How we raise young children is one of today's most highly personalized and sharply politicized issues, in part because each of us can claim some level of "expertise." The debate has intensified as discoveries about our development-in the womb and in the first months and years-have reached the popular media. How can we use our burgeoning knowledge to assure the well-being of all young children, for their own sake as well as for the sake of our nation? Drawing from new findings, this book presents important conclusions about nature-versus-nurture, the impact of being born into a working family, the effect of politics on programs for children, the costs and benefits of intervention, and other issues. The committee issues a series of challenges to decision makers regarding the quality of

child care, issues of racial and ethnic diversity, the integration of children's cognitive and emotional development, and more. Authoritative yet accessible, *From Neurons to Neighborhoods* presents the evidence about "brain wiring" and how kids learn to speak, think, and regulate their behavior. It examines the effect of the climate-family, child care, community-within which the child grows.

Do you feel confident you're a leader with influence? You may be surprised to discover you're not as influential as you think you are. Your team is only as strong as your influence, and many leaders today are mistaken about what it means to be influential. An outdated influence paradigm, along with technological devices and distractions, is making it increasingly challenging for leaders to reach those they need to influence in order to be successful. In fact, many leaders are unwillingly and unknowingly sabotaging themselves and their influence. In her thought-provoking *Influence Redefined*, Stacey Hanke introduces her powerful Influence Model, a step-by-step method for improving communication and producing the ideal type of influence—one that moves people to action long after an interaction is over. She dispels the most common influence myths and instructs leaders on how to stop sabotaging themselves in order to leave a positive, lasting impression. Using a results-based definition of influence for individuals and organizations, Hanke successfully shows leaders how they can develop influence as a skill through self-awareness, consistency, a positive reputation, adaptability, and impact. With insights from dozens of executives and business leaders, as well as practical how-tos and action steps, *Influence Redefined* will help leaders multiply and expand their influence every day, Monday to Monday®. Through Stacey Hanke, Inc., the author has provided keynotes, mentoring and training on communicating with influence to thousands of leaders across industries. She is the author of *Yes You Can!* and has appeared in the *New York Times* and *SmartMoney*. Hanke was recognized as one of the National Speakers Association's "Top 6 Under 40."

From Neurons to Neighborhoods

Abducted from her West African village at the age of eleven and sold as a slave in the American South, Aminata Diallo thinks only of freedom - and of finding her way home again. After escaping the plantation, torn from her husband and child, she passes through Manhattan in the chaos of the Revolutionary War, is shipped to Nova Scotia, and then joins a group of freed slaves on a harrowing return odyssey to Africa. Based on a true story, Lawrence Hill's epic novel spans three continents and six decades to bring to life a dark and shameful chapter in our history through the story of one brave and resourceful woman.

For the past 20 years, corporations have been receiving huge tax breaks and subsidies in the name of "jobs, jobs, jobs." But, as Greg LeRoy demonstrates in this important new book, it's become a costly scam. Playing states and communities off

against each other in a bidding war for jobs, corporations reduce their taxes to next-to-nothing and win subsidy packages that routinely exceed \$100,000 per job. But the subsidies come with few strings attached. So companies feel free to provide fewer jobs, or none at all, or even outsource and lay people off. They are also free to pay poverty wages without health care or other benefits. All too often, communities lose twice. They lose jobs--or gain jobs so low-paying they do nothing to help the community--and lose revenue due to the huge corporate tax breaks. That means fewer resources for maintaining schools, public services, and infrastructure. In the end, the local governments that were hoping for economic revitalization are actually worse off. They're forced to raise taxes on struggling small businesses and working families, or reduce services, or both. Greg LeRoy uses up-to-the-minute examples, naming names--including Wal-Mart, Raytheon, Fidelity, Bank of America, Dell, and Boeing--to reveal how the process works. He shows how carefully corporations orchestrate the bidding wars between states and communities. He exposes shadowy "site location consultants" who play both sides against the middle, and he dissects government and corporate mumbo-jumbo with plain talk. The book concludes by offering common-sense reforms that will give taxpayers powerful new tools to deter future abuses and redirect taxpayer investments in ways that will really pay off.
