Beeton's Book of Jokes and Jests; Or, Good Things Said and Sung

Best Doctor Jokes Ever

This book presents a theory of long humorous texts based on a revision and an upgrade of the General Theory of Verbal Humour (GTVH), a decade after its first proposal. The theory is informed by current research in psycholinguistics and cognitive science. It is predicated on the fact that there are humorous mechanisms in long texts that have no counterpart in jokes. The book includes a number of case studies, among them Oscar Wilde's Lord Arthur Savile's Crime and Allais' story Han Rybeck. A ground-breaking discussion of the quantitative distribution of humor in select texts is presented.

Speech Play and Verbal Art

Mom - This Joke's for You

Puns, jokes, proverbs, riddles, play languages, verbal dueling, parallelism, metaphor, grammatical stretching and manipulation in poetry and song— people around the world enjoy these forms of speech play and verbal artistry which form an intrinsic part of the fabric of their lives. Verbal playfulness is not a frivolous pursuit. Often indicative of people's deepest values and worldview, speech play is a significant site of intersection among language, culture, society, and individual expression. In this book, Joel Sherzer examines many kinds of speech play from places as diverse as the United States, France, Italy, Bali, and Latin America to

offer the first full-scale study of speech play and verbal art. He brings together various speech-play forms and processes and shows what they have in common and how they overlap. He also demonstrates that speech play explores and indeed flirts with the boundaries of the socially, culturally, and linguistically possible and appropriate, thus making it relevant for anthropological and linguistic theory and practice, as well as for folklore and literary criticism.

Good Humor, Bad Taste is the first extensive sociological study of the relationship between humor and social background. Using a combination of interview materials, survey data, and historical materials, the book explores the relationship between humor and gender, age, regional background, and especially, humor and social class in the Netherlands. The final chapter focuses on national differences, exploring the differences between the American and the Dutch sense of humor, again using a combination of interview and survey materials. The starting point for this exploration of differences in sense of humor is one specific humorous genre: the joke. The joke is not a very prestigious genre; in the Netherlands even less so than in the US. It is precisely this lack of status that made it a good starting point for asking questions about humor and taste. Interviewees generally had very pronounced opinions about the genre, calling jokes "their favorite kind humor", but also "completely devoid of humor" and "a form of intellectual poverty". Good Humor, Bad Taste attempts to explain why jokes are good humor to some, bad taste to others. The focus on this one genre enables Good Humor, Bad Taste to have a very wide scope. The book not only covers the appreciation and evaluation of jokes by different social groups and in different cultures, and its relationship with wider humor styles. It also describes the genre itself: the history of the genre, its decline in status from the sixteenth century onward, and the way the topics and the tone of jokes have changed over the last fifty years of the twentieth century.

The World's Best Yiddish Dirty Jokes

Some things are funny -- jokes, puns, sitcoms, Charlie Chaplin, The Far Side, Malvolio with his yellow garters crossed -- but why? Why does humor exist in the first place? Why do we spend so much of our time passing on amusing anecdotes, making wisecracks, watching The Simpsons? In *Inside Jokes*, Matthew Hurley, Daniel Dennett, and Reginald Adams offer an evolutionary and cognitive perspective. Humor, they propose, evolved out of a computational problem that arose when our long-ago ancestors were furnished with open-ended thinking. Mother Nature -- aka natural selection -- cannot just order the brain to find and fix all our time-pressured misleaps and near-misses. She has to bribe the brain with pleasure. So we find them funny. This wired-in source of pleasure has been tickled relentlessly by humorists over the centuries, and we have become addicted to the endogenous mind candy that is humor.
