"Nathan Tierney's powerful storytelling is rarely seen in today's health care business environment. We must redesign the health care delivery system---a team sport in service of patients, hold it accountable with measurement to improve outcomes, and quantify the resource costs over the full cycle of care. Value-based health care is a framework through which these goals are achieved, and Tierney provides a detailed playbook to get your organization there. Outlined in incredible detail and clarity, he presents core concepts and dives into the key metrics needed to build, maintain, and scale a successful value-based health care organization. Nathan shares a realistic vision of what any CEO should expect when developing their own Value Management Office. Nothing is more important to me than improving the lives of those I love. My personal mission is to create systemic change with an impact on the global stage. This playbook needs to be on the desk of every executive, clinician, and patient today." -Mahek Shah, MD, Senior Researcher and Senior Project Leader, Harvard Business School Our current healthcare system's broken. 2060. The cause of this increase is due to (1) a global aging population, (2) growing affluence, (3) rise in chronic diseases, and (4) better-informed patients; all of which raises the demand for healthcare. In 2006, Michael Porter and Elizabeth Teisberg authored the book 'Redefining Health Care: Creating Value-Based Competition on Results.' In it, they present their analysis of the root causes plaguing the health care industry and make the case for why providers, suppliers, consumers, and employers should move towards a patient-centric approach that optimizes value for patients. According to Porter, "value for patients should be the overarching principle for our broken system." Since 2006, Professor Porter, accompanied by his esteemed Harvard colleague, Profesor Robert Kaplan, have worked tirelessly to promote this new approach and pilot it with leading healthcare delivery organizations like Cleveland Clinic, Mayo Clinic, MD Anderson, and U.S. Department of Veteran Affairs. Given the current state of global healthcare, there is urgency to achieve widespread adoption of this new approach. The intent of this book is to equip all healthcare delivery organizations with a guide for putting the value-based concept into practice. This book defines the practice of value-based health care as Value Management. The book explores Profesor Porter's Value Equation ($\text{Value} = \text{Outcomes} / \text{Cost}$), which is central to Value Management, and provides a step-by-step process for how to calculate the components of this equation. On the outcomes side, the book presents the Value Realization Framework, which translates organizational mission and strategy into a comprehensive set of performance measures and

contextualizes the measures for healthcare delivery. The Value Realization Framework is based on Professor Kaplan's ground-breaking Balanced Scorecard approach, but specific to healthcare organizations. On the costs side, the book details the Harvard endorsed time-driven activity based costing (TDABC) methodology, which has proven to be a modern catalyst for defining HDO costs. Finally, this book covers the need and a plan to establish a Value Management Office to lead the delivery transformation and govern operations. This book is designed in a format where any organization can read it and acquire the fundamentals and methodologies of Value Management. It is intended for healthcare delivery organizations in need of learning the specifics of achieving the implementation of value-based healthcare.

Parties to cross-border disputes arising anywhere in the vast Portuguese-speaking world – a community of more than 230 million in a space that offers a wide array of investment opportunities across four continents – increasingly seek Portugal as their preferred seat of arbitration. A signatory to all relevant international conventions, Portugal has proven to be an ‘arbitration-friendly’ jurisdiction. This volume is the first and so far only book in English that provides a thorough, in-depth analysis of international arbitration law and practice in Portugal. Its contributing authors are among the most highly regarded legal names in the country, including scholars, arbitrators, and practitioners. The authors describe how international arbitration proceedings are conducted in Portugal, what cautions should be taken, and what procedural strategies may be suitable in particular cases. They provide insightful answers to questions such as the following: What matters can be submitted to arbitration under Portuguese law? What are the validity requirements for an arbitration agreement? How do the State courts interact with arbitration proceedings and what is the attitude of such courts toward international arbitration? What are the rules governing evidentiary matters in arbitration? How is an arbitration tribunal constituted? How are arbitrators appointed? How may they be challenged? How can an international arbitral award be recognized and enforced? How does the Portuguese legal system

address the issue of damages and what specific damages are admitted? How are the costs of arbitration proceedings estimated and allocated? The book includes analyses of arbitration related to specific fields of the law, notably sports, administrative, tax, intellectual property rights (especially regarding reference and generic medicines), and corporate disputes. Each chapter provides, for the topics it addresses, an examination of the applicable laws, rules, arbitration practice, and views taken by arbitral tribunals and state courts as well as those of the most highly considered scholars. As a detailed examination of the legal framework and of all procedural steps of an arbitration in Portugal, from the drafting of an arbitration agreement to the enforcement of an award, this book constitutes an invaluable resource for parties involved in or considering an international arbitration in this country. The guidance that it seeks to provide in respect of any problem likely to arise in this context can be useful to arbitrators, judges, academics, and interested lawyers.

Instructor Resources Case questions and solutions, complete instructor versions of the spreadsheet models, PowerPoint slides, and a transition guide to the new edition. Student Spreadsheets ([click here for access](#)) With this casebook, students have the opportunity to apply finance principles and concepts to settings that simulate actual work environments. In that way, the book allows instructors to create a bridge between academic learning and applied practice. Each of the 32 finance cases presents a scenario and relevant background on a healthcare organization and poses a financial management issue that students must analyze in order to recommend appropriate courses of action. The majority of cases are accompanied by spreadsheet models to help students perform the required analyses. The casebook also contains seven qualitative mini-cases created to highlight the ethical dilemmas that occasionally arise in the practice of healthcare finance. Important changes to this edition: All cases have been updated, and many have been revised extensively, including new exhibits, timely topics, and new calculations Two new cases have been added to the book: One focuses on bond refunding and the other covers revenue cycle management A new mini-case focuses on the potential ethical conflicts involved with physician-owned distributors (PODs) The PowerPoint slides have been changed to allow instructors to first present a short introduction to the case and then, after students have completed their

Building upon the second edition of this book published in 2012, the authors further delve into the process of quality improvement in the clinical setting. Rather than focusing on improvement of a specific patient, there is emphasis on system improvements. With increased emphasis on improved patient and system outcomes, it is imperative that healthcare professionals have an understanding of this concept. This work teaches introductory quality improvement in a structured, easy-to-understand manner. The authors state that the book is designed for healthcare professional students as well as healthcare professionals who are beginning to learn clinical quality improvement. They are clear authorities on healthcare quality management and have garnered the support of both The Joint Commission and the Institute for Healthcare Improvement. Mirroring the medical model, this book teaches healthcare quality improvement by implementing diagnosis of the problem, problem management, analysis, change, and leadership in system improvement. Pre- and post-lesson vignettes include patients as part of the treatment team. This intentionally puts emphasis on shared decision making. Post-lesson tools include specific exercises and questions to assist readers in encoding the preceding information. Graphs and tables are well designed and positioned to not
