Fred Tomaselli's surreal, hallucinatory and highly detailed paintings are gorgeously reproduced in this companion volume to the artist's retrospective exhibition. Originally from the West Coast and its psychedelic scene in the 70s, Tomaselli is based in Brooklyn. Complex explosions of colour and line, swirling patterns, and collages made of natural objects are signature elements of Tomaselli's work. His large-scale assemblage paintings, often built onto wooden surfaces and later varnished, are rich creations laced with historic and cultural references. They invite close viewing and this beautiful large-format volume allows readers to study in brilliant detail the intricacies of each piece. In addition to full reproductions, there are also illustrations of details magnified to reveal the paintings' texture that is so critical to Tomaselli's technique. An interview with the artist provides enriching background while essays by prominent art historians, curators, and critics offer insight into the

context and themes of this fascinating American artist. An excerpt from an unpublished work by bestselling writer David Shields, who is an ardent fan of Fred Tomaselli, rounds off this volume. AUTHOR: Ian Berry is Associate Director and The Susan Rabinowitz Malloy Curator of The Frances Young Tang Teaching Museum and Art Gallery at Skidmore College. Heidi Zuckerman Jacobsen is the Director and Chief Curator of the Aspen Art Museum. ILLUSTRATIONS 250 colour illustrations

Cinematic Appeals follows the effect of technological innovation on the cinema experience, specifically the introduction of widescreen and stereoscopic 3D systems in the 1950s, the rise of digital cinema in the 1990s, and the transition to digital 3D since 2005. Widescreen cinema promised to draw the viewer into the world of the screen, enabling larger-than-life close-ups of already larger-than-life actors. This technology fostered the illusion of physically entering a film, enhancing the semblance of realism. Alternatively, the digital era was less concerned with the viewer's physical response and more with information flow, awe, and the reevaluation of spatiality and embodiment. This study ultimately shows how cinematic technology and the human experience shape and respond to each other over time.

By the end of the nineteenth century, rhetoric had not yet been established as a legitimate discipline. Fred Newton Scott (1860-1931) spent his life broadening the scope of rhetoric studies through his imaginative, interdisciplinary research. Scott was both a pragmatic reformer and a visionary scholar who used empirical methods and cognitive psychology to expand this field. In this study, Donald Stewart and his wife Patricia examine Scott's essays, speeches, and books to write the first comprehensive biography of the man who became one of the most influential figures in language studies during the early

twentieth century.

This book aims to reinvigorate the Marxist project and the role it might play in illuminating the way beyond capitalism. Though political economy and scientific investigation are needed for pure Marxism, Martin's argument is that the extent to which these elements are needed cannot be determined within the conversations of political economy and other investigations into causal mechanisms. What has not been done, and what this book does, is to argue for the possibility of a rethought Marxism that takes ethics as its core, displacing political economy and "scientific" investigation.

Franklin Roosevelt instinctively understood that a politician unable to control his own body would be perceived as unable to control the body politic. He took care to hide his polio-induced lameness both visually and verbally. Through his speeches—and his physical bearing when delivering them—he tried to project robust health for himself while imputing disability, weakness, and even disease onto his political opponents and their policies. In *FDR's Body Politics: The Rhetoric of Disability*, Davis W. Houck and Amos Kiewe analyze the silences surrounding Roosevelt's disability, the words he chose to portray himself and his policies as powerful and health-giving, and the methods he used to maximize the appearance of physical strength. Drawing on never-before-used primary sources, they explore how Roosevelt and his advisors attacked his

most difficult rhetorical bind: how to address his fitness for office without invoking his disability. They examine his broad strategies, as well as the speeches Roosevelt delivered during his political comeback after polio struck, to understand how he overcame the whispering campaign against him in 1928 and 1932. The compelling narrative Houck and Kiewe offer here is one of struggle against physical disability and cultural prejudice by one of our nation's most powerful leaders. Ultimately, it is a story of triumph and courage—one that reveals a master politician's understanding of the body politic in the most fundamental of ways.

My initial interest in the Yates lineage and Fred C. Yates specifically, began at an early age when my mother, Edith Jane (Yates) Riffe, introduced me to the shoebox. I have always thought of it as a shoebox, because it is about that size, but it is actually more of an all purpose box. Mother kept her most prized possessions in it, letters from her father, Fred C. Yates, and a handful of notebooks and documents that had been passed down from him.

AS FEATURED ON THE NEW PODCAST 'UNHEARD: THE FRED & ROSE WEST TAPES' FRED & ROSE IS THE DEFINITIVE ACCOUNT OF THIS INFAMOUS CASE - NOW UPDATED WITH A POSTSCRIPT FROM THE AUTHOR Fred and Rose West are virtually unique in British criminal history: a husband and wife who loved and killed together. During their long relationship, the Wests murdered a series of young women, burying the remains of nine victims under their home at 25 Cromwell Street, Gloucester, including those of their daughter. What was left of Fred West's eight-year-old stepdaughter was dug up from under the Wests' previous Gloucester home; his first wife and nanny were buried in open country. Most victims had been decapitated and dismembered, their remains showing signs of sexual torture. These twelve are just the ones police found when the Wests were arrested in 1994. There may be more whose bones have not been located . . . Howard Sounes broke the first major story about the Wests as a journalist, and covered the murder trial of Rosemary West, before writing *Fred & Rose*, the definitive account of this infamous case. Beginning with Fred's and Rose's bizarre childhoods, Sounes charts their lives and crimes in forensic detail, creating a fascinating and truly frightening account of a marriage soaked in blood.
