Reading Comprehension, Grades 7 - 8

Frank Pearl is chasing a prize in this Judy Moody® story for newly independent readers. Just once, Frank Pearl would like to win at something! He is going to win a prize if it's the last thing he does. Could an amazing yo-yo trick or Cookie the parrot land him a prize? Could a blue ribbon be his at the Great Third-Grade Breakfast Bash? With three shots at a prize and Judy Moody cheering him on (sort of?), there's no way that Frank can miss out on a trophy this time.

The Math Curriculum for Gifted Students series

provides gifted and advanced learners with challenging activities to extend their mathematical thinking. Developed by the Center for Gifted Education at William & Mary, the lessons, activities, and extensions in each book are aligned to national standards and are designed to provide high-ability learners advancement beyond the general curriculum. In *Math Curriculum for Gifted Students (Grade 5)*, the 20 lessons cover mathematics content for grade 5 and are divided into five sections: number and operations in Base Ten, operations and algebraic thinking, number and operations, fractions, measurement and data, and geometry. Each lesson includes a teacher page that outlines the Common Core State Standards and mathematical practices covered, estimated time, key terms, materials, and objectives; a challenging activity to allow students to explore the concepts in depth; practice problems; and an assessment similar to CCSS-based grade-level standardized assessments. Ideal for gifted classrooms or gifted pull-out groups, lessons are easy to implement and feature engaging above-level student activities. Optional student workbooks, which feature ample room for student responses, are also available in sets of 5.
