2046 A.D.: Seven years ago an experimental space vessel disappeared under mysterious circumstances. Now the ship has been found orbiting Neptune. When a salvage team is sent to investigate, they encounter the ultimate horror that lurks behind the Event Horizon. Paramount's major motion picture will be released in August and stars Sam Neill, Laurence Fishburne, Kathleen Quinlan, Richard T. Jones and Joely Richardson.

That Blue Door & Other Stories

In the year 2087, life happens fast. Ben Zieglar, the main character and protagonist, is a product of this situation. Ben is a manager for Benevolence Corporation (B Corp.). B Corp is one of three main corporations in The Country (formerly the USA but referred to throughout the novel as The Country). The Country has cut itself off from the world and has fallen behind quite a ways in relation to the other powers of the world. At the corporations and throughout society, there are 3 levels of people. The highest levels are the Founders, who have acquired massive wealth and for the general advancement of mankind, control society. This is a small percent of people in The Country, less than even 0.1% of the people. On his walk home, Ben sees a lovely dark haired tan woman with Greenish-Blue Eyes. Ben doesn't talk to her and instead goes home. He then falls asleep and goes to work the next day. There at work, Ben meets his newest co-worker Jessica and they immediately hit it off. Then, the number 2 at B corp., Jonathan Vilheim II(2), is introduced into the novel. His uncle Jonathan, the first, is the current CEO. But Vilheim 2 is starting to run the entity and was instrumental in bringing Jessica into town. Vilheim 2 is the antagonist although at first it is unclear whether he is good or evil. Ben's best friend and co-worker Wally Elmore is introduced to the novel. Wally is a Founder himself and is a good friend to Ben.

Wally is a little eccentric in his dress and only wears old style Vintage tuxedos. Wally has a twin brother Thomas, who is 5 minutes older than Wally. Thomas is the head of F corp. (Faction) and makes his way to town for the annual Elmore party. Wally and Thomas' relationship is strained because Thomas is a rebel and does not participate in the society of Ultra City (B Corp.) or Los Angeles (M corp.). Thomas, however, is quite smart, and due to his power, the technologically advanced societies must deal with him. Thomas meets Ben and believes he can turn Ben to the Faction. Next, a series of events is set off that threatens to unravel the delicate balance of society in the Year 2087.

In Leah's Wake

Lilly finally returns to the only place that's ever been home, a mission in the Democratic Republic of Congo. But the ongoing civil war creeps closer, threatening her sanctuary. Case McCord, a weary soldier, determined to keep Lilly safe from the encroaching dangers, offers her protection, a home and love. Accepting him would mean turning her back on everything she believes. Rejecting him would mean turning down the greatest desire of her heart, and putting a child she loves in danger.

The Mechanical God, Machines in Science Fiction

Collects short stories exploring themes of time and space travel, self-discovery, and science and technology.

Jerry D Young was born at home, in Senath, Missouri July 3, 1953. At age 5 the family rented a small farm house on an active farm 40 miles southwest of St. Louis. While the family weren't farmers, they lived something of a homestead type life, raising a milk cow, sometimes two, and calves, a pig or two, chickens, and the occasional goat. Along with the stock, a large garden helped to feed Jerry's three brothers and two sisters for several years. Fishing and hunting contributed to the pantry, as did foraging the wild edibles on the property. At the age of 14, the family, minus a brother and two sisters that were now adults and on their own, moved back to Senath. Having been encouraged from an early age to read, Jerry was a regular patron of the Senath Branch Library. A love of a good story was born within him, and shortly before graduating high school, for a lack of stories that he liked at the library, he began to write short vignettes, and started taking notes for stories that he wanted to tell. Well, a full life interceded, and the writing didn't resume for several years. But while working a job with a much free time, and the then newfangled home computer, Jerry began to write in earnest. With the occasional gap in the process, Jerry continued to research and write, never believing he could ever be published. But when he turned 50, he wanted a change in his life, left the job he was doing and began focusing on his writing. When he became ill, the writing stopped, but not the inspiration. When he started writing

again, in 2004, after getting the medical problems under control, he began to read some on-line stories dealing with emergency preparedness, one of his other loves. The die was cast. Now with over a hundred of the vignettes and short stories about how to survive disasters written, along with his other novels, Jerry decided to go for broke, adding one of his previous works every few days to his list of stories now available, Jerry continues to write, both the Prep/PAW stories, as well as action adventure with a little romance type stories that first got him started.

