Cracking the AP World History Exam

International trade has shaped the modern world, yet until now no single book has been available for both economists and general readers that traces the history of the international economy from its earliest beginnings to the present day. *Power and Plenty* fills this gap, providing the first full account of world trade and development over the course of the last millennium. Ronald Findlay and Kevin O'Rourke examine the successive waves of globalization and "deglobalization" that have occurred during the past thousand years, looking closely at the technological and political causes behind these long-term trends. They show how the expansion and contraction of the world economy has been directly tied to the two-way interplay of trade and geopolitics, and how war and peace have been critical determinants of international trade over the very long run. The story they tell is sweeping in scope, one that links the emergence of the Western economies with economic and political developments throughout Eurasia centuries ago. Drawing extensively upon empirical evidence and informing their systematic analysis with insights from contemporary economic theory, Findlay and O'Rourke demonstrate

the close interrelationships of trade and warfare, the mutual interdependence of the world's different regions, and the crucial role these factors have played in explaining modern economic growth. *Power and Plenty* is a must-read for anyone seeking to understand the origins of today's international economy, the forces that continue to shape it, and the economic and political challenges confronting policymakers in the twenty-first century.

Taureans, ever wondered what the Sun-signs tell you about love and life? This unique anthology of poems for love and life relates directly to your Sun-sign, Taurus. If you were born between the 21st of April and the 21st of May, you will relate to many of the themes identified with your sign's characteristics and personality traits. The poems in this collection have been chosen because they reflect a Taurean attitude to life. They appeal to the interests 'ruled' by your sign; the animals, flowers, trees, plants and places celebrated by the poets and associated with the sign of Taurus over three thousand years of traditional astrology. Some have been chosen simply because we believe you will enjoy them, and that they will awaken or re-awaken your love of poetry.

AP World History: Modern

A sparkling new translation of one of the greatest travel books ever written: Marco

Polo's seminal account of his journeys in the east, in a collectible clothbound edition. Marco Polo was the most famous traveller of his time. His voyages began in 1271 with a visit to China, after which he served the Kublai Khan on numerous diplomatic missions. On his return to the West he was made a prisoner of war and met Rustichello of Pisa, with whom he collaborated on this book. His account of his travels offers a fascinating glimpse of what he encountered abroad: unfamiliar religions, customs and societies; the spices and silks of the East; the precious gems, exotic vegetation and wild beasts of faraway lands. Evoking a remote and long-vanished world with colour and immediacy, Marco's book revolutionized western ideas about the then unknown East and is still one of the greatest travel accounts of all time. For this edition - the first completely new English translation of the Travels in over fifty years - Nigel Cliff has gone back to the original manuscript sources to produce a fresh, authoritative new version. The volume also contains invaluable editorial materials, including an introduction describing the world as it stood on the eve of Polo's departure, and examining the fantastical notions the West had developed of the East. Marco Polo was born in 1254, joining his father on a journey to China in 1271. He spent the next twenty years travelling in the service of Kublai Khan. There is evidence that Marco travelled extensively in the Mongol Empire and it is fairly certain he visited India. He wrote his famous Travels whilst a prisoner in Genoa. Nigel Cliff was previously a theatre and film critic for The Times and a regular writer for The Economist, among other publications, and now writes historical nonfiction books. His first book, The Shakespeare Riots, was published in 2007 and shortlisted for the Washington-based National Award for Arts Writing. His second book, The Last Crusade: Vasco da Gama and the Birth of the Modern World appeared in 2011 and was shortlisted for the PEN Hessel-Tiltman Prize.

Andrew Ure (1778-1857) was a professor at the University of Glasgow and an enthusiast for the Industrial Revolution's new systems of manufacturing. As we know, a consequence of these new developments was the redundancy of many workers, just as we are experiencing today with 'downsizing' and 'reengineering'. This study details the creation of the general education system as an answer to the need for less self-willed and intractable workmen, which were unfit to become "components of a mechanical system". In our times of permanent technological revolution, this is an excellent insight into the roots of industrial progress. Understanding rural workers' shock and their need to readapt to a new urban, factorial reality, and the white collar workers' dilemma of social security or entrepreneurship is achieved by this fascinating and important book.

The Earth and Its Peoples

Debating the Origins of the Cold War examines the coming of the Cold War through Americans' and Russians' contrasting perspectives and actions. In two engaging essays, the authors demonstrate that a huge gap existed between the democratic, capitalist, and global vision of the post-World War II peace that most Americans believed in and the dictatorial, xenophobic, and regional approach that characterized Soviet policies. The authors argue that repeated failures to find mutually acceptable solutions to concrete problems led to the rapid development of the Cold War, and they conclude that, given the respective concerns and perspectives of the time, both superpowers were largely justified in their courses of action. Supplemented by primary sources, including documents detailing Soviet espionage in the United States during the 1930s and 1940s and correspondence between Premier Josef Stalin and Foreign Minister V. M. Molotov during postwar meetings, this is the first book to give equal attention to the U.S. and Soviet policies and perspectives.

"On the basis of a superficial inspection, Traditions & Encounters might look similar to several other textbooks that survey the world's past. Like other books, for example, Traditions & Encounters examines the historical development of societies in Asia, Europe, Africa, the Americas, and Oceania. Yet Traditions & Encounters differs from other works in two particularly important ways. First, it relies on a pair of prominent themes to bring a global perspective to the study of world history: it traces the historical development of individual societies in all world regions, and it also focuses attention systematically on interactions between peoples of different societies. Second, it organizes the human past into seven eras that represent distinct and coherent periods of global historical development"--Preface (Page xvi).
