Family Nurse Practitioner Guidelines

A Family Nurse Practitioner (FNP) is an advanced practice registered nurse (APRN) who focuses on comprehensive healthcare for families and family members across all ages and demographics, body systems and diseases. They fill a void in primary care, especially in rural regions or areas with physician shortages.

Nurse-Family Partnership - Helping First-Time Parents Succeed

What Is a Family Nurse Practitioner? A family nurse practitioner, or FNP, is a highly educated registered nurse who provides primary or specialty care for patients of all ages. These advanced-practice registered nurses typically work under a physician but with a high degree of autonomy, and in some cases, have their own private practices. They provide most of the same services a doctor provides, and are the primary source of care for many patients.
