### Altruism, Narcissism, Comity

A tutorial introducing Java basics covers programming principles, integrating applets with Web applications, and using threads, arrays, and sockets.

### **Power, Process and Participation**

How does the sense of basic fairness--or selflessness versus selfishness--arise? How is it exhibited behaviorally? How is it maintained? Few topics hold more contemporary significance or have proved more elusive to specification in precise scientific terms. Current research perspectives on altruism, narcissism, and comity by distinguished behavioral scientists from around the world were brought together in a special issue of *Current Psychology* (Summer 1998) and are offered here in a useful compendium. Chapters and contributors include: "Equity, Justice, and Altruism" by Graham F. Wagstaff; "Reactions to the Fate of One's Brainchild After Its Disclosure" by Sidney Rosen and Shannon Wheatman; "Need Norm, Demographic Influence, Social Role, and Justice Judgment" by Helen E. Linkey and Sheldon Alexander; "Adaptive and Maladaptive Narcissism" by Robert W. Hill and Greg Yousey; "Perceptions of Self-Oriented and Other-Oriented Help-Providers" by Mark A. Barnett, Guy D. Vitaglione, Jeffrey S. Bartel, Birgit S. Valdez, Lee Ann Steadman, and Kimberly K. G. Harper; and "Pathological Narcissism and Serial Homicide" by Louis B. Schlesinger. Altruism, Narcissism, Comity will benefit students, researchers, and practitioners in the psychological sciences, sociology, political science, philosophy, law, and other disciplines concerned with the nature of selflessness, heroism, justice, and their variants.

what has become known as the "sport compact"--smaller, lightweight, modern sports cars of predominantly Japanese manufacture. These cars respond well to performance modifications due to their light weight and technology-laden, high-revving engines. And by far, the most sought-after and modified cars are the Hondas and Acuras of the mid-'80s to the present. An extremely popular method of improving vehicle performance is a process known as engine swapping. Engine swapping consists of removing a more powerful engine from a better-equipped or more modern vehicle and installing it into your own. It is one of the most efficient and affordable methods of improving your vehicle's performance. This book covers in detail all the most popular performance swaps for Honda Civic, Accord, and Prelude as well as the Acura Integra. It includes vital information on electrics, fit, and drivetrain compatibility, design considerations, step-by-step instruction, and costs. This book is must-have for the Honda enthusiast.

A Unique, Relational Way for Women to Read the Bible in a Year Many women feel overwhelmed at the thought of reading the Bible in a year. Diane Stortz found that it is not only possible but life-changing. Her journey from initial reluctance to excitement about reading the Bible will inspire readers to try it for themselves. Part of a women's group that read through the Bible each year for ten years, the author discovered the value of reading the Bible to get to know God better rather than viewing it only as a book to study. This guide will give women tools to read and discuss the Bible together, drawing them closer to God and each other. Includes a week-by-week reading plan, discussion guide, lists of what to look for, and motivational quotes.

"Money matters are treated by civilized people in the same way as sexual matters--with the same inconsistency, prudishness, and hypocrisy. The analyst is therefore determined from the first not to fall in with this attitude, but, in his dealings with his patients, to treat money matters with the same matter-of-course frankness to which he wishes to educate them in things relating to sexual life."--Sigmund Freud, "On the Beginning of Treatment" (1913) It has been almost

eighty years since Freud wrote these lines, yet, money is still a disturbing topic. Therapists are often as uncomfortable as their clients discussing the fee, and this reticence can undermine the therapeutic relationship. Increasingly, it is recognized that money plays a key role in therapy and that it is necessary to clear the air about this ancient taboo. Breaking the silence, this book illuminates the problems of fee guilt and fee avoidance and proposes solutions based on a clarified understanding of what is therapeutic for all involved parties. Providing an overview of the issues, the book first examines the significance of the fee in the psychotherapeutic process and its paradoxical nature. The meaning of money and the philosophy of service for a fee is also discussed. Exploring patients' attitudes about the fee, chapters in the second section illustrate how it can operate as a barrier to entering or remaining in therapy. The relationship between the fee and changes in the patients' financial circumstances is discussed and examples of questions that commonly cause discomfort for therapists are presented.

has gripped believers for over two thousand years. The purpose of the book is to take an in-depth look at these four mysterious horsemen and show how their approach seems to be developing before our eyes, signaling the advent of that terrible seven years known as the Great Tribulation. The four horsemen are symbolic of great movements that will mark the onset of that climactic era in history. From the Trade Paperback edition.

### **Money Matters**

This book focuses on participatory capacity-building in ways that address the practical needs and strategic interests of the disadvantaged and disempowered - it examines how differences in class, ethnicity, race, caste, religion, age and gender lead to the 'politics of exclusion'. It offers innovative, accessible tools to enable facilitators from both inside and outside communities to empower those who are frequently omitted from decision-making processes. The style and approach are interactive, stimulating reflection and involvement by all parties. Power, Process and Participation aims to enable facilitators from inside and outside communities to involve and empower those commonly excluded in decision making processes. It provides a balanced overview of how 'participation' has been used in this context and raises the questions that all those involved in this type of activity should ask themselves. There are three distinct sections: Part 1: Definitions, history and issues - which provides an overview of some of the broad issues underlying the themes

addressed in this book. A useful brief history is given of well known participatory methodologies and key questions are asked on the use and misuse of 'participation': whose ends does it serve, who is involved and what are the power relations, appropriate time frames and scale and how should it proceed in order to best serve the interests of the people involved? Part 2: Methods and ethics in our research and our use of the media N251pp - Whose expertise counts? How is it acknowledged? These are explored in the context of contributors' experience of undertaking research with women in Zimbabwe. Questions of ownership and consent as well as other issues are discussed further in the context of the use of video in participatory communication. Part 3: Tools for environmental and social change - The longest section in the book gives 35 tools and how to use them in facilitating participation. An introductory session explains how to use the section. Tools are cross referenced and for each the purpose, materials, process and estimated time is provided. For a number of the tools, examples of how they have been used in practice are included. Power, Process and Participation describes itself as a manual and although it does not immediately look like one, it is readable, logically arranged and combines instructions on how tools can be used with examples of how they have been used in practice. There are notes on how to use the book and how to choose from the tools offered. This book would be useful to anyone looking for both an overview of participation and how it can be used and misused; and guidance on facilitating the process.