Finally recovered from last year, Officers Friar and Sherrow are back on the job and out on the streets where they can get into all sorts of trouble. It doesn't take long, and soon they are working through personal tragedy, sudden death and a strange pattern of accidents aimed at their policechief that might not be accidents. This time they will move from the highest offices in West Precinct all the way down to the deepest places in the sprawling, teeming dark that is Alaman City at night.

Dry Heat

In the salad of Michael Collins' otherwise perfect life there lurked one undoubted caterpillar, an immature determination to win a county junior hurling title with his beloved De Wets. Collins' playing history and his personal life contain much to vex the ordinary fan and strain his credulity, which is as it must be. And, like all the great matches "The Drinker with the Hurling Problem" is full of excitement, black humour and gritty reality. Collins' story will move the compassionate to tears, the just to indignation and the cruel to laughter. This book tells the story of what it takes to make an Irish male vow to change his life, to say nothing of his underpants. Every novelist writes one book too many and maybe that's what Paddy Coyne has just written; another variation on the Icarus theme: about wax melting, unscheduled descents and, of course, the inclination of God to look the other way when people are suffering most acutely.

What to read next is every book lover's greatest dilemma. Nancy Pearl comes to the rescue with this wide-ranging and fun guide to the best reading new and old. Pearl, who inspired legions of litterateurs with "What If All (name the city) Read the Same Book," has devised reading lists that cater to every mood, occasion, and personality. These annotated lists cover such topics as mother-daughter relationships, science for nonscientists, mysteries of all stripes, African-American fiction from a female point of view, must-reads for kids, books on bicycling, "chick-lit," and many more. Pearl's enthusiasm and taste shine throughout.

The Routledge Companion to Science Fiction is a comprehensive overview of the history and study of science fiction. It outlines major writers, movements, and texts in the genre, established critical approaches and areas for future study. Fifty-six entries by a team of renowned international contributors are divided into four parts which look, in turn, at: history – an integrated chronological narrative of the genre’s development theory – detailed accounts of major theoretical approaches including feminism, Marxism, psychoanalysis, cultural studies, postcolonialism, posthumanism and utopian studies issues and challenges – anticipates future directions for study in areas as diverse as science studies, music, design, environmentalism, ethics and alterity subgenres – a prismatic view of the genre, tracing themes and developments within specific subgenres. Bringing into dialogue the many perspectives on the genre The Routledge Companion to Science Fiction is essential reading for anyone interested in the history and the future of science fiction and the way it is taught and studied.

Beyond the Blue Horizon

Utopia has been achieved. For centuries, disease, hunger, poverty and war have been things found only in the histories. And applied genetics has given men and women the bodies of athletes and a lifespan of over a century. They should all have been very happy. But Hamilton Felix is bored. And he is the culmination of a star line; each of his last thirty ancestors chosen for superior genes. Hamilton is, as far as genetics can produce one, the ultimate man. And this ultimate man can see no reason why the human race should survive, and has no intention of continuing the pointless comedy. However, Hamilton's life is about to become less boring. A secret cabal of revolutionaries who find utopia not just boring, but desperately in need of leaders who know just What Needs to be Done, are planning to revolt and put themselves in charge. Knowing of Hamilton's disenchantment with the modern world, they have recruited him to join their Glorious Revolution. Big mistake! The revolutionaries are about to find out that recruiting a superman is definitely not a good idea. With an all new afterword by Tony Daniel. At the publisher's request, this title is sold without DRM (Digital Rights Management).

Dry Heat is the debut novel by indie author Steven Eggleton. A dirty, angry, and often painfully funny read, *Dry Heat* explores the angst and confusion people in their early twenties frequently feel. Written in Eggleton's skeptical, sardonic, and bluntly frank narrative voice, the book chronicles a little over a year in the life of

Vincente Vasquez, a disillusioned grocery-store clerk living in Tucson, Arizona. Chiefly concerned with escaping the drudgery of work, social equality, and the pursuit of sex; Dry Heat is a visceral and raw novel that's sure to leave an impression.

This connected series of stories does not pretend to be prophetic. It is a history, not of the future, but of a future -- an alternate-probability world which is logically self-consistent, dramatic, and recognizably an offshoot of our own past. The stories really do not form a linear series at all -- they are more like a pyramid, in which earlier stories provide a solid base for later ones to rest on. Partly because of this pyramiding of background and partly because of the author's broad knowledge, Heinlein's readers find themselves in a world which is clearly our own, only projected a few years or decades into the future. As for the still-unfolding future, there are guideposts and warnings here. Heinlein continually reminds us that history is a process, not something dead and embalmed in textbooks. - Introduction.

