"A very talented writer." —Sharon Kay Penman, NYT bestselling author of Devil's Brood England, 1044. Harold Godwineson, a young, respected Earl, falls in love with an ordinary but beautiful woman. He marries Edyth despite her lack of pedigree, pitting him against his turbulent family and his selfish King, Edward. In France, William, the bastard son of a duke, falls in love with power. Brutal and dangerously smart, William sets his sights on England, finding ambition a difficult lust to conquer. In 1066, with the old King Edward dying, England falls vulnerable to the winds of fate—and the stubborn will of these two powerful men. In this beautifully crafted tale, Helen Hollick sets aside the propaganda of the Norman Conquest and brings to life the English version of the story of the last Saxon King, revealing his tender love, determination, and proud loyalty, all shattered by the unforgiving needs of a Kingdom. Forced to give up his wife and risk his life for England, the chosen King led his army into the great Battle of Hastings in October 1066 with all the honor and dignity that history remembers of its fallen heroes. "A novel of enormous emotional powerHelen Hollick is a fabulous writer of historical fiction."
-Elizabeth Chadwick, author of To Defy a King What Readers Are Saying: "We all know the ending! But Helen Hollick's

masterful and moving account of Pre-Conquest England still carries the reader along on an enthralling journey to that moment it made me cry in all the right places. Helen Hollick is a consummate storyteller." "An epic work, grand and sweeping. I've read many versions of the events of 1066 but this is one of the best." Few American economists have exerted an international influence equal to that of Yale professor Irving Fisher (1867-1947) who excelled as a statistician, econometrician, mathematician, and pure theorist. Of his 18 published volumes on economics, those in monetary economics constitute his most enduring contribution; indeed much of Fisher's work on capital, interest, income, money, prices and business cycles has been incorporated into modern analyses. Of all his works, "The Theory of Interest" is especially significant; not only does it contain his celebrated theory in which the rate of interest is shown to be dependent upon all other elements involving productivity, time preference, risk and uncertainty, but also a strikingly original explanation of the broader capitalistic process.

A Treatise of Human Nature

The first book to explore the enigmatic emotion of AWE, based on the only-known study of its connection to the meaning of life 'Feeling suddenly elevated to the limits of indescribable delight, yet teetering on the edge of fear, we experience our rarest, most powerful, and least understood emotion: awe. It's an overwhelming and life-altering blend of fright and fascination that leaves us in a state of puzzled apprehension and appreciative perplexed wonder. If we go beyond a kind of ignorant distant voyeurism through which we gawk at life rather than fully engage with it and put in the effort to try to understand a little more about life's meaning, awe becomes less a feeling of being high and more a feeling of deep immersion in any and all of life's processes, including health, illness, love, and even death. It may not cause us to come to believe in something, but it can cause us to believe that there is something more beyond the grasp of our limited human consciousness. It can turn our stress into motivation for growth, solidify our commitment to our families as systems that can experience collective awe together, and help us find meaning, comprehensibility, and manageability at times of our most profound losses and even our own death.' —from *Awe: The Delights and Dangers of Our Eleventh Emotion* Lyrical, eye-opening, and highly perceptive with unexpected twists and turns as grand as awe itself, *Awe* is an invitation to leave our states of languishing and to flourish; however, the choice is ultimately yours as to what to do with your eleventh emotion, its delights and dangers, and what you choose to make of it.

The Wings of the Sphinx

Beginning in the early years of this century, Number 11 follows two friends, Alison and Rachel, as they come of age. As the narrative progresses from the aftermath of the Iraq War to the present day, its scope broadens to include others who are variously connected to these two girls: Alison's mother, a has-been singer, competes on a grisly reality TV show; Rachel's university mentor finally confronts her late husband's obsessive search for a German film he saw as a child; a young police constable investigates the seemingly unrelated deaths of two stand-up comedians; and a giant spider lurks in the darkness beneath one of London's most staggeringly expensive neighborhoods. Combining his signature humor, psychological insight and social commentary, Jonathan Coe holds up a disquieting, unforgiving mirror in which to reflect a world where the systems are broken and everyone can—and perhaps must—name his or her own price.

Music Business Handbook and Career Guide

For many of us, classical music is something serious—something we study in school, something played by cultivated musicians at fancy gatherings. In *Language of the Spirit*, renowned music scholar Jan Swafford argues that we have it all wrong: classical music has something for everyone and is accessible to all. Ranging from Gregorian chant to Handel's *Messiah*, from Vivaldi's *The Four Seasons* to the postmodern work of Philip Glass, Swafford is an affable and expert guide to the genre. He traces the history of Western music, introduces readers to the most important composers and compositions, and explains the underlying structure and logic of their music. *Language of the Spirit* is essential reading for anyone who has ever wished to know more about this sublime art.

beyond the therapy room. This innovative edited collection will be of great interest to scholars and practitioners of music, social services, medical humanities, education and the broader health field in the social and medical sciences.

Understanding Music

Study Guide

The General Theory of Employment, Interest, and Money, written by legendary author John Maynard Keynes is widely considered to be one of the top 100 greatest books of all time. This masterpiece was published right after the Great Depression. It sought to bring about a revolution, commonly referred to as the 'Keynesian Revolution', in the way economists thought—especially challenging the proposition that a market economy tends naturally to restore itself to full employment on its own. Regarded widely as the cornerstone of Keynesian thought, this book challenged the established classical economics and introduced new concepts. 'The General Theory of Employment, Interest, and Money' transformed economics and changed the face of modern macroeconomics. Keynes' argument is based on the idea that the level of employment is not determined by the price of labour, but by the spending of money. It gave way to an entirely new approach where employment, inflation and the market economy are concerned.

Reaper Man

Poet, writer, and Instagram sensation Nikita Gill returns with a collection of fairytales poetically retold for a new generation of women. Traditional fairytales are rife with cliches and gender stereotypes: beautiful, silent princesses; ugly, jealous, and bitter villainesses; girls who need rescuing; and men who take all the glory. But in this rousing new prose and poetry collection, Nikita Gill gives Once Upon a Time a much-needed modern makeover. Through her gorgeous reimagining of fairytale classics and spellbinding original tales, she dismantles the old-fashioned tropes that have been ingrained in our minds. In this book, gone are the docile women and male saviors. Instead, lines blur between heroes and villains. You will meet fearless princesses, a new kind of wolf lurking in the concrete jungle, and an independent Gretel who can bring down monsters on her own. Complete with beautifully hand-drawn illustrations by Gill herself, *Fierce Fairytales* is an empowering collection of poems and stories for a new generation.
