## **The Light Airplane Pilot's Guide to Stall/spin Awareness**

French Gold is a tale of murder and its solving, of life in the colonial village of Ste. Anne in the Illinois country, of buried treasure and its eventual unearthing. It is of a keelboat voyage from St. Louis to New Orleans and of the tender star-crossed love shared by the French woman Julie Coussat and young Auguste Chouteau along the way. Their journey is full of action - first an encounter with river pirates, then savage Indians, and finally a brutal attack upon Julie by supposed friends. This story tells of the present-day rebuilding of a wall at historic Fort de Chartres and how it came about. Fast paced, its action shifts back and forth and back again between Springfield, Illinois in the 1980s, the French Illinois country of 1764 and life on the river, and Paris in the bloody days of the French Revolution. Local historians demanded historical accuracy in the rebuilding of the wall at Fort de Chartres. It seemed necessary for research to be done in France and Spain. A professor of French language and literature was employed to conduct that inquiry while he was in Europe on a sabbatical leave. His findings in Seville and Paris led to the solution of an ancient murder, to the recovery of a long buried treasure in gold and silver from the bluffs along the Mississippi, and to the account written long ago by the French woman, Julie Coussat, of her time upon the river. Essentially, this a romantic tale of how a strong-willed woman was caused to become the binding link between past and present, and the means of our recreating a bit of the past

Learn to shoot professional-quality HD footage with your DSLR Camera The DSLR Filmmaker's Handbook, 2nd Edition is the expert guide to getting professional movie-making results with an HD video-enabled DSLR camera. Fully updated to reflect the latest technology, this updated edition provides guidance toward best practices and techniques that maximize results. Shooting HD video with a DSLR has many benefits — and also a few tricky drawbacks — but this guide gives you the insight and training you need to overcome these challenges as you learn what to anticipate, how to work around it, and how to fix imperfections in post-production. Award winning independent filmmaker Barry Andersson walks you through the shooting process and shows you what to do before, during, and after filming to ensure high quality results. Most of today's DSLRs have the capacity to shoot HD video. This, combined with incredible low-light capabilities, shallow depth of field, and relatively low price point make these cameras an extremely attractive entry point for would-be independent filmmakers. This book shows you how to exploit your DSLR's capabilities to produce beautiful film, with step-by-step expert instruction. Understand the limitations of DSLR video Learn what to plan for before filming begins Exploit HD capabilities to maximize the film's visuals

Book 4 of Cowboys & Brides From New York Times and USA Today-bestselling author Carolyn Brown comes a contemporary Western romance filled to the brim with sexy cowboys, gutsy heroines, and genuine down-home Texas twang. Texas rancher Mason Harper's daughters want a new mama in the worst way, and when a beautiful woman in a tattered wedding gown appears on their doorstep, the two little girls adopt her-no ifs, ands, or buts about it. Mason isn't sure about taking in a complete stranger, but Lord knows he needs a nanny, and Annie Rose Boudreau stirs his heart in long-forgotten ways Annie Rose is desperate, and when a tall, sexy cowboy offers her a place to stay, she can't refuse. After all, it's just for a little while. As she settles in deeper, her heart tells her both Mason and her role as makeshift mama suit her just fine. But will Mason feel the same way once her nightmare past catches up with her? Fans of Linda Lael Miller and Diana Palmer will thrill to this moving story of a lonely cowboy and his two little girls finding the family of their dreams. The Federal Aviation Administration (FAA) administers oral as well as written exams for pilot certification and flight review. These exam guides teach applicants not only what to expect, but also how to exhibit subject mastery and confidence under the scrutiny of the FAA Examiner. In this series, the most consistent questions asked in each exam are provided in a question-and-answer format, with information sources for further study. Applicants facing the Instrument Rating oral exams will benefit from the topics discussed and the further study materials provided in this Instrument edition, which have been updated to reflect important FAA regulatory and procedural changes, including new or updated PTS technical subject areas. The Eighth Edition contains a new chapter on the currently hot FAA topic of "scenario-based training" (SBT), written by Arlynn McMahan (author of "Train Like You Fly"). It provides insight into these more-complex questions on how to demonstrate one's grasp of the practical application of flight training. Scenario-based questions are now an integral part of FAA Oral & Practical Exams, and FAA examiners are using them more and more often.

This book highlights some of Kenneth King's diverse contributions to international and comparative education, African studies and development studies over more than four decades. From his pioneering work on the first educational commissions to Africa, through his research on skills training in the informal sector, and on to his critical analysis of education analysis in development agencies, this book makes influential materials available in one place.

Appropriately, it illustrates his career-long connections with Kenya, but also his more recent engagement with Japan, China and India. It is the first CERC volume to pay significant attention to the policies and politics of skills development. Kenneth King is an Emeritus Professor of the University of Edinburgh. He was based in and directed its Centre of African Studies for many years, and lectured on international perspectives in education and training in its School of Education. His research interests have addressed the politics and planning of skills development, including in the informal sector of the economy, aid policies towards education of both Western and Asian donors, and higher education cooperation. He founded NORRAG, the network for international policies and cooperation in education and training, in 1986, and edited NORRAG News until 2016. He was President of the British Association for International and Comparative Education (BAICE) from 2014-2016, and was one of the founding members of the UK Forum on International Education

and Training (UKFIET).

The Internet of Toys (IoToys) is a developing market within our Internet of Things (IoT) ecosystem. This book examines the rise of internet-connected toys and aims to anticipate the opportunities and risks of IoToys before their widespread diffusion. Contributors to this volume each provide a critical analysis of the design, production, regulation, representation and consumption of internet-connected toys. In order to address the theoretical, methodological and policy questions that arise from the study of these new playthings, and contextualise the diverse opportunities and challenges that IoToys pose to educators, families and children themselves, the chapters engage with notions of mediatization, datafication, robotification, connected and post-digital play. This timely engagement with a key transformation in children's play will appeal to all readers interested in understanding the social uses and consequences of IoToys, and primarily to researchers and students in children and media, early childhood studies, media and communications, sociology, education, social psychology, law and design.