The Best of the Best, Volume 2

What if dreams are more than dreams? This magical realism novel is the first in a trilogy that is historical fiction, love story and spiritual quest. It is about magic and mysticism, faith and initiation. It is about the soul of art. Woven through history is a love story of many parts, remembered and built upon through the centuries. A great love passes on through generations in some undeniable memory in the flesh, and also reappears in new lives from distant places. Mystical love calls to couples throughout time to bring them together again and again. This remembering travels both ways in time, existing in that place beyond time where love lives. There are vague memories, subtle warnings and obscure communications between individuals separated by centuries. Lives weave together throughout more than five hundred years, paralleling contemporary events. Religious intolerance, fear and greed generate the Spanish Inquisition and the religious wars in Europe that reach a decisive moment with the defeat of the Spanish Armada. Ninety-six years earlier, in the same year that Ferdinand and Isabella sent the three ships that discovered the New World, Spain's power had begun to weaken with the expulsion of the Jews and Muslims. The wisdom and skills of the Islamic and Jewish citizens was what had helped make Spain what it was, but fear caused the end of that golden age. These two critical points in history and what follows are the setting for this novel, but other times are connected over many thousands of years. The story opens in Spain in the 15th Century, with Jewish, Islamic and Christian children playing together as innocents without prejudice or fear. Throughout the book,

there is an underlying theme of Hope and Faith manifested in mystical ways. This faith lives in ancient Celtic traditions, as well as Jewish, Islamic and Christian forms, both Catholic and Protestant. Truth is truth, no matter what form it chooses to wrap itself inside. Love empowers many characters in various ways and transforms them into their best. The world of nature sometimes comes to their aid in miraculous ways, and enemies who are treated with love become allies. There are no greater mysteries than time and consciousness and the memories that connect us to the whole of our lives and beyond. The deja vu and vague precognitive experiences that all of us have felt to some degree are the tip of the iceberg of this mystery. The supernatural in our lives is often liberated by powerful emotions like love and fear. We all are familiar with stories about mothers who have sensed when their children are in danger or when a loved one is in crisis. There is an undeniable connection that doesn't fit neatly into our view of everyday physical life. There is a larger world we glimpse as we timidly awake. Editorial Review: Lyrically, hauntingly beautiful.this is storytelling at its best. -- Phyllis Tickle - Founding editor of the Religion Department of Publishers Weekly and author of dozens of books, including The Great Emergence: How Christianity Is Changing and Why

Beyond the Goat Trails

When twenty-two year old Mark Prior jumped at the opportunity of joining his friends on a backpacking holiday around the Aegean islands, he never imagined that they'd come across a forgotten relic that would change their lives forever. The mysterious island of Samothrace is the group's first stop and the epicenter of secrets, where the blue lightning is harbored, hidden deep within its ancient mountain. Who are the enigmatic Order of Knights, known as the Clergy, that are sworn to protect the world from this primeval and forgotten power? What is their connection to their adversaries, a vagabond group of misfits calling themselves the Organization? Join the adventures of Mark, Alice, Telemachus and Jose, as they unleash an ancient power, designed to bestow the wielders of the blue lightning with extraordinary abilities. Witness their story as they realize the consequences of their discovery, with half of the world's secret services hot on their heels. Stormcall is the first installment of the E.M.F. Chronicles, a five-part series of suspenseful action adventures with a strong science fiction edge. Follow the life of each character in a tale of friendship, camaraderie, and conflict, from the green slopes of mount Saos to the magical circle of stones in Glastonbury. T.A. Marks' remarkable book will keep you guessing, from start to finish.

New Adult Paranormal Romance ** Mature Content ** Recommended for ages 16+ due to sexual situations and language This book includes realistic scenes of domestic violence that are not gratuitously graphic, but may be disturbing to sensitive readers. Hearts break. Souls shatter. Love lies in The Space Beyond. As

members of the Phoenix, Jeric and Leni are thrust into their new lives, expected to lead Earth's Guardians. But Leni struggles with trusting her own soul, and Jeric is more concerned about keeping Leni safe than meeting others' demands. When Darkness swarms Lake Haven, they embark on their first mission with little preparation and no idea which soul the Dark hunts. Born and raised in Lake Haven, Bex hopes to escape her small-town life, ideally in the arms of her soul mate. She knows he exists, and her heart aches with the need to find him. When her long-lost mama calls to announce she's knockin' on death's door, Bex reluctantly makes the trip to see the uncaring bitch (bless her heart), only to be knocked off her feet by the sexy and charming Dr. Mason Hayes. Is he really The One? Leni's soul felt an instant connection to Bex, but if Bex found her soul mate, she isn't their mission. So who is, and why does Leni instinctively feel drawn to her? Can Leni even trust her intuition? And will Jeric step up and lead when the time comes or continue to hold them back? If they don't learn to trust themselves and each other quickly, Darkness will claim them all along with the rest of Earth's souls.

