Latest ISC 11th Curriculum Strictly based on the updated & reduced CISCE curriculum for Academic Year 2020-2021 for class 11th Latest Examination Tools On Tips Notes & Mind Maps facilitate quick revision of chapters and help in self study Latest Typologies of Questions All Typologies of Questions specified by CISCE taken from ISC prescribed books & previous 10 years' examination papers Tips to write better answers Examiner Comments & Answering Tips help in writing answers with better accuracy for exam success

Auto-motor Journal

The Telegraphic Journal and Electrical Review

The Automobile in Southern Africa

Advances in Motor Learning and Control surveys the latest, most important advances in the field, surpassing the confines of debate between proponents of the information processing and dynamical systems. Zelaznik, editor of the Journal of Motor Behavior from 1989 to 1996, brings together a variety of perspectives. Some of the more difficult topics-such as behavioral analysis of trajectory formation and the dynamic pattern perspective of rhythmic movement-are presented in tutorial fashion. Other chapters provide a foundation for understanding increasingly specialized areas of study.

200 Years of Ricardian Trade Theory

Pacific Marine Review

This book offers a comprehensive and insightful reflection on David Ricardo's ingenious theory of international trade. Divided into three parts, Part I presents the "birthday boy", his concept and the many applications and insights that have been derived from it, particularly in modern times. Part II explores in depth important aspects of the Ricardian trade theory through the eyes and experience of leading experts on international trade theory, taking into account the latest research in the field. Lastly, Part III discusses current challenges of globalization in the light of Ricardian trade theory and includes the original "On Foreign Trade" written and published by David Ricardo in 1817.

Motor Industry

After being expelled from one school too many, Bernie Fineman got a job in a

garage when he was thirteen years old. On his first day he hit the foreman across the face with a broom handle. Fifty years later he's still working in garages and still has a fiery temper, as anyone who has tried to cheat a customer or seen one of his many series for Discovery UK and Channel 5 will testify. Not for nothing is Bernie called the Original Motor Mouth. Growing up in the post-war East End with a welder for a mother and a bear-knuckle fighter for a father, life was tough in every sense. But as well as toughness, Bernie also inherited a determination and willingness to graft from his parents, and despite leaving school with no qualifications Bernie has risen to become one of the most respected and famous mechanics in the UK. This is the remarkable story of fifty years in the motor trade that has seen Bernie go from Kray Twins fixer to becoming indispensable to the Metropolitan Police, via South Africa, Bangladesh, the jungles of Central America and more. Dodgy motors and dodgy characters abound in this rollicking and unlikely ride.

The Electrician

A blended learning approach to automotive engineering at levels one to three. Produced alongside the ATT online learning resources, this textbook covers all the theory and technology sections that students need to learn in order to pass levels

1, 2 and 3 automotive courses. It is recommended by the Institute of the Motor Industry and is also ideal for exams run by other awarding bodies. Unlike the current textbooks on the market though, this title takes a blended learning approach, using interactive features that make learning more enjoyable as well as more effective. When linked with the ATT online resources it provides a comprehensive package that includes activities, video footage, assessments and further reading. Information and activities are set out in sequence so as to meet teacher and learner needs as well as qualification requirements. Tom Denton is the leading UK automotive author with a teaching career spanning lecturer to head of automotive engineering in a large college. His nine automotive textbooks published since 1995 are bestsellers and led to his authoring of the Automotive Technician Training multimedia system that is in common use in the UK, USA and several other countries.
