Browse our catalog or contact your representative for a full listing of updated titles and packages, or to request a custom ISBN. When students routinely use their handbook in the course, they see its value, find that it's a faster way to get answers than search engines like Google, learn to rely on it as a reference, and are more likely to achieve the goals of the course. And when that handbook is Rules for Writers, you can be sure the advice they find is practical and reliable—with help for composing and revising, writing arguments, analyzing texts, using grammar and punctuation correctly, and working with sources. In revising the eighth edition, Nancy Sommers has woven a new emphasis on reading critically throughout the first section of the handbook, introduced advice for analyzing multimodal texts, and added help for public speaking. New practical Writing Guides support students working through college assignments in a variety of genres. And new peer review advice helps students effectively comment on drafts and apply feedback to revisions of their own work. All of these improvements help student writers—but they also save you time and effort. You can draw from Rules for Writers for planning class discussions, conducting in-class workshops, and providing feedback on student work that they can easily apply. And new advice and examples help students engage in the research process, find entry points in debates, and develop their authority as researchers. The many examples, according to one college librarian, "are realistic and relevant." Research and Documentation in the Digital Age is the perfect companion to any college textbook.

Unlike the instructor's editions that accompany other handbooks, this one can be held in your hand. This hardcover annotated edition extends the handbook lengthwise, so that it is a convenient size to bring to class. Information for instructors is placed at the bottom of the appropriate page, leaving the text page itself clean and uncluttered. This material is clearly distinguished from the student edition by a rule and by a colored screen. The annotations include the following information: answers to all of the lettered and numbered exercises in a convenient place for classroom use; Scholars on writing-annotated bibliographic references to pertinent scholarly and professional articles and books; and Writers on Writing-quotations from well-known writers on the composing process. In addition, the annotations include cross-references to the handbook's ancillaries, so that instructors can quickly see what additional resources are available in the ancillary package.--page IAE-2

Because composition students will major in a wide variety of disciplines, Fields of Reading draws on the major divisions of the curriculum -- arts and humanities, social sciences and public affairs, and sciences and technologies -- to present well-crafted and high-quality writing from these fields. Chosen by five editors who are all distinguished teachers and writers, the selections are organized in each division by writing purpose (reflecting, reporting, explaining, and arguing) in order to show

how writing must be suited to a particular situation in order to be effective. Students are thus exposed to important readings by key voices in contemporary intellectual life -- the kind of thought-provoking pieces one expects to encounter in college. The unique dual organization by academic discipline and rhetorical purpose helps students to understand how subject, intent, and audience influence the form and style of their own writing.

It's Complicated

"At long last, a discussion of plagiarism that doesn't stop at 'Don't do it or else,' but does full justice to the intellectual interest of the topic!" ---Gerald Graff, author of *Clueless in Academe* and 2008 President, Modern Language Association This collection is a timely intervention in national debates about what constitutes original or plagiarized writing in the digital age. Somewhat ironically, the Internet makes it both easier to copy and easier to detect copying. The essays in this volume explore the complex issues of originality, imitation, and plagiarism, particularly as they concern students, scholars, professional writers, and readers, while also addressing a range of related issues, including copyright conventions and the ownership of original work, the appropriate dissemination of innovative ideas, and the authority and role of the writer/author. Throughout these essays, the contributors grapple with their desire to encourage and maintain free access to copyrighted material for noncommercial purposes while also respecting the reasonable desires of authors to maintain control over their own work. Both novice and experienced teachers of writing will learn from the contributors' practical suggestions about how to fashion unique assignments, teach about proper attribution, and increase students' involvement in their own writing. This is an anthology for anyone interested in how scholars and students can navigate the sea of intellectual information that characterizes the digital/information age. "Eisner and Vicinus have put together an impressive cast of contributors who cut through the war on plagiarism to examine key specificities that often get blurred by the rhetoric of slogans. It will be required reading not only for those concerned with plagiarism, but for the many more who think about what it means to be an author, a student, a scientist, or anyone who negotiates and renegotiates the meaning of originality and imitation in collaborative and information-intensive settings." ---Mario Biagioli, Professor of the History of Science, Harvard University, and coeditor of *Scientific Authorship: Credit and Intellectual Property in Science* "This is an important collection that addresses issues of great significance to teachers, to students, and to scholars across several disciplines. . . . These essays tackle their topics head-on in ways that are both accessible and provocative." ---Andrea Lunsford, Louise Hewlett Nixon Professor of English, Claude and Louise Rosenberg Jr. Fellow, and Director of the Program in Writing and Rhetoric at Stanford University and coauthor of *Singular Texts/Plural Authors: Perspectives on Collaborative Writing* digitalculturebooks is an imprint of the University of Michigan Press and the Scholarly Publishing Office of the University of Michigan Library dedicated to publishing innovative and accessible work exploring new media and their impact on society, culture, and scholarly communication.