Beyond This Horizon

Frederik Pohl was on a streak when this Hugo Award-finalist novel was published in 1980. Now back in print after an absence of nearly a decade, this unique science fiction novel is as fresh and entertaining as ever. The story begins when the hero of Gateway finances an expedition to a distant alien spaceship that may end famine forever. On the ship, the explorers find a human boy, and evidence that reveals a powerful alien civilization is thriving on a transport ship headed right for Earth. At the Publisher's request, this title is being sold without Digital Rights Management Software (DRM) applied.

Beyond the Blue Event Horizon

The Alplai have lived in peace and prosperity for centuries, spreading beyond their homeworld's single continent into floating cities on its vast oceans, and colonizing the planets and moons of their solar system. Now, a massive alien vessel has come, carrying over a million colonists in cryogenic stasis from a devastated world. Ganak, the recently appointed Commissioner for Space Exploration, advocates that the Terai be allowed to settle in the newly prepared Eastern Sector of the planet Totrana. The proposal is approved, and the avian-descended Alplai work with this strange mammalian species to help them build a new home. But not all the Alplai welcome these creatures. Many are concerned about their warlike past, and when a new disease erupts on Totrana, the aliens are quickly blamed. Despite their contributions, the Terai face discrimination and harassment. How far can Ganak use his influence to help, and what leaders will emerge amongst them as they strive to build a new life?

Beyond the Blue Event Horizon

Science fiction is a literary genre based on scientific speculation. Works of science fiction use the ideas and the vocabulary of all sciences to create valid narratives that explore the future effects of science on events and human beings. Science Fact and Science Fiction examines in one volume how science has propelled science-fiction and, to a lesser extent, how science fiction has influenced the sciences. Although coverage will discuss the science behind the fiction from the Classical Age to the present, focus is naturally on the 19th century to the present, when the Industrial Revolution and spectacular progress in science and technology triggered an influx of science-fiction works speculating on the future. As scientific developments alter expectations for the future, the literature absorbs, uses, and adapts such contextual visions. The goal of the Encyclopedia is not to present a catalog of sciences and their application in literary fiction, but rather to study the ongoing flow and counterflow of influences, including how fictional representations of science affect how we view its practice and disciplines. Although the main focus is on literature, other forms of science fiction, including film and video games, are explored and, because science is an international matter, works from non-English speaking countries are discussed as needed.

"Event Horizon: A Marine's Vietnam War Story" is a memoir of Terry Presgrove's time in the United States Marine Corps: 1967-69, boot camp through returning home after the war. The book zeroes in on operation Dewey Canyon, at which time he was the artillery forward observer for Alpha Company, 1st Battalion, 9th Marine Regiment, 3rd Marine Division. Dewey Canyon was the last major engagement by the Marine Corps during the Vietnam War. This work is an attempt to give the outside observer a peek behind the veil and some pliable understanding into what a combat Marine in Vietnam experienced. The extreme psychological impact of war on the individual combatant has been portrayed as an "event horizon," a boundary in spacetime beyond which events cannot affect an outside observer. In layman's terms, it is defined as "the point of no return," i.e., the point at which the gravitational pull becomes so great as to make escape impossible. Even light cannot escape. For those who fought in the Vietnam War, and specifically for the Marines who fought in operation Dewey Canyon, it is impossible to escape the experiences that have generated a paradox of "Revolving Door" ("The Revolving Door" is the fourth chapter of Event Horizon) memories that will forever both haunt and inspire us. In the book's concluding chapter, under the title "Unlearned Lessons of War," America's "Revolving Door" war policies are addressed. Even though more than four decades have passed since the Vietnam War, many of the same mistakes continue to be made today. The message of this work is as relevant today as what you read on your favorite news app or see on the evening news. In the "Unlearned Lessons of War" critique, the author points out some of the self-defeating policies that have trapped our great nation. Finally, In "Appendix A," Presgrove delivers a spiritual message of hope to all the wounded and hurting folks who question their relationship with God. From our old warriors to the very young, no one is exempt from feelings of hopelessness and despair.

Gateway

Features a selection of science fiction writings from the past two decades of the annual "The Year's Best Science Fiction," including works from authors such as Frederik Pohl, Robert Silverberg, and Ursula K. Le Guin.

