For courses in reading electrocardiograms This conversational text teaches EKG from basic to advanced concepts Unlike books that encourage rote memorization, the conversationally-written EKG Plain and Simple puts the student at the patient's bedside. This popular text focuses not just on identifying rhythms or EKGs, but also on what can be done for the patient. Assuming no prior knowledge, the text covers basic to advanced EKG concepts. Part I progresses seamlessly from basic cardiac A&P through waves and complexes, lead morphology, and rhythms. Part II covers 12-lead interpretation, axis, hypertrophy, myocardial infarction, and more. The author provides many clinical scenarios, anecdotes, and critical-thinking exercises, plus over 500 practice rhythm strips and 12-lead EKGs. The Fourth Edition has been updated to include improved opening scenarios, streamlined explanations, new tables, and more photos, art, and visual aids. Also available with MyHealthProfessionsLab Now available packaged with the Fourth Edition of EKG Plain and Simple , MyHealthProfessionsLab is an online homework, tutorial, and assessment program designed to work with this text to engage students and improve results. No matter their learning style, students will gain a solid foundation in EKG interpretation through pre-built homework assignments, interactive case studies with assessments, animations, videos, and more! This New American Red Cross CPR/AED for the Professional Rescuer Participant's Manual and course reflect changes based on the 2005 Consensus on Science for CPR and Emergency Cardiovascular Care (ECC) and the Guidelines 2005 for First Aid. Changes to this program and manual include simplifications to many of the CPR skill sequences, which helps improve retention. There have also been changes to help improve the quality of CPR. The integration of CPR skills into the operation of AEDs had changed to help improve survival from sudden cardiac arrest. Professional rescuers are now trained to use AEDs on adults and children. Information has been updated and added to this program to help professional rescuers administer epinephrine, aspirin and fixed-flow-rate oxygen. The skills learned in this course include adult, child and infant rescue breathing, conscious and unconscious choking, CPR, two-rescuer CPR and adult and child AED. Additional training can be added to this course including bloodborne pathogens training and emergency oxygen administration. While the skills and knowledge that professional rescuers use are increasing, this training will help you meet your most important responsibility as a professional rescuer- the responsibility to save lives.
