Tree House Mystery

I looked and saw water rushing in from Galveston Bay on one side and from the gulf on the other. The two seas met in the middle of Broadway, swirling over the wooden paving blocks, and I couldn't help but shudder at the sight. All of Galveston appeared to be under water. Galveston, Texas, may be the booming city of the brand-new twentieth century, but to Seth, it is the end of a dream. He longs to be a carpenter like his father, but his family has moved to Galveston so he can go to a good school. Still, the last few weeks of summer might not be so bad. Seth has a real job as a builder and the beach is within walking distance. Things seem to be looking up, until a storm warning is raised one sweltering afternoon. No one could have imagined anything like this. Giant walls of water crash in from the sea. Shingles and bricks are deadly missiles flying through the air. People not hit by flying debris are swept away by rushing water. Forget the future, Seth and his family will be lucky to survive the next twenty-four hours. But when Rain falls out of a tree while picking plums and has to stay in the hospital, Cap is forced to move in with a guidance counselor and her cranky teen daughter and attend the local middle school. While Cap knows a lot about tie-dying and Zen Buddhism, no education could prepare him for the politics of public school. Right from the beginning, Cap's weirdness makes him a moving target at Claverage Middle School (dubbed C-Average by the students). He has long, ungroomed hair; wears hemp clothes; and practises tai chi on the lawn. Once Zack Powers, big man on campus, spots Cap, he can't wait to introduce him to the age-old tradition at C-Average: the biggest nerd is nominated for class president-and wins.

Esperanza Rising

In the 2010 article "Building a Better Teacher" the article that "launched" Teach Like a Champion, journalist Elizabeth Green compared two schools of thought-one that teaching skills were the most important driver of classroom learning, the other that content knowledge was the true driver. Some readers saw a conflict between these two perspectives. The authors of Reading Reconsidered have always thought that the answer was more complex: that technique was irreplaceable and helped

teachers maximize the application of their subject knowledge but there was also no substitute for content knowledge. Moreover, they believed, there were in fact techniques specific to each of the content areas that drive results and could be delineated and learned like the general techniques in Teach Like a Champion. Reading Reconsidered is the authors' first effort to take on the challenge of defining subject specific methods. It is an anxious time for many teachers but also a time of great opportunity. This book will provide a road map from confusion to success. CONTENTS.
