how to use design thinking to radically improve the way you scope opportunities, and integrate opportunity development into a complete innovation framework that works. Design Process and Opportunity Development is part of Philadelphia University's breakthrough approach to innovation: one that links business, design and engineering, and delivers extraordinary results in both new and existing ventures. First, Dr. Stephen Spinelli and Heather McGowan introduce this "Disrupt Together" approach, explain its deep roots in design thinking, and show how it generates far more high-value ideas for innovation. Next, Tod Corlett drills down to focus specifically on using team-based design thinking to clarify your challenges, articulate your value propositions, and reach new markets. You'll learn why design processes are so well-suited to today's fast-moving world of diverse teams, accelerated product life cycles, disruptive innovation, and social media – and how to apply them in your environment. Corlett shows how to rapidly iterate and improve your ideas... use helical thinking to move forward, not "in circles"... and use funnels to consistently select your best conceptual options. Design Process and Opportunity Development is one of 15 e-chapters addressing all facets of innovation, from design processes and team development to business models and value delivery. Each is crafted by a pioneering business innovator – and they all integrate into today's most coherent, realistic blueprint for innovation. For all entrepreneurs, executives, managers, strategists, and students who want to drive more value from innovation. Artificial intelligence (AI) offers computational methodologies for modeling systems, which can be valuable in understanding networks. In this chapter, the author examines several types of applications of these methods in exploring how the behavior of individual agents leads to outcomes across networks. For example, he considers how one system, based on a Prisoner's Dilemma that provides a higher payoff for players who don't cooperate, can result in a surprising outcome in which cooperation dominates after many rounds of play. He also considers agent-

based models--including turtles in a pond, showing discrimination effects; and sugar and spice trading, showing interactions through trading. Finally, he explores applications to ant colony optimization and swarming optimization of flocks of birds or schools of fish. He concludes that computational models offer important insights into networks, and the procedures used in modeling have a significant impact. The discussion also demonstrates that “networks matter,” affecting outcomes in sometimes unpredictable ways.

“A triumph of storytelling. Henríquez pulls us into the lives of her characters with such mastery that we hang on to them just as fiercely as they hang on to one another and their dreams. This passionate, powerful novel will stay with you long after you’ve turned the final page.” —Ben Fountain, author of *Billy Lynn’s Long Halftime Walk* A boy and a girl who fall in love. Two families whose hopes collide with destiny. An extraordinary novel that offers a resonant new definition of what it means to be American. Arturo and Alma Rivera have lived their whole lives in Mexico. One day, their beautiful fifteen-year-old daughter, Maribel, sustains a terrible injury, one that casts doubt on whether she’ll ever be the same. And so, leaving all they have behind, the Riveras come to America with a single dream: that in this country of great opportunity and resources, Maribel can get better. When Mayor Toro, whose family is from Panama, sees Maribel in a Dollar Tree store, it is love at first sight. It’s also the beginning of a friendship between the Rivera and Toro families, whose web of guilt and love and responsibility is at this novel’s core. Woven into their stories are the testimonials of men and women who have come to the United States from all over Latin America. Their journeys and

Please contact me via email at Michael.Pidwirny@ubc.ca if you would like to have access to these resources. The various chapters of the Google Play version of Understanding Physical Geography are FREE for individual use in a non-classroom environment. This has been done to support life long learning. However, the content of Understanding Physical Geography is NOT FREE for use in college and university courses in countries that have a per capita GDP over \$25,000 (US dollars) per year where more than three chapters are being used in the teaching of a course. More specifically, for university and college instructors using this work in such wealthier countries, in a credit-based course where a tuition fee is accessed, students should be instructed to purchase the paid version of this content on Google Play which is organized as one of six Parts (organized chapters). The cost of these Parts works out to only \$0.99 per chapter in USA dollars, a very small fee for my work. When the entire textbook (30 chapters) is finished its cost will be only \$29.70 in USA dollars. This is far less expensive than similar textbooks from major academic publishing companies whose eBook are around \$60.00 to \$90.00. Further, revenue generated from the sale of this academic textbook will provide “the carrot” to entice me to continue working hard creating new and updated content. Thanks in advance to instructors and students who abide by these conditions. **IMPORTANT** - This Google Play version is best viewed with a computer using Google Chrome, Firefox or Apple Safari browsers.

The European Union interest group population is often characterised as being biased towards business and detached from its constituency base. Many scholars attribute this to institutional factors unique to the EU. Yet, assessing whether or not the EU is indeed unique in this regard requires a comparative research design. We compare the EU interest group population with those in four member states: France, Great Britain, Germany and the Netherlands. We differentiate system, policy domain and organisational factors and examine their effects on interest group diversity. Our results show that the EU interest system is not more biased towards the representation of business interests than the other systems. Moreover, EU interest organisations are not more detached from their constituents than those in the studied countries. Everywhere, business interest

associations seem to be better capable of representing their members' interests than civil society groups. These findings suggest that the EU is less of a sui generis system than commonly assumed and imply the need for more fine-grained analyses of interest group diversity.

the Roman Empire, money changers set up shop in courtyards where they conducted their business on a long bench called a *bancu*. In Renaissance Florence, business loans were made across a *banco*, a desk covered by a green cloth. So it was inevitable that the builders of the echoing 19th century marble temples to Mammon, intent on awing the public as well as their commercial clients, would call their edifices “banks.” And if any single word described the banking process in those days, it was “static.” Bankers were set in their ways. The 20th century ushered in change that shook up the bankers’ world. Technology in the form of wire transfers, telephone banking, and the ATM transformed many of the “hows” in the industry. Banks began to shed their awesome trappings, woo their customers, and imitate retail stores. Then, in the new millennium, still another shock wave rippled across traditional banking operations in the United States: It was called ING DIRECT USA, an online bank that had rethought its business, deciding to put aside the “hows” and, instead, focus obsessively on the rapid shift in the “whats” that had become most valuable to customers. This revolutionary bank has become a role model for creative cost-cutting and significant innovation. Based in Wilmington, Delaware, ING DIRECT USA is a division of the Dutch conglomerate ING Groep NV, an insurance and banking colossus. ING DIRECT, launched in September 2000 by its chairman, president, and CEO Arkadi Kuhlmann. To continue reading, purchase and download now.
