Whenever we say 'friendship,' some people come to mind. This is also a story of a group of three friends who must have come into each other's mind while saying the word. What is the reality of Raj? What is really going on between Shazia and Alex? What is Zakir's cowardly mission? Start from the beginning and find out all the answers in this fictitious tale, which is like an emotional roller coaster. The author hopes that the ending will leave you with a smile on your face and maybe, if his crush reads this book, she might be impressed.

The Bergen County Academies is one of the best high schools in the world, and every resident of Bergen County has a chance of becoming a BCA student. I wrote this book to help you do just that. The Get Ready Guide contains 12 chapters that cover all the math and essay topics and tricks you will need to know for the test. Emphasis throughout the book and in chapter 11 is given to solving problems without using a calculator because the use of calculators is not allowed on the Bergen Academies admission test. This new third edition of The Get Ready Guide for the 2014 BCA test has: 1.A completely new essay section that covers the structure of the essay, important writing techniques, and important writing tricks. The essay section covers organization, clarity, word choice, transitions, grammar, and language. Also in this new section are sample essays with detailed commentary and step by step examples on each paragraph. 2.A BCA level practice sheet that is answered in details. 3.A full length BCA math test that is identical in level and format to the actual BCA practice tests. All this is in addition to the 2000 practice questions from the past edition. Be sure to email us after buying the book for free videos, extra practice, and complimentary essay revision. Data Interpretation: Practice Book for the CAT and Other MBA Entrance Examinations aims to help students to sharpen their skills in data interpretation. The crisp, concise and comprehensive presentation of the content ensures easy understanding. The students get to solve different types of questions that usually appear in CAT as well as other management entrance examinations like MAT, GMAT, CMAT, SNAP, NMAT, etc.

Introduction to Database Management Systems

501 Synonyms and Antonym Questions is designed to help students prepare for the verbal sections of most assessment and entrance exams. The book increases a student's vocabulary and refines their knowledge of words, bringing about higher standardized test scores and more effective verbal and written communication. Questions in this book prepare students for the synonym and antonym problems found on most standardized tests-including high school entrance exams, the SAT, civil

service exams, and the GRE. The book increases in difficulty as students move through each exercise. All answers are explained, featuring short definitions and terms that clarify word meanings and their opposites for effective studying and positive reinforcement.

Data Interpretation: Practice Book for the CAT and Other MBA Entrance Examinations

This book is about algebra. This is a very old science and its gems have lost their charm for us through everyday use. We have tried in this book to refresh them for you. The main part of the book is made up of problems. The best way to deal with them is: Solve the problem by yourself - compare your solution with the solution in the book (if it exists) - go to the next problem. However, if you have difficulties solving a problem (and some of them are quite difficult), you may read the hint or start to read the solution. If there is no solution in the book for some problem, you may skip it (it is not heavily used in the sequel) and return to it later. The book is divided into sections devoted to different topics. Some of them are very short, others are rather long. Of course, you know arithmetic pretty well. However, we shall go through it once more, starting with easy things. 2 Exchange of terms in addition Let's add 3 and 5: $3+5=8$. And now change the order: $5+3=8$. We get the same result. Adding three apples to five apples is the same as adding five apples to three - apples do not disappear and we get eight of them in both cases. 3 Exchange of terms in multiplication Multiplication has a similar property. But let us first agree on notation.
