### **Encyclopedia of Evaluation**

According to the IAPP, candidates seeking their IAPP privacy certification must pass the MC based Certification Foundation exam which covers elementary concepts of privacy and data protection from a global perspective. Online Privacy: Using Personal Information on Websites and with Other Internet-related Technologies After this exam the next step is to take the CIPP/US exam or the CIPP/E exam, both of which have a lot of legal topics. It is our opinion that you need to possess both technical knowledge and legal knowledge in order to succeed. When we develop our material we do not classify topics the official way. In fact, we follow our own flow of instructions which we think is more logical for the overall learning process. Don't worry, it does not hurt to do so, as long as you truly comprehend the material. For the EU specialization, the focus of this book is on the various EU laws and regulations. To succeed in the exam, you need to read as many reference books as possible. There is no single book that can cover everything!

This ExamFOCUS book focuses on the more difficult topics that will likely make a difference in exam results. The book is NOT intended to guide you through every single official topic. The book is also NOT an introductory guide to privacy text. You should therefore use this book together with other reference books for the best possible preparation outcome.

Futurist Gerd Leonhard breaks new ground again by bringing together mankind's urge to upgrade and automate everything-down to human biology itself-with our timeless quest for freedom and happiness. Before it's too late, we must stop and ask the big

questions: How do we embrace technology without becoming it? When it happens-gradually, then suddenly-the machine era will create the greatest watershed in human life on Earth. Technology vs. Humanity is one of the last moral maps we'll get as humanity enters the Jurassic Park of Big Tech. Artificial intelligence. Cognitive computing. The Singularity. Digital obesity. Printed food. The Internet of Things. The death of privacy. The end of work-as-we-know-it, and radical longevity: The imminent clash between technology and humanity is already rushing towards us. What moral values are you prepared to stand up for-before being human alters its meaning forever? Gerd Leonhard is a new kind of futurist schooled in the humanities as much as in technology. In his most provocative book to date, he explores the exponential changes swamping our societies, providing rich insights and deep wisdom for business leaders, professionals and anyone with decisions to make in this new era. If you take being human for granted, press Reset now with this passionately argued call to create a genuinely braver new world.
