WJEC Level 3 Applied Certificate & Diploma Criminology

This important new text introduces conservation criminology as the interdisciplinary study of environmental exploitation and risks at the intersection of human and natural systems. Taking an interdisciplinary approach, the book enhances understanding of the various human and organizational behaviors that pose risks to the environment, humans, and drive conservation crime. As human population growth, global market economies, climate change, deforestation, and illegal exploitation of natural resources continue to increase, academic research from numerous disciplines is needed to address these challenges. Conservation Criminology promotes thinking about how unsustainable natural resources exploitation is a cause and a consequence of social conflict. Case studies profiled in the book demonstrate this cause and effect type situation, as well as innovative approaches for reducing risks to people and the environment. This text encourages readers to consider how humans behave in response to environmental risks and the various mechanisms that constitute effective and ineffective approaches to

enforcement of wildlife crimes, including environmental and conservation policy. Case studies from the USA, Latin America, Africa, and Asia highlight corruption in conservation, global trade in electronic waste, illegal fishing, illegal logging, human-wildlife conflict, technology and space, water insecurity, wildlife disease, and wildlife poaching. Taken together, chapters expand the reader's perspective and employ tools to understand and address environmental crimes and risks, and to provide novel empirical evidence for positive change. With established contributors providing interdisciplinary and global perspectives, this book establishes a foundation for the emerging field of conservation criminology.

In *Causes of Delinquency*, Hirschi attempts to state and test a theory of delinquency, seeing in the delinquent a person relatively free of the intimate attachments, the aspirations, and the moral beliefs that bind most people to a life within the law. In prominent alternative theories, the delinquent appears either as a frustrated striver forced into delinquency by his acceptance of the goals common to us all, or as an innocent foreigner attempting to obey the rules of a society that is not in position to make the law or define conduct as good or evil. Hirschi analyzes a large body of data on delinquency collected in Western Contra Costa County, California, contrasting throughout the assumptions of the strain, control, and cultural deviance theories. He outlines the assumptions of these theories and discusses the

logical and empirical difficulties attributed to each of them. Then draws from sources an outline of social control theory, the theory that informs the subsequent analysis and which is advocated here. Often listed as a Citation Classic, Causes of Delinquency retains its force and cogency with age. It is an important volume and a necessary addition to the libraries of sociologists, criminologists, scholars and students in the area of delinquency.

Introduction to Criminology

Travis Hirschi is one of the most cited criminologists of the twentieth century. His work has provoked controversy and heated debates about the causes of crime, proper research methods, and the most effective policies to prevent and control crime. Known as a spokesperson for social control theory, Hirschi always ties his ideas to the mode of investigation and the mode of investigation to substantive concerns. Theoretical contributions and research methodology have been twin driving forces throughout his career. This book contains representative selections of Hirschi's work over many years. It is remarkable how little is known about Hirschi's life and career. John H. Laub's introduction combines a discerning account of Hirschi's life and work, accompanied by an interview with the author. Laub's volume covers various topics: methodological issues; principles of causal analysis; criteria of causality; longitudinal research on crime; rules and the study of deviant behavior; correlations between crime and delinquency; control theory of delinquency; intelligence, causes, and prevention of delinquency; family structure and crime; theory of crime; crime and criminality; deviance; white collar crime; and juvenile justice systems. Now available in paperback, this is an invaluable text for courses in criminology, as well as a valuable addition to professional libraries.
