The Acts of the Apostles

Concepts of Biology

Enger/Ross/Bailey: Concepts in Biology is a relatively brief introductory general biology text written for students with no previous science background. The authors strive to use the most accessible vocabulary and writing style possible while still maintaining scientific accuracy. The text covers all the main areas of study in biology from cells through ecosystems. Evolution and ecology coverage are combined in Part Four to emphasize the relationship between these two main subject areas. The new, 13th edition is the latest and most exciting revision of a respected introductory biology text written by authors who know how to reach students through engaging writing, interesting issues and applications, and accessible level. Instructors will appreciate the book's scientific accuracy, complete coverage and extensive supplement package.

This #1 best-selling text in introductory biology combines the guiding principles of scientific accuracy, currency, and the power of text-art integration for teaching and learning biology. Biology: Concepts & Connections, Sixth Edition continues to

be the most accurate, current, and pedagogically effective non-majors text on the market. This extensive revision builds upon the book's best-selling success with exciting new and updated features. Key concept modules, seamlessly combining text and illustrations, help students keep the big picture in mind and pace their learning, while making it easy for professors to assign selected sections within a chapter. Also within the text, a variety of new chapter opening essays, Connection Modules, and new Evolution Connection Modules help students recognize and appreciate the connections between biology and the world they live in. BioFlix animations, available on the companion website and as part of the instructor resources, offer students unprecedented help in understanding important topics and help invigorate lectures, assignments, or online courses. This text now includes access to MasteringBiology®. All resources previously found on mybiology are now located within the Study Area of MasteringBiology. KEY TOPICS: THE LIFE OF THE CELL, The Chemical Basis of Life, The Molecules of Cells, A Tour of the Cell, The Working Cell, How Cells Harvest Chemical Energy, Photosynthesis: Using Light to Make Food, The Cellular Basis of Reproduction and Inheritance, Patterns of Inheritance, Molecular Biology of the Gene, How Genes Are Controlled, DNA Technology and Genomics, How Populations Evolve, The Origin of Species, Tracing Evolutionary History, The Origin and Evolution of Microbial Life: Prokaryotes and Protists, Plants, Fungi, and the Colonization of Land, The Evolution of Invertebrate Diversity, The Evolution of Vertebrate Diversity, Unifying Concepts of Animal Structure and Function, Nutrition and Digestion, Gas Exchange, Circulation, The Immune System, Control of Body Temperature and Water Balance, Hormones and the Endocrine System, Reproduction and Embryonic Development, Nervous Systems, The Senses, How Animals Move, Plant Structure, Reproduction, and Development, Plant Nutrition and Transport, Control Systems in Plants, The Biosphere: An Introduction to Earth's Diverse Environments, Behavioral Adaptations to the Environment, Population Ecology, Communities and Ecosystems, Conservation and Restoration Biology. Known for its unique “Special Topic” chapters and emphasis on everyday health concerns, the Fifth Edition of *Biology of Humans: Concepts, Applications, and Issues* continues to personalize the study of human biology with a conversational writing style, stunning art, abundant applications, and tools to help you develop critical-thinking skills. The authors give you a practical and friendly introduction for understanding how their bodies work and for preparing them to navigate today's world of rapidly expanding—and shifting—health information. Each chapter now opens with new “Did You Know?” questions that pique your interest with intriguing and little-known facts about the topic that follows. The Fifth Edition also features a new “Special Topic” chapter (1a) titled “Becoming a Patient: A Major Decision,” which discusses how to select a doctor and/or a hospital, how to research health conditions, and more.

