Cessna 172: A Pocket History

Based upon several years of extensive research performed at U.S. government laboratories, this reference offers a wide range of techniques involving flaw detection, the testing of properties and the integrity of materials in a way which does not impart damage or impair the usefulness of the material. Covers visual, penetration, sonic, ultrasonic, magnetic, electromagnetic, penetrant and enhanced visual inspections as well as combined applications of these methods. Provides guidelines to select appropriate testing techniques and equipment.

Asian Defence Journal

King Air 100, A100, B100

This text contains information on human factors and pilot performance - covering stimulus, stress and sleep, personality and behavior, and working in the modern cockpit - as well as looking at safety, first aid and survival

ICAO Bulletin

Super King Air 200, B220

Speednews

WALNECK'S CLASSIC CYCLE TRADER, JUNE 2007

Monthly Catalog of United States Government Publications

A Collection of Technical Papers

This textbook presents a broad examination of law and economics, including the questions of economic justice raised by the application of economics to law. It explores both conventional analysis and examines how that analysis may be affected by behavioral findings. A primary focus is on how economic analysis holds up in markets that are often defined by rights, perceived duties, and obligations. Chapters include the tools of analysis, behavioral economics, the Coase Theorem, contract law, tort law, criminal law, government regulation, antitrust, and intellectual property.
