Anthropology and Art Practice takes an innovative look at new experimental work informed by the newly-reconfigured relationship between the arts and anthropology. This practice-based and visual work can be characterised as 'art-ethnography'. In engaging with the concerns of both fields, this cutting-edge study tackles current issues such as the role of the artist in collaborative work, and the political uses of documentary. The book focuses on key works from artists and anthropologists that engage with 'art-ethnography' and investigates the processes and strategies behind their creation and exhibition. The book highlights the work of a new generation of practitioners in this hybrid field, such as Anthony Luvera, Kathryn Ramey, Brad Butler and Karen Mizra, Kate Hennessy and Jennifer Deger, who work in a diverse range of media - including film, photography, sound and performance. *Anthropology and Art Practice* suggests a series of radical challenges to assumptions made on both sides of the art/anthropology divide and is intended to inspire further dialogue and provide essential reading for a wide range of students and practitioners.

Poetry. African American Studies. Caribbean Studies. "Typeset in Brathwaite's trademark Sycorax video-print style, TRENCH TOWN ROCK is a harrowing account of violence in modern-day Jamaica. TRENCH TOWN ROCK, Kamau Brathwaite's long documentarian song, affords insistent 'nansic spin—a splay of clips, massed facts and faces, rare synaesthetic call and cry rolled into brash typographic restraint."—Nathaniel Mackey

The Bump Class

This title provides a theoretically and methodologically new and distinct approach to gender through the frameworks of biopolitics and genealogy, theorising it as a historically specific apparatus of biopower. Through the use of a diverse mix of historical and contemporary documents, the book explores how the problematisation of intersex infant genitalia in 1950s psychiatry propelled the emergence of the gender apparatus in order to socialise sexed individuals into the ideal productive and reproductive subjects of White, middle-class postwar America.

The Complete Book of Breastfeeding is a recognized classic in its field. Now it's been completely revised and updated in a new fourth edition—non-doctrinaire, informative, and friendly, it is the most accessible and authoritative book, as much required reading for expecting and new mothers as a pregnancy guide and baby name book. All healthy mothers should consider breastfeeding for the first year of a baby's life, according to the American Academy of Pediatrics, and this is the book that will help women give their babies the healthiest start possible. Written by Sally Wendkos Olds and a new co-author, Laura Marks, M.D., *The Complete Book of Breastfeeding, Fourth Edition* offers a comprehensive introduction to breastfeeding—how to get ready before the baby arrives; how to involve fathers and siblings; and the best diet and foods for mom. There are sections on dealing with problems at the hospital; extensive information on exclusive pumping (EPing); the best systems for giving supplementary bottles to a breastfed baby; the safest sleep scenarios for babies; breastfeeding in public, including laws affecting breastfeeding mothers. New data about preterm infants is presented, and special situations—multiples, breast cancer, overweight and large-breasted women, breast surgery, tattoos and piercings—are also discussed in detail. An expanded chapter on weaning features sections on breastfeeding past infancy. Also new is an appendix of online resources.

Travel's gender politics is analyzed in the works of J.-J. Rousseau, Mary Wollstonecraft, Stéphanie-Félicité de Genlis, Germaine de Staël, Frances Burney, Flora Tristan, Suzanne Voilquin, Gustave Flaubert George Sand, Robyn Davidson, and Sara Wheeler.

Cases in Medical Microbiology and Infectious Diseases challenges students to develop a working knowledge of the variety of microorganisms that cause infections in humans. This valuable, interactive text will help them better understand the clinical importance of the basic science concepts presented in medical microbiology or infectious disease courses. The cases are presented as "unknowns" and represent actual case presentations of patients the authors have encountered. Each case is accompanied by several questions to test knowledge in four broad areas including the organism's characteristics and laboratory diagnosis; pathogenesis and clinical characteristics of the infection; epidemiology; and prevention and, in some cases, drug resistance and treatment. This new fourth edition includes: an entirely new section, "Advanced Cases," which includes newly recognized disease agents as well as highly complex cases where the interaction of the immune system and human pathogens can be more closely examined a revised "Primer on the Laboratory Diagnosis of Infectious Diseases" section that reflects the increasing importance of molecular-based assays Forty-two new cases that explore the myriad advances in the study of infectious disease in the past decade Thirty-two updated cases that reflect the current state of the art as it relates to the organism causing the infection This textbook also include specific tools to assist students in solving the cases, including a table of normal values, glossary of medical terms, and figures illustrating microscopic organism morphology, laboratory tests, and clinical symptoms. Cases in Medical Microbiology and Infectious Diseases is a proven resource for preparing for Part I of the National Board of Medical Examiners Exam and an excellent reference for infectious disease rotations.

Top economist Gary Shilling shows you how to prosper in the slow-growing and deflationary times that lie ahead While many investors fear a rapid rise in inflation, author Gary Shilling, an award-winning economic forecaster, argues that the global economy is going through a long period of de-leveraging and weak growth, which makes deflation far more likely and a far greater threat to investors than inflation. Shilling explains in clear language and compelling logic why the world economy will struggle for several more years and what investors can do to protect and grow their wealth in the difficult times ahead. The investment strategies that worked for last 25 years will not work in the next 10 years. Shilling advises readers to avoid broad exposure to stocks, real estate, and commodities and to focus on high-quality bonds, high-dividend stocks, and consumer staple and food stocks. Written

by one of today's best forecasters of economic trends-twice voted by Institutional Investor as Wall Street's top economist Clearly explains what to invest in, what to avoid, and how to cope with a deflationary, slow-growth economy Demonstrates how Shilling has been consistently right about major economic trends since he began forecasting in the early 1980s Filled with in-depth insights and practical advice, this timely guide lays out a convincing case for why investors need to be prepared for a long period of weak growth and deflation-not inflation-and what you can do to prosper in the difficult times ahead.

As the prospect of heading to space becomes more real, thirty-seven-year-old Solvig is forced to define who she really is. Will she come clean to James, her partner, about her plans?