Frost and Deal's General, Organic, and Biological Chemistry gives students a focused introduction to the fundamental and relevant connections between chemistry and life. Emphasizing the development of problem-solving skills with distinct Inquiry Questions and Activities, this text empowers students to solve problems in different and applied contexts relating to health and biochemistry. Integrated coverage of biochemical applications throughout keeps students interested in the material and allow for a more efficient progression through the topics. Concise, practical, and integrated, Frost's streamlined approach offers students a clear path through the content. Applications throughout the narrative, the visual program, and problem-solving support in each chapter improve their retention of the concepts and skills as they master them. General, organic, and biological chemistry topics are integrated throughout each chapter to create a seamless framework that immediately relates chemistry to students' future allied health careers and their everyday lives. Balances coverage of the concepts of cell and molecular biology, using examples of experimentation to support those concepts. As experimental techniques become more diverse and complex, it is increasingly necessary to identify individual studies that have a broad impact on our understanding of cell biology. This text describes in detail some of the key experimental findings, along with the original data and figures.

Inspiring people to care about the planet. In the new edition of LIVING IN THE ENVIRONMENT, authors Tyler Miller and Scott Spoolman have partnered with the National Geographic Society to develop a text designed to equip students with the inspiration and knowledge they need to make a difference solving today's environmental issues. Exclusive content highlights important work of National Geographic Explorers, and features over 200 new photos, maps, and illustrations that bring course concepts to life. Using sustainability as the integrating theme, LIVING IN THE ENVIRONMENT 18e, provides clear introductions to the multiple environmental problems that we face and balanced discussions to evaluate potential solutions. In addition to the integration of new and engaging National Geographic content, every chapter has been thoroughly updated and 18 new Core Case Studies offer current examples of present environmental problems and scenarios for potential solutions. The concept-centered approach used in the text transforms complex environmental topics and issues into key concepts that students will understand and remember. Overall, by framing the concepts with goals for

more sustainable lifestyles and human communities, students see how promising the future can be and their important role in shaping it. offers additional exclusive National Geographic content, including high-quality videos on important environmental problems and efforts being made to address them. Team up with Miller/Spoolman's, *LIVING IN THE ENVIRONMENT* and the National Geographic Society to offer your students the most inspiring introduction to environmental science available! For non-majors biology courses Engage students in science with stories that relate to their lives *Biology: Science for Life* weaves a compelling storyline throughout each chapter to grab student attention through the exploration of high-interest topics such as genetic testing, global warming, and the Zika virus. The authors return to the storyline again and again, using it as the basis on which they introduce the biological concepts behind each story. In the 6th Edition, new active learning features and author-created resources help instructors implement the storyline approach in their course. The Big Question is a new feature that helps students learn how to use data to determine what science can answer while developing their ability to critically evaluate information. Also available with Mastering Biology or as an easy-to-use, standalone Pearson eText Mastering(tm) is the teaching and learning platform that empowers you to reach every student. By combining trusted author content with digital tools developed to engage students and emulate the office-hour experience, Mastering personalizes learning and often improves results for each student. New to the 6th edition are author-created Figure Walkthrough videos that guide students to solidify their understanding of the concepts within challenging illustrations as well as Make the Connection activities that help students bridge the gap between each storyline and the science behind it, as well as Ready-to-Go Teaching Modules for select chapters that provide instructors with assignments to use before and after class, as well as in-class activities. Pearson eText allows educators to easily share their own notes with students so they see the connection between their reading and what they learn in class--motivating them to keep reading, and keep learning. Portable access lets students study on the go, even offline. And, reading analytics offer insight into how students use the eText, helping educators tailor their instruction. Campbell Biology

This market leading human biology text emphasizes the relationships of humans to other living things. Human Biology remains user friendly; relevancy and pedagogy are among its strengths. In this edition, as in previous editions, each chapter presents the topic clearly and distinctly so that students will feel capable of achieving an adult level of understanding. Detailed, high-level scientific data and terminology are not included because Dr. Mader believes that true knowledge consists of working concepts rather than technical facility..