The Space Beyond

Take a 6000 mile American journey with Doo Doo, a golden-orange tomcat who is very lost. But not so lost he doesn't know what he wants more than anything-it's the same thing we all want-love and home.

The Diary of a Nobody

Sixteen-year-old Max and 10-year-old Tessa were fully prepared for another horrible summer vacation. While they always hoped to go somewhere fun like Disney World or Universal Studios, they usually went somewhere weird and cheap that their father, former boy bander Don Masters, found in an ad in a truck stop

coupon magazine. But this year was different. Where they went couldn't be found on any map or in any truck stop coupon book. They passed through a portal to a place called Turtle Island, an alternate version of America that diverged from our history before the pilgrims landed at Plymouth Rock. It was there where they met world famous action movie star Jordie Paine -- star of such films as I Plan to Kill You Now and the sequel, I Plan to Kill You Now, Too, the ninja film, Chuck Butcher: Sword Wielding Jackal, as well as the light-hearted romp, Harry Hinklehoffer and the Giant Dancing Toad of East Nebraska -- who would be their guide in this strange new world. Jordie, they later learned, brought the Masters family to Turtle Island for a very specific reason. Because they look just like the ruthless first family of Turtle Island, the Masters are pawns in a coup to overthrow the dictator. But things don't go as planned and the Masters wind up in the Survival Games, Turtle Island's national pastime/system of justice where criminals competitors, or crimpetitors, compete for their freedom. In this scifi comedy, the stakes are very simple -- if they win, they rule, if they lose, they must suffer the consequences.

The Confessions of a Catnip Junkie

Dr. Edwin C. Krupp in his latest book, Beyond the Blue Horizon, examines the myths and legends of the sun, moon, planets, and stars. He addresses questions such as: What is the moon's role in lunacy?; How is a match made in heaven?; and Is Santa Claus a modern shaman? More than 200 black-and-white photos.

Heechee Rendezvous

A mysterious messenger delivers four invitations for a round of golf to the elite of society. These four avid golfers use their power and wealth to shape life to their own depraved reality at the expense of others. The golf course is in a remote part of the world and kept secret from the public. The messenger visits a senator, army colonel, a professional baseball player and a wealthy surgeon. His presence terrifies each person he visits but they accept the exclusive invitation despite their instincts. The golfers look forward to a long weekend to indulge in the opulent amenities of the golf club but the distinguished director of the club has other plans. A lifetime membership to the club is the prize for winning the golf match. When they meet their caddies, they realize their power and wealth can't save them from the sinister secret of Goat Trails Golf Club.

The Year's Best Science Fiction: Seventeenth Annual Collection

A Hugo Award-finalist sequel to Gateway finds its protagonist financing a deep-space expedition in the hopes of ending a humanity-threatening famine, a journey that is complicated by a human child and a threatening alien civilization that is headed toward Earth. Reprint.

How to Live Forever

Immortality is a subject which has long been explored and imagined by science fiction writers. In his intriguing new study, Stephen R.L.Clark argues that the genre of science fiction writing allows investigation of philosophical questions about

immortality without the constraints of academic philosophy. He reveals how fantasy accounts of issues such as resurrection, disembodied survival, reincarnation and devices or drugs for preserving life can be used as an important resource for philosophical inquiry and examines how a society of immortals might function through a reading of the vampire myth. *How to Live Forever* is a compelling study which introduces students and professional philosophers to the possibilities of using science fiction in their work. It includes extensive suggestions for further reading, both fictional and philosophical, and examines the work of such major science fiction authors as Arthur C. Clarke, Frank Herbert, Larry Niven, William Gibson, and Colin Wilson.

Frederik Pohl

Do you frequently find yourself asking, "Why?" This book will, prayerfully, prompt you to see God acting in every circumstance in your life, from the mundane to the monumental; to appreciate that the Creator does, indeed, cause "all things [to] work for good to them that love God, to them who are called according to His purpose." (Romans 8:28) Through prose and poems based on personal experiences, the author shares pieces of her journey through faith-building events. If you have trouble focusing on God and His agenda, this book will sharpen your vision and lead you to reconsider God's purpose for the events in which you may find yourself involved on a daily basis.

The Annals of the Heechee

One of science fiction's undisputed grandmasters, Frederik Pohl built an

astonishing career that spanned more than seven decades. Along the way he won millions of readers and seemingly as many awards while producing novels, short stories, and essays that left a profound mark on the genre. In this first-of-its-kind study, Michael R. Page traces Pohl's journey as an author but also uncovers his role as a transformative figure who shaped the genre as a literary agent, book editor, and in Gardner Dozois' words, "quite probably the best SF magazine editor who ever lived."
