### **A Model Crime**

"If I had asked people what they wanted, they would have said faster horses."  
--Henry Ford As one part of your brain processes these words, another part of your brain is urging you to put the book down and focus on something more pressing. Get back to work on the budget due tomorrow. Answer e-mails growing stale in your inbox. Get off your rear and update that résumé. We're all guilty of it, especially in the business world. From Fortune 500 CEOs to assistants, we work to solve the most urgent problems first. That's because evolution has hardwired our brains to focus only on the immediate future, a survival technique that worked extremely well when predators were lurking at every turn. But that was then, this is now. In the modern world, where life expectancies are long and physical perils rare (at least for people who buy books), it's not only possible to build a strong tomorrow without sacrificing today, but to actually increase the number of here-

and-now victories by pursuing distant wins. That's where Long Fuse, Big Bang comes in--to help you work with that instinct to create and foster ideas that will lead to explosive professional results. Through proven case studies and personal experience, Dr. Eric Haseltine shows you how to neutralize the quick-fix way of thinking and actually use that desire to improve your chances of an enduring success. Rather than fight our most basic thought processes, this book will teach you how to work with your brain to light the long fuse, keep it smoldering, and ignite that "Big Bang" that will make history.

Eighty-five mouth-watering recipes show how to use the characteristic heat of chile peppers in beverages, sauces, appetizers, salads, soups, entrees, and desserts. This gorgeously illustrated, must-have reference for pepper-obsessed gardeners and

cooks.

## **The Justification Reader**

In the first half of the twentieth century, modernist works appeared not only in obscure little magazines and books published by tiny exclusive presses but also in literary reprint magazines of the 1920s, tawdry pulp magazines of the 1930s, and lurid paperbacks of the 1940s. In his nuanced exploration of the publishing and marketing of modernist works, David M. Earle questions how and why modernist literature came to be viewed as the exclusive purview of a cultural elite given its availability in such popular forums. As he examines sensational and popular manifestations of modernism, as well as their reception by critics and readers, Earle provides a methodology for reconciling formerly separate or contradictory materialist, cultural, visual, and modernist approaches to avant-garde literature. Central to Earle's innovative approach is his consideration of the physical aspects of the books and magazines - covers, dust wrappers, illustrations, cost - which become texts in their own right. Richly illustrated and accessibly written, Earle's study shows that modernism emerged in a publishing ecosystem that was both richer and more complex than has been previously documented.

The JF/J2F "Duck" was one of those military workhorses moving around in the background before and during WWII which did a tremendous job but never got the publicity of its' more glamorous teammates. Some said the Duck could be more aptly named the "Ugly Duckling." Be that as it may; when no other bomber could be found, it carried bombs; when no other transport could be found, it transported; when no other photo plane could be found, it photographed and when no other rescuer could be found, it rescued. When it came to "Utility Craft," the JF/J2F was the definitive.

## **The Book of Basic Machines**

All four of the bombers involved in 7/7, the deadly attack on London's transport system in July 2005, were aged 30 or under. The spectre of extremist Islam looms large and Muslim youth in the UK are increasingly linked to radical Islamic movements. A clear, balanced examination of this complex issue is long overdue. Philip Lewis sets out to address this by looking at the lives and beliefs of young Muslims aged 18 to 30, against a backdrop of the problems any migrant community face. Beginning with an overview of British Muslim communities, he goes on to explore the nature of the intergenerational gap in the Muslim community, showing how normal tensions are exaggerated as children are educated in a language and culture different to that of their parents. Patriarchal 'clan politics' and a breakdown in communication between young Muslims and traditional Muslim leaders are dispossessing Islamic youth, leading a small but significant minority to turn to radical groups for somewhere to belong and something to believe in. Lewis concludes by identifying a generational shift from 'clan politics' to what he calls a 'new professionalism' and demonstrates how new organizations and networks of Muslim thinkers are springing up all the time - allowing young Muslims to find positive identities and outlets for their concerns and energies.

The suburban lawn sprouts a crop of contradictory myths. To some, it's a green oasis; to others, it's eco-purgatory. Science writer Hannah Holmes spent a year appraising the lawn through the eyes of the squirrels, crows, worms, and spiders who think of her backyard as their own. *Suburban Safari* is a fascinating and often hilarious record of her discoveries: that many animals adore the suburban environment, including bears and cougars venturing in from the woods; how plants, in their struggle for dominance, communicate with their own kind and battle other species; and that ways already exist for us to grow healthier, livelier lawns.

### **Craving Him**

At one time in his life, author David K. Hudson was a college student who made the Deans List twice. But one January night, he made an errant decision that sent him to prison for life. In this inspirational memoir, Hudson takes youths on a journey to the other side of crime and the criminal justice system a story which often goes

untold in the grandeur of rap music. His story travels through the daily life of incarceration, visitation, and the true rewards of street hustling. He shows what prison life is really about and the heartaches and the sufferings that result when one chooses to sell drugs, to commit crimes, to sell their body, or to take any of the other shortcuts street life offers in the pursuit of fast riches. In *Gangsta Rap for the Youth*, Hudson discusses the power of choice and the ability to reject crime. He makes a strong argument for regaining personal power and accepting the responsibility to be a productive member of society. This guide to self-empowerment communicates that youth have the ability to take control of their future and make the right choices in life.

Gene Wolfe takes us to a future North America at once familiar and utterly strange. A young man and woman, Skip and Chelle, fall in love in college and marry, but she is enlisted in the military, there is a war on, and she must serve her tour of duty before they can settle down. But the military is fighting a war with aliens in distant solar systems, and her months in the service will be years in relative time on Earth. Chelle returns to recuperate from severe injuries, after months of service, still a young woman but not necessarily the same person—while Skip is in his forties and a wealthy businessman, but eager for her return. Still in love (somewhat to his surprise and delight), they go on a Caribbean cruise to resume their marriage. Their vacation rapidly becomes a complex series of challenges, not the least of which are spies, aliens, and battles with pirates who capture the ship for ransom. There is no writer in SF like Gene Wolfe and no SF novel like *Home Fires*. At the Publisher's request, this title is being sold without Digital Rights Management Software (DRM) applied.