Developing the tools to effectively write about biology Teaching biology and strong writing skills simultaneously is a challenge, especially when students exhibit a range of abilities. The Ninth Edition of A Short Guide to Writing about Biology provides tools to strengthen student writing and reinforce critical thinking. Written by a prominent biologist, this best-selling guide teaches students to express ideas clearly and concisely. It emphasizes writing as a way of examining, evaluating, and refining ideas: students learn to read critically, study, evaluate and report data, and communicate with clarity. Using a narrative style, the text is its own example of good analytical writing. In this new edition, students learn how to avoid plagiarism (Ch 1 and 3), read and interpret data (Ch 3, 4 and 9), prepare effective Materials and Methods sections in research reports and more (Ch 9), and prepare manuscripts for submission (Ch 9). The text also provides advice on locating useful sources (Ch 2), maintaining laboratory and field notebooks (Ch 9), communicating with different audiences (Ch 6 and 10), and crafting research proposals (Ch 10), poster presentations (Ch 11), and letters of application (Ch 12). Also available with MyWritingLab(tm) This title is also available with MyWritingLab -- an online homework, tutorial, and assessment program that provides engaging experiences for teaching and learning. Flexible and easily customizable, MyWritingLab helps improve students' writing through context-based learning. Whether through self-study or instructor-led learning, MyWritingLab supports and complements course work.

Campbell Biology, Books a la Carte Edition

The passionate new romance from E L James, author of the phenomenal #1 bestselling Fifty Shades Trilogy London, 2019. Life has been easy for Maxim Trevelyan. With his good looks, aristocratic connections, and money, he's never had to work and he's rarely slept alone. But all that changes when tragedy strikes and Maxim inherits his family's noble title, wealth, and estates, and all the responsibility that entails. It's a role he's not prepared for and one that he struggles to face. But his biggest challenge is fighting his desire for an unexpected, enigmatic young woman who's recently arrived in England, possessing little more than a dangerous and troublesome past. Reticent, beautiful, and musically gifted, she's an alluring mystery, and Maxim's longing for her deepens into a passion that he's never experienced and dares not name. Just who is Alessia Demachi? Can Maxim protect her from the malevolence that threatens her? And what will she do when she learns that he's been hiding secrets of his own? From the heart of London through wild, rural Cornwall to the bleak, forbidding beauty of the Balkans, The Mister is a roller-coaster ride of danger and desire that leaves the reader breathless to the very last page.

Supports and motivates you as you learn to think like a biologist. Building upon Scott Freeman's unique narrative style that incorporates the Socratic approach and draws you into thinking like a biologist, the Fourth Edition has been carefully refined to motivate and support a broader range of learners as they are introduced to new concepts and encouraged to develop and practice new skills. Each page of the book is designed in the spirit of active learning and instructional reinforcement, equipping novice learners with tools that help them advance in the course--from recognizing essential information in highlighted sections to demonstrating and applying their understanding of concepts in practice exercises that gradually build in difficulty.

Foundations of Astronomy

Students can master key concepts and earn a better grade with the thought-provoking exercises found in this study guide. A wide range of questions and activities help students test their understanding of biology. The Student Study Guide also includes references to student media activities on the Campbell Biology CD-ROM and Website.

Biological Science

Biology for AP® courses covers the scope and sequence requirements of a typical two-semester Advanced Placement® biology course. The text provides comprehensive coverage of foundational research and core biology concepts through an evolutionary lens. Biology for AP® Courses was designed to meet and exceed the requirements of the College Board's AP® Biology framework while allowing significant flexibility for instructors. Each section of the book includes an introduction based on the AP® curriculum and includes rich features that engage students in scientific practice and AP® test preparation; it also highlights careers and research opportunities in biological sciences.

Biology Today and Tomorrow with Physiology

Student Study Guide for Biology

Concepts of Biology is designed for the single-semester introduction to biology course for non-science majors, which for many students is their only college-level science course. As such, this course represents an important opportunity for students to develop the necessary knowledge, tools, and skills to make informed decisions as they continue with their lives. Rather than being mired down with facts and vocabulary, the typical non-science major student needs information presented in a way that is easy to read and understand. Even more importantly, the content should be meaningful. Students do much better when they understand why biology is relevant to their everyday lives. For these reasons, Concepts of Biology is grounded on an evolutionary basis and includes exciting features that highlight careers in the biological sciences and everyday applications of the concepts at hand. We also strive to show the interconnectedness of topics within this extremely broad discipline. In order to meet the needs of today's instructors and students, we maintain the overall organization and coverage found in most syllabi for this course. A strength of Concepts of Biology is that instructors can customize the book, adapting it to the approach that works best in their classroom. Concepts of Biology also includes an innovative art program that incorporates critical thinking and clicker questions to help students understand--and apply--key concepts.

