The Singapore Convention on Mediation

This widely-adopted, all-original book was the first in the field to combine complete analysis of the mediation process with integrated video case studies illustrating the full range of mediation skills. Engaging text is keyed to seven hours of online video, featuring three different cases, all based on actual disputes: a child custody case, a small claims consumer dispute, and a complex negligence suit. These unscripted mediations were conducted by mediators and lawyers with a variety of backgrounds and styles. The video includes an extended comparative example of facilitative and evaluative mediation of the same matter. The integration of text and video in *The Practice of Mediation: A Video-Integrated Text, Third Edition* enriches students' understanding and allows classroom and clinical instruction to proceed more rapidly and on a far more sophisticated level. New to the Third Edition: New end-of-chapter problems to aid assessment of student learning New or expanded coverage of biases and their impact on negotiators; pre-mediation contacts with parties; and increasing mediator use of caucuses to open the process Newly designed problems on the ethics of mediating New video clips on mediator influence and persuasion Professors and students will benefit from: Practice- and research-based analysis of negotiations and why they fail Contextualized model of the role and effective skills of the mediator, applicable across the entire range of disputes Exploration of fundamental norms of the process and, through real case problems, the ethics of mediating Video and case-based introduction to the role

and skills of representing a client in mediation

AALS Mini-workshop on Alternative Dispute Resolution

Election administration is essential to the proper functioning of our democracy. The American Law Institute's first Principles in this area focuses on two areas of great importance: non-precinct voting and the resolution of disputed elections. Part I provides principles for use by jurisdictions that wish to use absentee-voting or early-voting options as a supplement to in-person precinct-based voting on Election Day. Part II concerns principles applicable to disputed elections generally, while Part III specifically concerns procedures necessary for disputed presidential elections given their uniquely challenging scheduling constraints.

In recent years the mediation movement has seen tremendous growth with significant advances being made in both research and practice. Despite these advances, researchers and practitioners have remained relatively isolated from one another. Bridging the gap, COMMUNITY MEDIATION is dedicated to the mutual education of both researchers and mediators. It makes the findings of research accessible to practitioners and the issues of concern to practice available to researchers. Thus, this handbook affords researchers an excellent opportunity to learn more about actual techniques and enables practitioners to benefit from the latest research in the field.
