Employment Survey of the Alumni of Delhi University

Race against Empire

Marshaling evidence from a wide array of international sources, including the black presses of the time, Penny M. Von Eschen offers a vivid portrayal of the African diaspora in its international heyday, from the 1945 Manchester Pan-African Congress to early cooperation with the United Nations. Tracing the relationship between transformations in anti-colonial politics and the history of the United States during its emergence as the dominant world power, she challenges bipolar Cold War paradigms. She documents the efforts of African-American political leaders, intellectuals, and journalists who forcefully promoted anti-colonial politics and critiqued U.S. foreign policy. The eclipse of anti-colonial politics—which Von Eschen traces through African-American responses to the early Cold War, U.S. government prosecution of black American anti-colonial activists, and State Department initiatives in Africa—marked a change in the very meaning of race and racism in America from historical and international issues to psychological and domestic ones. She concludes that the collision of anti-colonialism with Cold War liberalism illuminates conflicts central to the reshaping of America; the definition of political, economic, and civil rights; and the question of who, in America and across the globe, is to have access to these rights.

Principles Of Economics (For Delhi University B.Com Pass Course)

Introductory Macroeconomics

This paper reviews the accuracy of the OECD Economic Outlook projections -- both "current year" and "year ahead"--For output growth, inflation and current account balances (as a percentage of GDP) for the major seven countries, as well as projections for world trade growth. The sample period differs somewhat between the variables, depending on data availability, but it runs until 1998 in all cases. Several evaluation criteria were used to assess the accuracy of the OECD Economic Outlook projections. These include an inspection of projection error summary statistics; comparisons with "naive" alternative forecasts; statistical tests for unbiasedness and efficiency; and testing for directional accuracy. In addition, the paper provides an examination of the performance of OECD Economic Outlook projections over different time periods. The findings suggest that, on the basis of the conventional statistical criteria, the current year projections outperform the year ahead projections