A Wrinkle in Time

Life on an Ocean Planet

Cecie Starr is the most successful author in non-majors biology because of her clear and engaging writing, trend-setting art, and unparalleled media. BIOLOGY TODAY AND TOMORROW, her most concise text, provides a precise, issues-oriented approach and solves some of the toughest course challenges: engaging students, linking concepts from chapter to chapter, easily monitoring students' progress and simplifying lecture prep. Show students how biology matters: opening each chapter with engaging essays on hot issues and related online voting, the text highlights the connections between biology and real-life. Online exercises promote critical thinking about issues students will face as consumers, parents and citizens. Link concepts from chapter to chapter: since students have a difficult time linking concepts, the authors created a new linking tool. A list at the start of each chapter reminds students of related topics that were explained earlier. Within chapters, a key icon identifies cross-references to relevant sections in earlier chapters. As students work through the text, they see how topics build upon one another. Monitor students' progress with ease: BiologyNow™ offers diagnostic quizzes with automatically graded results that flow directly into your instructor grade book (iLrn, WebCT or BlackBoard). And, to assess students' progress instantly with in-class quizzes and polls, you can use JoinIn on TurningPoint content and software. Enjoy easier lecture prep: The new PowerLecture tool integrates all electronic chapter assets - art, photos, animations, videos, links to InfoTrac articles, web links, bulleted text slides, and everything else you need into each chapter's lecture slides. This buffet of media resources-arranged by chapter section-is at your fingertips. A Wrinkle in Time is the winner of the 1963 Newbery Medal. It was a dark and stormy night—Meg Murry, her small brother

Charles Wallace, and her mother had come down to the kitchen for a midnight snack when they were upset by the arrival of a most disturbing stranger. "Wild nights are my glory," the unearthly stranger told them. "I just got caught in a downdraft and blown off course. Let me sit down for a moment, and then I'll be on my way. Speaking of ways, by the way, there is such a thing as a tesseract." A tesseract (in case the reader doesn't know) is a wrinkle in time. To tell more would rob the reader of the enjoyment of Miss L'Engle's unusual book. *A Wrinkle in Time*, winner of the Newbery Medal in 1963, is the story of the adventures in space and time of Meg, Charles Wallace, and Calvin O'Keefe (athlete, student, and one of the most popular boys in high school). They are in search of Meg's father, a scientist who disappeared while engaged in secret work for the government on the tesseract problem.

Living in the Environment

FOUNDATIONS OF ASTRONOMY brings science to life. With this newly revised Eleventh Edition of FOUNDATIONS OF ASTRONOMY, best-selling authors Mike Seeds and Dana Backman strive to help students use astronomy to understand science--and use science to understand what we are. Fascinating, engaging, and extremely visual, this text emphasizes the scientific method throughout as it guides students to answer two fundamental questions: What are we? And how do we know? In discussing the interplay between evidence and hypothesis, the authors provide not only fact but also a conceptual framework for understanding the logic of science. The Eleventh Edition addresses the newest developments and latest discoveries in the exciting study of astronomy, including information to emphasize observations over the entire electromagnetic spectrum; new data on star formation and stellar structure; new insight on global warming and ozone depletion; updated information on the Kuiper belt and dwarf planets; and more. Whether you choose to assign homework in an online environment, give your students access to an affordable and interactive online text, or do both, the new FOUNDATIONS OF ASTRONOMY Online Version is the ideal solution for your course needs, giving your students Web-based access to a digital version of the text. In addition, the new online Enhanced WebAssign homework management system enables you to easily assign and manage homework online.
