Textbooks are symbols of centuries-old education. They're often outdated as soon as they hit students' desks. Acting "by the textbook" implies compliance and a lack of creativity. It's time to ditch those textbooks--and those textbook assumptions about learning. In *Ditch That Textbook*, teacher and blogger Matt Miller encourages educators to throw out meaningless, pedestrian teaching and learning practices. He empowers them to evolve and improve on old, standard, teaching methods. *Ditch That Textbook* is a support system, toolbox, and manifesto to help educators free their teaching and revolutionize their classrooms.

Get Ready for Unstoppable Inner Peace Author Corinne Zupko undertook her study of psychology out of necessity when debilitating anxiety threatened to derail her life. Seeking ways to do more than temporarily alleviate her symptoms, Corinne began to study *A Course in Miracles (ACIM)*, mindfulness meditation, and the latest therapeutic approaches for treating anxiety. In *From Anxiety to Love*, she shares what she learned and gently guides you through the process, helping you undo anxiety-based thinking and fostering mindful shifts in your thoughts and actions. Whether struggling with everyday stress or near-crippling discomfort, you will find that Corinne's approach offers a new way of healing from — rather than just coping with — fear and anxiety.

This series develops important comprehension and thinking skills at the earliest level. Each book contains stories with exercises that follow the same phonetic structure as the Explode The Code series. Each story is preceded by writing and spelling activities that introduce new sight words and teach phonetic patterns. The charmingly illustrated stories are followed by questions and exercises that develop comprehension as well as critical thinking. Book 1 contains three charmingly illustrated stories Zack the Dog, Six Kids Jog, and Help 911 with introductory exercises on word families. Vocabulary and follow-up questions develop students understanding of the stories as well as encourage their reasoning abilities. Final exercises in each section give students the opportunity to add their own drawings to complete illustrations. Grades 2-3."

The three pocketbooks comprising the 'English Through Pictures Series' are the remarkable invention of I A Richards and Christine Gibson, who designed them to help the learner speak, read and write English in the quickest and clearest possible way -- through pictures. The authors have made a careful selection of the most widely useful English words, choosing those with the power to define other words, and have put them to work in key patterns that offer the learner the ability to communicate successfully in English. Book 1 contains a vocabulary of 250 such words, with an additional 500 developed in Book 2; these 750 words are then used in Book 3 to build a command of 1000 words which, by their defining power, hold the possibility of understanding as much as another 20,000 words of English. Throughout 'English Through Pictures', responsibility for learning is placed directly on the learner, who from the very start enjoys the ability to put essential words to work creating key sentence patterns where meaning is clearly shown in pictures. These simplified drawings allow learners to focus on the sentence and to enjoy growing confidence as they successfully take control of language, with the workbooks in Books 1 and 2 challenging and reinforcing their growing competence as both speakers and readers. Motivated and inspired, learners will soon find to their delight that fluent communication in English -- the common language of today's world -- lies well within their grasp. 'English Through Pictures' has already been used successfully by millions of learners in over forty countries.

Higher digital connectivity is expected to bring opportunities to leapfrog development in sub-Saharan Africa (SSA). Experience within the region demonstrates that if there is an adequate digital infrastructure and a supportive business environment, new forms of business spring up and create jobs for the educated as well as the less educated. The paper first confirms the global digital divide through the unsupervised machine learning clustering K-means algorithm. Next, it derives a composite digital connectivity index, in the spirit of De Muro-Mazziotta-Pareto, for about 190 economies. Descriptive analysis shows that majority of SSA countries lag in digital connectivity, specifically in infrastructure, internet usage, and knowledge. Finally, using fractional logit regressions we document that better business enabling and regulatory environment, financial access, and urbanization are associated with higher digital connectivity.

Multilingualism is on the rise - in the coming decades, as many as two billion people will learn English as a second language. The next stage up from multilingualism is the domain of the 'hyperpolyglot' or 'superlearner': someone who claims to know at least six languages. But what does it mean to 'know' a language? Can a person claim to speak a language fluently if it isn't their mother tongue? What role does culture play in learning languages?
