Visualizing Technical Information: A Cultural Critique demonstrates the ways in which the leading technical visuals of information design - graphs, charts, diagrams, tables, illustrations, and information visualization - are designed and read. Using genre theory as an analytical tool, the author makes the argument that problems with these visual forms are not necessarily the result of a designer's poor decisions or a reader's poor decisions or a reader's poor interpretation skills. Instead, there may be inherent problems in the visual genres themselves that are a direct result of their cultural history and current use. In presenting this argument, Visualizing Technical Information breaks new ground in bringing issues of culture and theory into the foreground as the key to many of the problems associated with information design. The author critiques the influences of Cartesian-based thinking, mathematical approaches, and logic-based methods to problem solving and a reliance on perceptual-based visual abstractions.

Manual of Cancer Treatment Recovery presents the first comprehensive program to guide the recovery from cancer and its treatment. The Manual helps you, other practitioners, and your staff members plan early intervention and promote healing right from the start, before distressing symptoms begin. Manual of Cancer Treatment Recovery teaches how to guide patients and families in setting up a simple plan that minimizes treatment's unwanted effects, how to coordinate with other clinicians involved in the patient's management; and how to develop a directed survivorship program in your practice. Divided into three sections, the book covers what everyone needs to know about survivorship, how to implement effective and enduring care, and how to work with patients utilizing The LEARN System (Living, Education, Activity, Rest, Nutrition) that Dr. Fleishman developed. Manual also includes easy-to-use forms that patients may complete even before the initial consultation and post-treatment survivorship care plans for primary care providers. Whether used independently or in conjunction with Dr. Fleishman's patient-focused companion book *Learn to Live Through Cancer*, the Manual of Cancer Treatment Recovery enables the oncology care team to anticipate patient and family needs even before they arise. The Manual will help you to: Organize recovery plans during treatment to improve quality of life Develop an innovative system to minimize loss of vital energy, lean body mass, and distress before they happen Develop a survivorship program for your practice Coordinate oncology care with specialists and primary care providers Integrate end-of-life issues into the care trajectory Improve patient care during and after treatment Nurture your patients' recovery preventively and systematically

Preconception: Improve Your Health and Enhance Fertility

Baby car seats are absolutely essential for safely transporting your infant in a vehicle. In fact, it is a legal matter in many places. However, there are literally tons of car seats to choose from, and it can be a daunting task for new parents. Choosing a baby car seat that was made by an unreliable brand can have disastrous results. In the same token, choosing a car seat that was produced by a reputable brand can definitely save your baby's life in the unfortunate event of a car crash. With all of that being said, you should definitely educate yourself before buying a car seat. This ebook is the perfect tool for educating yourself in that matter, whether you are a first time parent or have just had your seventh child.
