"The text is suitable for a typical introductory algebra course, and was developed to be used flexibly. While the breadth of topics may go beyond what an instructor would cover, the modular approach and the richness of content ensures that the book meets the needs of a variety of programs."--Page 1.

Plotting Pictures

Here's a super-fun, kid-pleasing way to introduce and reinforce graphing! Your students will love creating graph art pictures like Wiggle Worm, Mystery Letter, and What's Hatching? as they practice making simple bar and line graphs, and build skills in addition and subtraction. Fully reproducible! For use with Grades 1-2.

College Algebra: Real Mathematics, Real People

Saxon Math Course 3

In this unique collection of math activities, students solve computational questions, equations, word problems, and puzzles to find coordinates -- then connect the coordinates to create a cartoon image! Extensions for some activities require students to add to or change the pictures and record new coordinates.

independently. **ANSWERS:** Answers to exercises are tabulated at the back of the book. This helps students develop confidence and ensures that students practice correct techniques, rather than practice making mistakes. **PHOTOCOPIES:** The copyright notice permits parents/teachers who purchase one copy or borrow one copy from a library to make photocopies for their own children/students only. This is very convenient if you have multiple children/students or if a child/student needs additional practice. **AUTHOR:** Chris McMullen earned his Ph.D. in physics from Oklahoma State University and currently teaches physics at Northwestern State University of Louisiana. He developed the Improve Your Math Fluency series of workbooks to help students become more fluent in basic math skills.

Take just one minute a day to quickly assess student progress in basic math skills. This book features 100 quick reproducible drill sheets to help students increase speed in math operations and strengthen problem-solving skills. The 10 problems on each sheet can be done in one or two minutes and are a great warm-up to the daily math lesson. The quick, one-minute format combined with instant feedback makes this a challenging and motivational assignment students will look forward to each day. Students become active learners as they discover mathematical relationships and apply acquired understanding to complex situations and to the solution of realistic problems in each minute. An answer key is included. Note that this book is produced in the United States and may contain some US-based standards.
