In this paradigm-shattering book, leading behavioural economist and food psychologist Brian Wansink - dubbed the 'Sherlock Holmes of food' and the 'wizard of why' - offers a radical new philosophy for weight loss. The answer isn't to tell people what to do: it's to set up their living environments so that they will naturally lose weight. Using cutting-edge, never-before-seen research from his acclaimed Food and Brand Lab at Cornell University, Wansink reveals how innovative and inexpensive design changes - from home kitchens to restaurants, from grocery stores to schools and workplaces - can make it mindlessly easy for people to eat healthier and make it more profitable for the companies who sell the food. In Slim by Design, Wansink argues that the easiest, quickest and most natural way to reverse weight gain is to work with human nature, not against it. He demonstrates how schools can nudge kids to take an apple instead of a cookie, how restaurants can increase profits by selling half-size portions, how supermarkets can double the amount of fruits and vegetables they sell, and how anyone can cut plate refills at home by more than a third. Interweaving drawings, charts, floor plans and scorecards with new scientific studies and compelling insights that will make you view your surroundings in an entirely fresh way, this entertaining, eye-opening book offers practical solutions for changing your everyday environment to make you, your family and even your community slim by design.

Provides a thorough foundation for understanding drawings and concepts related to electrical printreading and includes

important changes that appear in the 2017 National Electrical Code as they pertain to one-family dwellings, multifamily dwellings, commercial locations, industrial locations, special equipment, and hazardous locations. Electrical plans are used in conjunction with NEC requirements to familiarize the learner with standards that promote industry best practices. This informative textbook serves as both an instructional tool and a valuable technical reference for professionals in the field.

### **Max Meets the Mayor**

This is the fourth edition of the classic text for students of urban and regional planning. It gives a historical overview of the developments and changes in the theory and practice of planning, throughout the entire twentieth century. This extensively revised edition follows the successful format of previous editions. Specific reference is made to the most important British developments in recent times, including the devolution of Scotland, Wales and Northern Ireland, the establishment of the Mayor of London and the dominant urban sustainability paradigm. Planning in Western Europe, since 1945, now incorporates new material on EU-wide issues as well as updated country specific sections. Planning in the United States since 1945, now discusses the continuing trends of urban dispersal and social polarisation, as well as initiatives in land use planning and transportation policies. The book looks at the nature of the planning process at the end of the twentieth century and looks forward to the twenty-first century.

THE MACHINE AGE After the apparent death of James T. Kirk on the U.S.S. Enterpris NCC-1701-B, Montgomery Scott decides to leave Starfleet. A chance encounter with a mysterious woman named Guinan leads him to hitch a ride on the U.S.S. Jenolen -- which crashes into a Dyson Sphere, leaving only Scotty to survive suspended as a transporter pattern. Seventy-five years later, he is revived aboard the Enterprise-D -- on which Guinan serves as bartender. But fate has not finished with either Scotty or Guinan. The engineer hatches an audacious plan to travel back in time and rescue Jim Kirk the moment before he would vanish into the nexus and bring him back to the twenty-fourth century without damaging the timeline. Scotty's plan, however, does not go as expected. Though Kirk is rescued, the famed captain and the engineer, as well as Captain Picard, Guinan, and the crew of the Enterprise-D, are trapped in an altered past where there is no Federation, and no human race. Sarek of Vulcan leads a ragtag collection of species fighting a losing battle against the Borg, who have swarmed into the Alpha Quadrant and assimilated Earth. Starfleet's finest miracle worker must find a way to restore the timeline before the galaxy is overrun.

J. M. Adovasio has spent the last thirty years at the center of one of our most fiery scientific debates: Who were the first humans in the Americas, and how and when did they get there? At its heart, *The First Americans* is the story of the revolution in thinking that Adovasio and his fellow archaeologists have brought about, and the firestorm it has ignited. As he writes, "The work of lifetimes has been put at risk, reputations have been damaged, an astounding amount of silliness and even profound stupidity has been taken as serious thought, and always lurking in the background of all the argumentation and gnashing of tenets has been the question of whether the field of archaeology can ever be pursued as a science."
