Drawing from his extensive business management experience, Pradip Chand turns traditional wisdom on its head when he proposes that Brand Loyalty is inversely proportional to the income and education levels of the 'knowledge consumer'. He examines how and why brands become strategic assets, traces the evolution of the knowledge consumer and what companies do to protect equity of the brands they have nurtured over the decades. A new approach to building a Brand Loyalty that gives marketers a competitive edge in today's high-tech, high-stake brand-hostile environment. The book combines the knowledge with engaging real life case studies and proven examples.

Did you child just get hearing aids?Is your child feeling self-conscience about their hearing loss?Bessie Needs Hearing Aids" is a children's book that will help children with hearing loss understand the process, and that they are not alone. Written and illustrated by a teenage girl who went through this process, so it will resonate with children just learning of hearing issues, or coping with wearing hearing aids. The book received numerous accolades so it was decided to make it available to all, in order to possibly help other children with hearing loss.When a child goes through the process of getting hearing aids, it is scary for them and difficult for a parent to explain. This is a story of Bessie, the bunny, who was so excited to start school only to have the kids get frustrated that she was not hearing them properly. Bessie visits the audiologist and learns about hearing aids and the happy results of getting hear aids.

The authors demonstrate the process of translating coherent thinking into coherent grammar, with attention to all parts of speech, verb tenses and moods. Examples of proper sentence construction deal with simple, compound, and complex sentences, and demonstrate agreement in number, correct sequence of tenses, and more. Other topics covered include punctuation, vocabulary building, and writing style. Exercises with answers appear throughout the text. Barron's continues its ongoing project of updating, improving, and giving handsome new designs to its popular list of Easy Way titles, now re-named Barron's E-Z Series. The new cover designs reflect the books' brand-new page layouts, which feature extensive two-color treatment, a fresh, modern typeface, and more graphic material than ever. Charts, graphs, diagrams, instructive line illustrations, and where appropriate, amusing cartoons help to make learning E-Z. Barron's E-Z books are self-teaching manuals focused to improve students' grades across a wide array of academic and practical subjects. For most subjects, the skill level ranges between senior high school and college-101 standards. In addition to their self-teaching value, these books are also widely used as textbooks or textbook supplements in classroom settings. E-Z books review their subjects in detail, using both short quizzes and longer tests to help students gauge their learning progress. All exercises and tests come with answers. Subject heads and key phrases are set in a second color as an easy reference aid.

A comprehensive resource, this handbook covers consumer product research, case study, and application. It discusses the unique perspective a human factors approach lends to product design and how this perspective can be critical to success in

the market place. Divided into two volumes, the handbook includes introductory and summary chapters on case study design, design methods and process, error and hazards, evaluation methods, focus groups, and more. It discusses white goods, entertainment systems, personnel audio devices, mobile phones, gardening products, computer systems, and leisure goods.

A university campus is a place with special resonance: conjuring images of cloistered quadrangles and wood-panelled libraries, often echoing centuries of scholarly tradition. And yet it is also a place of cutting-edge science, interactive learning, youth, vibrancy, and energy. It is this dual nature which makes the physical environment of a university so dynamic as well as a highly challenging landscape to design and manage successfully. Today, the scale of the pressures and the rate of change facing higher education institutions are greater than ever. Squeezed public spending, rising tuition fees and the growing education ambitions of developing nations are set against a backdrop of rapid technological progress and changing pedagogies. What are the repercussions for the physical realities of university planning and architecture? And how are university campuses adapting to contend with these pressures? University Trends introduces the most significant, widespread and thought-provoking trends in campus design today. Part 1 identifies current trends such as starchitecture, large-scale campus extensions, adaptive re-use, and international branch campuses. Part 2 profiles each trend via highly-illustrated, global case studies of well-publicised as well as lesser-known projects. The essential guide to current and future trends in campus design.

This book series of Water and Wastewater Engineering have been written in a time of mounting urbanization and industrialization and resulting stress on water and wastewater systems. Clean and ample sources of water for municipal uses are becoming harder to find and more expensive to develop. The book is comprehensive and covers all aspects of water supply, water sources, water distribution, sanitary sewerage and urban stormwater drainage. This wide coverage is helpful to engineers in their every day practice.

When Gail McWilliams lost her sight, she began to see clearly for the first time in her life. "You will see blindness in your lifetime," the eye specialist told Gail when she was twenty-one years old. She would have no warning. The storm in her eyes was coming, but no one knew when. And her wedding day was only three weeks away. Would her hope of marriage and children be destroyed? Would she lose her independence and career? The prospects were terrifying. On Christmas Eve Gail's vision was 20/20. On Christmas morning she was completely blind. Her world had gone from beautiful light to pitch black while she slept. Seeing Beyond is the astonishing true story of Gail's journey into shadowy darkness. It's a touching story of total blindness and perfect vision, a powerful story of engulfing fear and freeing faith, and an inspirational story of

crushing personal loss and great spiritual gain. Some people see life a lot more clearly than others, and my friend Gail McWilliams is one of those 'seers' I love listening to. Gail (has) extraordinary insight into the way things are, and the way things should be. -Joni Eareckson Tada, Best-Selling Author/Radio Host You will weep with Gail as her life is turned upside down and she sinks into despair and depression. And you will celebrate with her as she learns truly to depend on God, who guides her to amazing success as an author, singer, and international speaker. As Gail says, "When you choose to look past the horizon, the sky is the limit!" Join Gail on this eye-opening venture of seeing beyond your worst nightmare to the divine dream God has waiting for you. It's the adventure of a lifetime--an adventure you don't want to miss!

