This book examines the history of the H.H. Franklin Company, which made significant contributions to the American automobile scene during the first third of the twentieth century. From 1902 to 1934, Franklin produced high quality, luxury cars, including America's only truly successful gasoline-powered motor car incorporating an air-cooled engine. Based on extensive research, author Sinclair Powell tells the story of the partnership of Herbert H. Franklin, skilled in business, advertising and public relations, and John Wilkinson, the engineer and designer who developed an automobile which was a pacesetter in its day. The book also describes how the Syracuse-based Franklin Company was a pioneer in research, production and employee relations. Covering the company's glory years, and its decline during the Depression, The Franklin Automobile Company, also humanizes the story via the reminiscences of surviving employees of the firm.

## **AERO TRADER & CHOPPER SHOPPER, FEBRUARY 1996**

At the time of his famous kite experiment, Benjamin Franklin was unaware that his theories about electricity had already made him a celebrity all over Europe, especially in France, where fashionable circles loved to discuss scientific discovery.

Admired by the French court and beloved by French citizens, Franklin effectively became America's first foreign diplomat, later helping to enlist France's military and financial support for the American Revolution. A father of the revolution and a signer of the Constitution, Franklin was a lightning rod in political circles - "a dangerous Engine," according to a critic. And although he devoted the last twenty-five years of his life to affairs of state, his first love was always science. Handsome pen-and-ink drawings highlight moments in this revolutionary thinker's life. From the author and illustrator of *The Longitude Prize*, a Robert F. Sibert Honor Book and winner of the Boston Globe-Horn Book Award, comes another story of adventure and invention, of one man's curiosity and the extraordinary rewards of his discoveries, just in time to celebrate the 300th anniversary of his birth (January 17, 1706).
