sophisticated, accessible, engaging. The collection will be a boon to anyone wishing to

understand the workings of race in the contemporary United States.” —Matthew Frye Jacobson, Professor of American Studies, Yale University “This stimulating and lively collection demonstrates the wide-ranging influence and generative power of Omi and Winant’s racial formation framework. The contributors are leading scholars in fields ranging from the humanities and social sciences to legal and policy studies. They extend the framework into new terrain, including non-U.S. settings, gender and sexual relations, and the contemporary warfare state. While acknowledging the pathbreaking nature of Omi and Winant’s intervention, the contributors do not hesitate to critique what they see as limitations and omissions. This is a must-read for anyone striving to make sense of tensions and contradictions in racial politics in the U.S. and transnationally.”—Evelyn Nakano Glenn, editor of *Shades of Difference: Why Skin Color Matters*

A faithful reproduction of the 1967 Floyd Clymer publication of the official factory BMW (Bayerische Motoren Werke) Workshop Manual for the R50, R50S, R60 and R69S twin cylinder motorcycles. It also includes the supplement issued by the factory for the USA versions R50US, R60US and R69US. --- There are exhaustive tables of technical data, tolerances and fits and all of the expected data from a factory publication for the repair and overhaul of all major and minor mechanical and electrical components,

making it an invaluable resource for collectors and restorers of these classic BMW motorcycles. --- There are 257 illustrations and each procedure is explained in a step-by-step method using an appropriate illustration. The translation from German to English is, at times, a little quirky but the profuse illustrations make up for any difficulty in understanding what needs to be done! --- True to the original, this reproduction is published in four languages, English, German, French and Spanish making this a universal publication and required reading for any owner. Out-of-print and unavailable for many years, this book is highly sought after on the secondary market and we are pleased to be able to offer this reproduction as a service to all BMW enthusiasts worldwide.

This book explores the various personal and social narratives within the songs of Brassens and Brel, the auteurs-compositeurs-interpretes who epitomised what is now widely regarded as the golden era of chanson française during the 1950s and 60s. Tinker's discussion reveals the tensions in the narrators' relationship with themselves, other individuals, and society. The book builds upon, and moves beyond, the two dominant critical approaches used to write about French song: the exclusively biographical oriented approach and the purely linguistic analysis. Tinker focuses both on identity, viewed primarily as a relational process, and on representation: linguistic, musical, vocal, and gestural.

## Seeing Beyond

Antistatic sprays from several different manufacturers are examined. The sprays are examined for contamination potential (i.e., outgassing and nonvolatile residue), corrosiveness on an aluminum mirror surface, and electrostatic effectiveness. In addition, the chemical composition of the antistatic sprays is determined by infrared spectrophotometry, mass spectrometry, and ultraviolet spectrophotometry. The results show that 12 of the 17 antistatic sprays examined have a low contamination potential. Of these sprays, 7 are also noncorrosive to an aluminum surface. And of these, only 2 demonstrate good electrostatic properties with respect to reducing voltage accumulation; these sprays did not show a fast voltage dissipation rate however. The results indicate that antistatic sprays can be used on a limited basis where contamination potential, corrosiveness, and electrostatic effectiveness is not critical. Each application is different and proper evaluation of the situation is necessary. Information on some of the properties of some antistatic sprays is presented in this document to aid in the evaluation process. Ming, James E. Goddard Space Flight Center