Seeing Beyond

The environment of a university – what we term a campus – is a place with special resonance. They have long been the setting for some of history's most exciting experiments in the design of the built environment. Christopher Wren at Cambridge, Le Corbusier at Harvard, and Norman Foster at the Free University Berlin: the calibre of practitioners who have shaped the physical realm of academia is superlative. Pioneering architecture and innovative planning make for vivid assertions of academic excellence, while the physical estate of a university can shape the learning experiences and lasting outlook of its community of students, faculty and staff. However, the mounting list of pressures – economic, social, pedagogical, technological – currently facing higher education institutions is rendering it increasingly challenging to perpetuate the rich legacy of campus design. In this strained context, it is more important than ever that effective use is made of these environments and that future development is guided in a manner that will answer to posterity. This book is the definitive compendium of the prestigious sphere of campus design, envisaged as a tool to help institutional leaders and designers to engage their campus's full potential by revealing the narratives of the world's most successful, time-honoured and memorable university estates. It charts the worldwide evolution of university design from the Middle Ages to the present day, uncovering the key episodes and themes that have conditioned the field, and through a series of case studies

profiles universally-acclaimed campuses that, through their planning, architecture and landscaping, have made original, influential and striking contributions to the field. By understanding this history, present and future generations can distil important lessons for the future. The second edition includes revised text, many new images, and new case studies of the Central University of Venezuela and Indian Institute of Management Ahmedabad.

STEALING ATLANTA

A groundbreaking exploration of the “science of enlightenment,” told through the lens of the journey of Siddhartha (better known as Buddha), by Guardian science editor James Kingsland. In a lush grove on the banks of the Neranjara in northern India—400 years before the birth of Christ, when the foundations of western science and philosophy were being laid by the great minds of Ancient Greece—a prince turned ascetic wanderer sat beneath a fig tree. His name was Siddhartha Gautama, and he was discovering the astonishing capabilities of the human brain and the secrets of mental wellness and spiritual “enlightenment,” the foundation of Buddhism. Framed by the historical journey and teachings of the Buddha, Siddhartha’s Brain shows how meditative and Buddhist practice anticipated the findings of modern neuroscience. Moving from the evolutionary history of the brain to the disorders and neuroses associated with our technology-driven world, James Kingsland explains why the ancient practice of mindfulness has been so beneficial and so important for human beings across time. Far from a New Age fad, the principles of meditation have deep scientific support and have been proven to be effective in combating many contemporary psychiatric disorders. Siddhartha posited that “Our life is shaped by our mind; we become what we think.” As we are increasingly driven to distraction by competing demands, our ability to focus and control our thoughts has never been more challenged—or more vital. Siddhartha’s Brain offers a cutting-edge, big-picture assessment of meditation and mindfulness: how it works, what it does to our brains, and why meditative practice has never been more important.

"Artifice Breached" is a punchy satire that serves as a tribute to the old science fiction and horror B-movies that, at one time, were considered gripping narratives. By stretching the limits of the inherent trust that is shared between the story and the reader, it forces the reader to ponder what this trust is based on in the first place. Elliot Mercer is a producer of

sorts, who has put into play various apocalyptic scenarios and tests them in the real world. His latest efforts have been all about trying to hide these scenarios so that it would be impossible for someone to discern when and where they actually had begun. A mulligan has been called on an apocalypse that wasn't as convincing as it needed to be, so Mercer finds himself on the fast track to simply redoing it, and having humanity itself simply relive a couple of years instead of trying to account for the myriad of continuity issues that the failed apocalypse had created with a society that continues to go on about its own business. As long as there's an interesting scenario in play, people will go along with it: they will buy it, while ignoring some of the obvious logical and technical problems with it. King of like any movie you've ever seen.

The Rehab Guide: Kitchens & baths

There is widespread interest throughout the world in improving appliance energy efficiency. Methods to reach that end include energy labeling, energy efficiency standards and market conditioning (e.g, energy efficient procurement and DSM programs). Energy efficiency standards, which started out as an action to reduce demand for energy in individual countries, has now become a subject of regional and even worldwide dimension, particularly in the context of global climate change mitigation. Mandatory energy efficiency standards are in place for some appliances in China, Canada, Mexico, the Philippines and the United States. Standards for refrigerator/freezers will take effect in Australia and the European Union in 1999. Voluntary energy efficiency standards are in place for refrigerators in Brazil, India and Korea and for air conditioners in India, Japan and Korea. Table I showed potential global energy use reductions from codes and standards in buildings. If individual country data can be assembled, a more accurate approach to estimating potential reductions in energy use and carbon emissions would be to perform a bottom-up analysis for energy using equipment on an end-use basis in as many large developing countries as possible. The impact of standards would be assessed as more efficient appliances replaced existing stock models and new purchases that increased saturation rates were made at higher efficiencies than would otherwise be the case. This approach would show the slow but steady buildup of annual energy savings from efficiency standards or other programs to improve energy efficiency.