"Nair writes big, brave descriptions of one brutal murder after the next, relentlessly describing each death even as sub-inspector Santosh loses his breakfast over them."—Time Out It's the first day of Ramadan in heat-soaked Bangalore. A young man begins to dress: makeup, a sari, and expensive pearl earrings. Before the mirror he is transformed into Bhuvana. She is a hijra, a transgender seeking love in the bazaars of the city. What Bhuvana wants, she nearly gets: a passing man is attracted to this elusive young woman—but someone points out that Bhuvana is no woman. For that, the interloper's throat is cut. A case for Inspector Borei Gowda, going to seed, and at odds with those around him including his wife, his colleagues, even the informers he must deal with. More corpses and Urmila, Gowda's ex-flame, are added to this spicy concoction of a mystery novel. Most intriguing is the grim world of Bhuvana. Her hijra fantasies, emotions, and hopes are etched in a way that is chilling yet oddly touching. Some mysteries remain till almost the end, for instance Bhuvana's connection with the wealthy, corrupt Corporator Ravikumar, who lives in a mansion as grand as the Mysore Palace and controls whole districts of Bangalore. Anita Nair lives in Bangalore and is a prize-winning author. Her novel Ladies Coupe, published in the United States by St. Martin's Press, is a feminist classic which has been translated in thirty languages all over the world. This is her first crime novel.

Forget the rule book and relive one of the most exciting race series ever with Can-Am 50th Anniversary! The first rule of Can-Am: There are no rules. Or at least damn few rules. The bodywork had to enclose the wheels and there had to be something that loosely resembled a passenger seat--if your passenger was a badly misshapen human or perhaps a lab monkey. Otherwise, set your racing mind free.

No limits to engine options or output, no restrictions on aerodynamic aids or body shape. It was as close to unrestricted road racing as racing had ever gotten or would ever get again. And it was fantastic. From its introduction in 1966 to the end of its classic period in 1974, North America's Can-Am series was the most exciting, technologically advanced, and star-studded racing series of the day. Its essentially rules-free formula attracted everyone from crazed backyard engineers to specialists like McLaren, Chaparral, Shadow, and Lola to manufacturers like Ford, Ferrari, Chevrolet, and Porsche. Top drivers including Mario Andretti, Jackie Stewart, Parnelli Jones, Bruce McLaren, Denis Hulme, Dan Gurney, Phil Hill, Mark Donohue, Peter Revson, Jim Hall, Jody Scheckter, Chris Amon, George Follmer and John Surtees competed on tracks across the US and Canada taking time off from Formula One schedules and other duties to drive in Can-Am because the racing and the cars were so exciting. Can-Am 50th Anniversary offers a heavily illustrated look back at what is arguably the greatest race series ever to grace the roadracing circuits of North America. Photographer Pete Biro was Goodyear Tire&™s official photographer and followed the series throughout the entire run from 1966-'74. The vast majority of the book&™s images are unpublished or long out of circulation. Biro brings his unique perspective and his close relationship with the drivers, team owners, and constructors to bear on the captions while former AutoWeek editor George Levy provides an exciting text reflecting the thrill of Can-Am racing.

success path. On March 14, 2017 the stock price reached an all-time low of \$7.24 and has been trading below \$10.00 ever since, thus considerably below the initial IPO price of \$24.00 set in June 2014. This case describes how GoPro has rapidly grown to be a billion-dollar company and elaborates on the several challenges it has been facing in the recent past. Particularly, the competition in the action camera market has become very fierce. For example, the Chinese producer Xiaomi, which has launched products that are technologically advanced while priced very aggressively, has seen increased market share. At the time of the case, in June 2017, GoPro has just completed its entry into the drone market with the introduction of its model Karma. Despite the strong competitive pressures that characterize the drone market--with the Chinese manufacturer DJI holding approximately 70% of the worldwide market share--GoPro hopes this move will help its comeback. The case invites students to put themselves in the shoes of a business consultant who has been hired by GoPro to evaluate its entry into the drone market and provide recommendations to the top management team on how to win the competitive battle and become profitable again.

compelling video to document it. While DSLR cameras are quite capable of shooting video, for many, their foray into video shooting can be frustrating. Footage tends to be dark and out of focus and suffers from camera shake and bad audio. In *Creating DSLR Video: From Snapshots to Great Shots*, photographer and video expert Rich Harrington demystifies the process and teaches a solid foundation for capturing great video. Whether readers have been dabbling in video already or have never even used that mode on their camera, they will learn how to go from capturing mediocre video to creating compelling footage--and all the steps in between! Readers will also learn the essentials of video editing and publishing to the web; how to make the most of their existing equipment; affordable options to improve video capture; and much more! To supplement the book, readers will gain sample videos that further demonstrate the techniques presented in the book.

### **Education, Skills and International Cooperation**

Few years ago, the topic of aerial robots was exclusively related to the robotics community, so a great number of books about the dynamics and control of aerial robots and UAVs have been written. As the control technology for UAVs advances, the great interaction that exists between other systems and elements that are as important as control such as aerodynamics, energy efficiency, acoustics, structural integrity, and applications, among others has become evident. Aerial Robots - Aerodynamics, Control, and Applications is an attempt to bring some of these topics related to UAVs together in just one book and to look at a selection of the most relevant problems of UAVs in a broader engineering perspective.
