High-stakes accountability and the growing move towards standardized testing are placing teacher knowledge and assessment skills under ever-increasing scrutiny. Teachers know what is going on in their classrooms and have first-hand reliable evidence of what their students can accomplish. They can be the major factor in

student assessment and help their students better demonstrate what they have learned. Smart Tests shows educators how to create well-structured evaluation tools that match assessment tasks to the purpose and content of instruction. Teachers learn how to relate testing directly to classroom goals and activities and make assessment an integral part of learning and teaching, not just the end result. They will find the information they need to build assessment tasks that give students in grades K-8 the opportunity to succeed. These tasks encourage students to apply new knowledge, reflect and defend their thoughts and opinions, and connect what they learn the world beyond the classroom.

We have a tendency today to over-parent, micro-manage, and under-appreciate our adolescents. Dr. John Duffy's *The Available Parent* is a revolutionary approach to taking care of teens and tweens. Teenagers are often left feeling unheard and misunderstood, and parents are left feeling bewildered by the changes in their child at adolescence and their sudden lack of effectiveness as parents. The parent has become unavailable, the teen responds in kind, and a negative, often destructive cycle of communication begins. The available parent of a teenager is open to discussion, offering advice and solutions, but not insisting on them. He allows his child to make some mistakes, setting limits, primarily where health and safety are concerned. He never lectures -- he is available but not controlling. He is neither cruel nor dismissive, ever. The available parent is fun and funny, and can bring levity to the most stressful situation. All of that is to say, there are no conditions to his availability -- it is absolute.

Doing Their Best

There are many reasons to be curious about the way people learn, and the past several decades have seen an explosion of research that has important implications for individual learning, schooling, workforce training, and policy. In 2000, *How People Learn: Brain, Mind, Experience, and School: Expanded Edition* was published and its influence has been wide and deep. The report summarized insights on the nature of learning in school-aged children; described principles for the design of effective learning environments; and provided examples of how that could be implemented in the classroom. Since then, researchers have continued to investigate the nature of learning and have generated new findings related to the

neurological processes involved in learning, individual and cultural variability related to learning, and educational technologies. In addition to expanding scientific understanding of the mechanisms of learning and how the brain adapts throughout the lifespan, there have been important discoveries about influences on learning, particularly sociocultural factors and the structure of learning environments. *How People Learn II: Learners, Contexts, and Cultures* provides a much-needed update incorporating insights gained from this research over the past decade. The book expands on the foundation laid out in the 2000 report and takes an in-depth look at the constellation of influences that affect individual learning. *How People Learn II* will become an indispensable resource to understand learning throughout the lifespan for educators of students and adults.

Literacy lies at the heart of student understanding and achievement. Yet too many educators mistakenly assume that the reading, writing, speaking, and thinking skills that students developed in elementary school are sufficient for the sophisticated learning tasks they face in middle and high school. The result? Disappointing test scores, high dropout rates, and students unprepared for higher education, citizenship, and the world of work. Taking Action on Adolescent Literacy: An Implementation Guide for School Leaders presents a structured approach to using literacy as a lever for overall school improvement. Literacy instruction is not an "add-on," authors Judith L. Irvin, Julie Meltzer, and Melinda Dukes insist; it's an ongoing essential. All adolescent students, no matter what their level of achievement, can benefit from direct instruction in reading, writing, speaking, and thinking. And all secondary school leaders can improve students' literacy and learning by following the five action steps outlined in this book: (1) develop and implement a literacy action plan, (2) support teachers to improve literacy instruction, (3) use data to make curricular decisions, (4) build capacity for shared leadership, and (5) creatively allocate resources to support the literacy plan. The book also offers strategies to help educators integrate literacy and learning across the content areas, provide targeted interventions for students who are struggling the most, and develop a supportive school environment that involves parents, community members, and district leaders. Practical tools, helpful resources, and vignettes based on the authors' extensive work in school districts nationwide make this an indispensable guide for principals, central office administrators, literacy

coaches, department chairs, and other school leaders committed to helping students succeed.

Author Harvey Marshall gleaned great thoughts, ideas, and inspiration while reading the Bible, and he wanted to share what he found with others. At first, he texted the encouraging words he learned by cell phone. Then, he sent them via e-mail, and finally he created a website with which to share the good news. In "Promises to Confess to," Marshall shares these lessons, gleaned from Scripture readings, and discusses the meanings behind the encouraging words and the promises from God that are a part of the Bible's message. He follows each short inspiration with a confession or prayer that relates to the discussion. "Promises to Confess to" provides a lens through which to look at God and to appreciate the many colors that his glory has allowed to fall upon the earth.

Saunders Q&A Review for the NCLEX-RN® Examination E-Book

"Parents who are perplexed about what they can do to inspire and encourage their children to earn good grades without power struggles want answers to tough, everyday dilemmas. What best motivates various personalities and why? How much is too much homework for any child? How many outside activities are too much or too little? Do more activities actually do more harm than good? This book answers these and many more questions, showing parents that approaching problems as a team is the best way to ensure their child's success. It also stresses putting academics first and helps readers develop effective motivational strategies such as role-playing, setting specific goals, and establishing an environment that respects and rewards good grades. This book presents information in direct nonacademic and nonmedical terminology and encourages parents to leave the perfect child syndrome behind."

As a writer, I know that words are important at the beginning of any creative process; they become the tools used to convey ideas—to paint a picture that holds relevance and meaning to the reader and hopefully finds a home in their heart. Between the covers of this book are many words which are intended to offer you encouragement, irrespective of who you are or where you are on this sometimes challenging, sometimes confusing, sometimes exhilarating journey we call life. My personal vision is “Guiding People to Purpose.” It is my belief that we each have a purpose for being on this planet or we would not be here; we all matter. In this book you will find a compilation of articles I have been privileged to write for Science of Mind magazine, as well as a number of essays I have written as blogs over the years. As you read these articles and essays, may you be open to receiving the love and respect intended in each one. The content of this book is innately spiritual, and meant to be so, because that is what you are—a spiritual being having a human experience. When it is time for you to return to the place of your spiritual origin you will be asked two questions: Did you learn to love well . . . and, is the planet a better place today than it was the day you arrived because you were there? As you read this book, may the answer to these questions become a litmus test for the balance of your life that encourages you to live an exquisite, fulfilling life. Know that who you are and—equally important—what you do with who you are, matter.