In this groundbreaking analysis of personality type, bestselling author of *Better Than Before* and *The Happiness Project* Gretchen Rubin reveals the one simple question that will transform what you do at home, at work, and in life. During her multibook investigation into understanding human nature, Gretchen Rubin realized that by asking the seemingly dry question "How do I respond to expectations?" we gain explosive self-knowledge. She discovered that based on their answer, people fit into Four Tendencies: Upholders, Questioners, Obligers, and Rebels. Our Tendency shapes every aspect of our behavior, so using this framework allows us to make better decisions, meet deadlines, suffer less stress, and engage more effectively. More than 600,000 people have taken her online quiz, and managers, doctors, teachers, spouses, and parents already use the framework to help people make significant, lasting change. The Four Tendencies hold practical answers if you've ever thought · People can rely on me, but I can't rely on myself. · How can I help someone to follow good advice? · People say I ask too many questions. · How do I work with someone who refuses to do what I ask—or who keeps telling me what to do? With sharp insight, compelling research, and hilarious examples, *The Four Tendencies* will help you get happier, healthier, more productive, and more creative. It's far easier to succeed when you know what works for you.

Tribology is related to friction, wear and lubrication of machine elements. Tribology not only deals with the design of fluid containment systems like seals and gasket but also with the lubrication of surfaces in relative motion. This book comprehensively discusses the theories and applications of hydrodynamic thrust bearing, gas (air) lubricated bearing and elasto-hydrodynamic lubrication. It elucidates the concepts related to friction, including coefficient of friction, friction instability and stick-slip motion. It clarifies the misconception that harder and cleaner surfaces produce better results in wear. Recent developments, including online condition monitoring (an integration of moisture sensor, wear debris and oil quality sensors) and multigrid technique, are discussed in detail. The book also offers design problems and their real-life applications for cams, followers, gears and bearings. MATLAB programs, frequently asked questions and multiple choice questions are interspersed throughout for easy understanding of the topics.

Surreal Photography and Effective Advertising

Show biz memoir at its name-dropping, bridge-burning, profane best: the music industry's most outspoken, outrageous, and phenomenally successful executive delivers a rollicking memoir of pop music's heyday. During the 1970s and '80s the music business was dominated by a few major labels and artists such as Michael Jackson, Bruce Springsteen, the Rolling Stones, Bob Dylan, Billy Joel, Paul Simon, Barbra Streisand and James Taylor. They were all under contract to CBS Records, making it the most successful label of the era. And, as the company's president, Walter Yetnikoff was the ruling monarch. He was also the most flamboyant, volatile and controversial personality to emerge from an industry and era defined by sex, drugs and debauchery. Having risen from working-class Brooklyn and the legal department of CBS, Yetnikoff, who freely admitted to being tone deaf, was an unlikely label head. But he had an uncanny knack for fostering talent and intimidating rivals with his appalling behavior—usually fueled by an explosive combination of cocaine and alcohol. His tantrums, appetite for mind-altering substances and sexual exploits were legendary. In Japan to meet the Sony executives who acquired CBS during his tenure, Walter was assigned a minder who confined him to a hotel room. True to form, Walter raided the minibar, got blasted and, seeing no other means of escape, opened a hotel window and vented his rage by literally howling at the moon. In *Howling at the Moon*, Yetnikoff traces his journey as he climbed the corporate mountain, danced on its summit and crashed and burned. We see how Walter became the father-confessor to Michael Jackson as the King of Pop reconstructed his face and agonized over his image while constructing *Thriller* (and how, after it won seven Grammys, Jackson made the preposterous demand that Walter take producer Quincy Jones's name off the album); we see

Walter, in maniacal pursuit of a contract, chase the Rolling Stones around the world and nearly come to blows with Mick Jagger in the process; we get the tale of how Walter and Marvin Gaye—fresh from the success of “Sexual Healing”—share the same woman, and of how Walter bonds with Bob Dylan because of their mutual Jewishness. At the same time we witness Yetnikoff’s clashes with Barry Diller, David Geffen, Tommy Mottola, Allen Grubman and a host of others. Seemingly, the more Yetnikoff feeds his cravings for power, sex, liquor and cocaine, the more profitable CBS becomes—from \$485 million to well over \$2 billion—until he finally succumbs, ironically, not to substances, but to a corporate coup. Reflecting on the sinister cycle that left his career in tatters and CBS flush with cash, Yetnikoff emerges with a hunger for redemption and a new reverence for his working-class Brooklyn roots. Ruthlessly candid, uproariously hilarious and compulsively readable, *Howling at the Moon* is a blistering *You’ll Never Eat Lunch in this Town Again* of the music industry.
