skeet target and how shooters perceive it Methods for teaching beginners and coaching advanced shooters Graphs showing the angular velocity of the bird and the best lead at each station Skeet is easy, if you're happy breaking nine out of ten birds. But if you want to shoot 100 straight, this manual can help you achieve that goal. Since even excellent shooters tend to overlook many basic details, Mastering Skeet emphasizes fundamental techniques that will greatly improve your precision and consistency. Master Instructor King Heiple addresses various shooting methods, describes proper form, and advises on stance, posture, and balance, gun mount, foot position, pivoting, and follow-through. A complete examination of individual stations highlights common errors for each shot and gives suggestions for correcting them. Whether you're an experienced shooter looking for an extra edge or a beginner who wants to learn the basics of good technique, Mastering Skeet covers the full range of material necessary for success.

the 2014 Distinguished Publication Award (DPA) from the Association for Women in Psychology (AWP)\* Successful Qualitative Research: A Practical Guide for Beginners is an accessible, practical textbook. It sidesteps detailed theoretical discussion in favour of providing a comprehensive overview of strategic tips and skills for starting and completing successful qualitative research. Uniquely, the authors provide a 'patterns framework' to qualitative data analysis in this book, also known as 'thematic analysis'. The authors walk you through a basic thematic approach, and compare and contrast this with other approaches. This discussion of commonalities, explaining why and when each method should be used, and in the context of looking at patterns, will provide you with complete confidence for your qualitative research journey. Key features of this textbook: Full of useful tips and strategies for successful qualitative work, for example considering the nervous student not just the beginner student. Skills-based, utilising a range of pedagogical features to encourage you to apply particular techniques and learn from your experience. The authors use the same dataset throughout - reproduced in full (with associated research materials) on the companion website - to help you make comparisons across different analytical approaches. A comprehensive suite of student support materials, including practice exam questions, can be found online at [www.sagepub.com/braunandclarke](http://www.sagepub.com/braunandclarke). For the five local beats—cops, courts, emergencies, schools, and government—you'll learn where to go for information and how to organize and present the stories your neighbors want and need. An overview of tools and techniques include tips on how to find sources, conduct interviews, work with editors, tap the power of the crowd and think multimedia. Then, for each beat, you'll get specifics on: People: The best official and unofficial sources of info, and what to ask them. Places: Where to go on the beat, and what to look for while you're there. Documents: Where to find records in offices and online, how to decipher and use them. Stories: Overview of common story types and how to go beyond them. Resources: Glossary of key terms, checklists, helpful web links.
