Integrated Tse-tse Fly Control

British Journal of Entomology and Natural History

The Universal Dictionary of the English Language

Fly By Night

This book discusses methods which might appropriately be employed under various circumstances. It is concerned with control of insect pests and tse-tse flies, and considers prospects for integrated control of the African trypanosomiases, in which vector control is envisaged as playing a key role.

Discover a world where words have untold power in this thrilling fantasy adventure from award-winning author Frances Hardinge Everybody knew that books were dangerous. Read the wrong book, it was said, and the words crawled around your brain on black legs and drove you mad, wicked mad. Mosca Mye's father insisted on teaching her to read—even in a world where books are dangerous, regulated things. Eight years later, Quillam Mye died, leaving behind an orphaned daughter with an inauspicious name and an all-consuming hunger for words. Trapped for years in the care of her cruel Uncle Westerly and Aunt Briony, Mosca leaps at the opportunity for escape, though it comes in the form of sneaky swindler Eponymous Clent. As she travels the land with Clent and her pet goose, Saracen, Mosca begins to discover complicated truths about the world she inhabits and the power of words.

their teeth, they find refuge in Toll, the strange gateway town where visitors may neither enter nor leave without paying a price. By day, the city is well-mannered and orderly; by night, it's the haunt of rogues and villains. Wherever there's a plot, there's sure to be treachery, and wherever there's treachery, there's sure to be trouble – and where there's trouble, Clent, Mosca and the web-footed apocalypse Saracen the goose can't be far behind. But as past deeds catch up with them and old enemies appear, it looks as if this time there's no way out . . . 'Everyone should read Frances Hardinge. Everyone. Right now' - Patrick Ness, author of A Monster Calls.

With its unparalleled coverage of English slang of all types (from 18th-century cant to contemporary gay slang), and its uncluttered editorial apparatus, Cassell's Dictionary of Slang was warmly received when its first edition appeared in 1998. 'Brilliant.' said Mark Lawson on BBC2's The Late Review; 'This is a terrific piece of work - learned, entertaining, funny, stimulating' said Jonathan Meades in The Evening Standard. But now the world's best single-volume dictionary of English slang is about to get even better. Jonathon Green has spent the last seven years on a vast project: to research in depth the English slang vocabulary and to hunt down and record written instances of the use of as many slang words as possible. This has entailed trawling through more than 4000 books - plus song lyrics, TV and movie scripts, and many newspapers and magazines - for relevant material. The research has thrown up some fascinating results

these questions and many other fascinating facts can be found in *V is for Venus Flytrap: A Plant Alphabet*. Mankind's dependence upon the plant kingdom goes far beyond the food on our table and the air that we breathe. Plants have also provided shelter and led to important advances in medicine and science. Using the alphabet, horticulturalist Eugene Gagliano covers a wide range of topics including exotic species and their locations; plants' role in a healthy lifestyle; food crops and the world economy; and the importance of conservation and environmental stewardship in our world today. After reading *V is for Venus Flytrap*, young readers will be eager to get their hands dirty and their thumbs green! Retired elementary schoolteacher Eugene Gagliano has had a green thumb since boyhood. He has an A.A.S. in Ornamental Horticulture and owned a greenhouse business for several years. The author of several books for children including *C is for Cowboy: A Wyoming Alphabet* and *Four Wheels West: A Wyoming Number Book*, Eugene lives in Buffalo, Wyoming. Elizabeth Traynor received her BFA in illustration from the Rhode Island School of Design. Her work can be seen throughout the country, from book covers, newspapers, and magazines, to ads and packaging. She is a professor of illustration, passing her love and knowledge of the field on to the next generation of artists. Elizabeth lives in Natick, Massachusetts.

While certain ecological problems associated with artificial night lighting are widely known—for instance, the disorientation of sea turtle hatchlings by beachfront lighting—the vast range of influences on all types of animals and plants is only beginning to be recognized. From nest choice and breeding success of birds to behavioral and physiological changes in salamanders, many organisms are seriously affected by human alterations in natural patterns of light and dark. *Ecological Consequences of Artificial Night Lighting* is the first book to consider the environmental effects of the intentional illumination of the night. It brings together leading scientists from around the world to review the state of knowledge on the subject and to describe specific effects that have been observed across a full range of taxonomic groups, including mammals, birds, reptiles and amphibians, fishes, invertebrates, and plants. *Ecological Consequences of Artificial Night Lighting* provides a scientific basis to begin addressing the challenge of conserving the nighttime environment. It cogently demonstrates the vital importance of this until-now neglected topic and is an essential new work for conservation planners, researchers, and anyone concerned with human impacts on the natural world.
