science, history, finance, mythology, the arts, medicine, and more, as told by the Periodic Table. Why did Gandhi hate iodine (I, 53)? How did radium (Ra, 88) nearly ruin Marie Curie's reputation? And why is gallium (Ga, 31) the go-to element for laboratory pranksters?\* The Periodic Table is a crowning scientific achievement, but it's also a treasure trove of adventure, betrayal, and obsession. These fascinating tales follow every element on the table as they play out their parts in human history, and in the lives of the (frequently) mad scientists who discovered them. THE DISAPPEARING SPOON masterfully fuses science with the classic lore of invention, investigation, and discovery--from the Big Bang through the end of time. \*Though solid at room temperature, gallium is a moldable metal that melts at 84 degrees Fahrenheit. A classic science prank is to mold gallium spoons, serve them with tea, and watch guests recoil as their utensils disappear.

Almost 90 years have passed since the invention of the thermionic electron valve in 1904 by Sir John Ambrose Fleming. During this period, the development of electron tubes created the so called Electroni Age. Electron tubes played the leading role in the electronic equipments until the middle of the 1950s when solid state devices such as transistors and integrated circuits replaced electron tubes in various applications and accelerated the electronic age.

In recent years, methods for coupling active implants to the middle ear, round window or combinations of passive middle ear prostheses have progressed considerably. Patient selection criteria have expanded from purely sensorineural hearing losses to conductive and mixed hearing losses in difficult-to-treat ears. This book takes into consideration recently developed methods as well as devices in current use. It begins with a fascinating and authentic history of active middle ear implants, written by one of the main pioneers in the field. In the following chapters, leading scientists and clinicians discuss the relevant topics in otology and audiology. Treatments for sensorineural hearing loss, conductive and mixed hearing losses, and results on alternative coupling sites such as the stapes footplate and the oval window are also covered, as well as articles on candidacy and cost-effectiveness. This publication is a must for ENT professionals and surgeons seeking out the latest knowledge on current research and clinical

Douglas Kelly provides a comprehensive and historically valid analysis of the art of medieval French romance as the romancers themselves describe it. He focuses on well-known writers, such as Chrétien de Troyes and Marie de France, and also

draws on a wide range of other sources—prose romances, non-Arthurian romances, thirteenth-century verse romances, and variant versions from the later Middle Ages. Kelly is the first scholar to present the “art” of medieval romance to a modern audience through the interventions and comments of medieval writers themselves. The book begins by examining the difficulties scholars perceive in medieval literature: problems such as source and intertextuality, structure in its manifold modern meanings, and character psychology and individuality. These issues frame Kelly’s identification and discussion of all the known authorial interventions on the art and craft of romance. Kelly’s careful reconstruction of the “art” of romance, based on the records left by the romancers themselves, will be an invaluable resource and guide for all medievalists.

The collection is rich in scholarship and critical perspectives, which is made accessible through the robust list of pedagogical tools included, such as the Key Concepts listed at the beginning of each chapter, and the Glossary of Key Terms and Bibliography for Further Study provided at the end of the text. Further additions include increased attention to orthography, or the physical aspects of the writing process, new material on high school instruction, sections on writing in the electronic age, and increased coverage of women rhetoricians and writing instruction of women. This collection of eight essays draws on a half-year of work, the second six months of 2009. Neusner takes up three problems in the history of Religions, four essays on fundamental issues in form-history and the documentary hypothesis of the Rabbinic canon, and one theological essay. The reason Neusner periodically collects and publishes essays and reviews is to give them a second life, after they have served as lectures or as summaries of monographs or as free-standing articles or as expositions of Judaism in collections of comparative religions. This representation serves a readership to whom the initial presentation in lectures or specialized journals or short-run monographs is inaccessible. Some of the essays furthermore provide a prZcis, for colleagues in kindred fields, of fully worked out
