Every parent wants the best for their child. That's why they send them to college! But most parents struggle to pay for school and end up turning to student loans. That's why the majority of graduates walk away with \$35,000 in student loan debt and no clue what that debt will really cost them.¹ Student loan debt doesn't open doors for young adults—it closes them. They postpone getting married and starting a family. That debt even takes away their freedom to pursue their dreams. But there is a different way. Going to college without student loans is possible! In Debt-Free Degree, Anthony O'Neal teaches parents how to get their child through school without debt, even if they haven't saved for it. He also shows parents: *How to prepare their child for college *Which classes to take in high school *How and when to take the ACT and SAT *The right way to do college visits *How to choose a major A college education is supposed to prepare a graduate for their future, not rob them of their paycheck and freedom for decades. Debt-Free Degree shows parents how to pay cash for college and set their child up to succeed for life.

WALL STREET JOURNAL BESTSELLER “An incredible, compelling read. It covers an astonishing amount of ground with basic simplicity and good humor. A masterful starting point for any investor. Tina Hay is a wizard.”—Ben Stein, economist, actor, and commentator A handy crash course in personal finance, Napkin Finance is the groundbreaking guide everyone needs to help them manage their money and feel more secure. Surveys have found that two thirds of Americans can't pass a basic financial literacy test, and nine in ten believe personal finance should become a required high school course. Tina Hay understands the confusion. While attending Harvard Business School, she struggled to keep up with classmates—many of whom came from the banking world—when it came to understanding jargon and numbers-heavy concepts. Tina developed a visual learning strategy using sketches and infographics that helped her succeed in her studies and master even the most complex financial topics. Since then, Tina founded Napkin Finance, a thriving company built on the concept of taking seemingly overwhelming topics—such as budgeting, investments, and retirement accounts—and turning them into simple, skimmable explanations. Now, she's synthesized the most important content into this personal finance handbook. Napkin Finance includes dozens of individual learning modules, on topics ranging from credit scores to paying off student loans to economics and blockchain. The first illustrated guide that makes finance fun and accessible, Napkin Finance can help even the most numbers-phobic reader learn about complex financial topics without dying of boredom.
