Published by OpenStax College, U.S. History covers the breadth of the chronological history of the United States and also provides the necessary depth to ensure the course is manageable for instructors and students alike. U.S. History is designed to meet the scope and sequence requirements of most courses. The authors introduce key forces and major developments that together form the American experience, with particular attention paid to considering issues of race, class and gender. The text provides a balanced approach to U.S. history, considering the people, events and ideas that have shaped the United States from both the top down (politics, economics, diplomacy) and bottom up (eyewitness accounts, lived experience).

The Iron Age

The moving wartime story of friendship and heroism, set against the dramatic backdrop of the World War II Battle of Dunkirk In the marshes of Essex, one of the last wild places left in England, a disfigured artist lives alone in an abandoned lighthouse. Shunned by society, he spends his days painting scenes of the coast and the birds that migrate to the meadowlands every winter. His days are solitary

until one November afternoon, a young girl from a nearby village comes to his door carrying a wounded snow goose in her arms. The unlikely pair develop a friendship that deepens over the ensuing years, waiting together for the arrival of the birds every autumn. In 1940, with England at war, the birds depart early from the shores. The man, too, is called away by his duty as an Englishman to help evacuate the soldiers stranded on the beaches of Dunkirk. A moving tale of love, war, bravery, and sacrifice.

A university campus is a place with special resonance: conjuring images of cloistered quadrangles and wood-panelled libraries, often echoing centuries of scholarly tradition. And yet it is also a place of cutting-edge science, interactive learning, youth, vibrancy, and energy. It is this dual nature which makes the physical environment of a university so dynamic as well as a highly challenging landscape to design and manage successfully. Today, the scale of the pressures and the rate of change facing higher education institutions are greater than ever. Squeezed public spending, rising tuition fees and the growing education ambitions of developing nations are set against a backdrop of rapid technological progress and changing pedagogies. What are the repercussions for the physical realities of university planning and architecture? And how are university campuses adapting to contend with these pressures? University Trends introduces the most significant, widespread and thought-provoking trends in campus design today. Part 1 identifies current trends such as starchitecture, large-scale campus extensions, adaptive re-use, and international branch campuses. Part 2 profiles each trend via highly-illustrated, global case studies of well-publicised as well as lesser-known projects. The essential guide to current and future trends in campus design.

The Guardian publishes over forty thousand reader comments a day below the line. This is a miscellany of the best and most baffling thoughts from their witty, well-meaning readers. In the book, Guardian readers ponder the big questions ('Am I the only one who thinks that ham and cheese is a ghastly mix?') reflect with nostalgia on better days ('Airline employees were so much more agreeable back when they were all drunk') and share hard-won wisdom ('Dishwashers make lousy salmon poachers'). This book is best enjoyed with a soy latte in hand and yoga mat under the arm. Please store in an eco-friendly tote bag.

A Wrinkle in Time is the winner of the 1963 Newbery Medal. It was a dark and

stormy night—Meg Murry, her small brother Charles Wallace, and her mother had come down to the kitchen for a midnight snack when they were upset by the arrival of a most disturbing stranger. "Wild nights are my glory," the unearthly stranger told them. "I just got caught in a downdraft and blown off course. Let me sit down for a moment, and then I'll be on my way. Speaking of ways, by the way, there is such a thing as a tesseract." A tesseract (in case the reader doesn't know) is a wrinkle in time. To tell more would rob the reader of the enjoyment of Miss L'Engle's unusual book. *A Wrinkle in Time*, winner of the Newbery Medal in 1963, is the story of the adventures in space and time of Meg, Charles Wallace, and Calvin O'Keefe (athlete, student, and one of the most popular boys in high school). They are in search of Meg's father, a scientist who disappeared while engaged in secret work for the government on the tesseract problem.

In the music classroom, instructors who hope to receive aid are required to provide data on their classroom programs. Due to the lack of reliable, valid large-scale assessments of student achievement in music, however, music educators in schools that accept funds face a considerable challenge in finding a way to measure student learning in their classrooms. From Australia to Taiwan to the Netherlands, music teachers experience similar struggles in the quest for a definitive assessment resource that can be used by both music educators and researchers. In this two-volume Handbook, contributors from across the globe come together to provide an authority on the assessment, measurement, and evaluation of student learning in music. The Handbook's first volume emphasizes international and theoretical perspectives on music education assessment in the major world regions. This volume also looks at technical aspects of measurement in music, and outlines situations where theoretical foundations can be applied to the development of tests in music. The Handbook's second volume offers a series of practical and US-focused approaches to music education assessment. Chapters address assessment in different types of US classrooms; how to assess specific skills or requirements; and how assessment can be used in tertiary and music teacher education classrooms. Together, both volumes of *The Oxford Handbook of Assessment in Music Education* pave the way forward for music educators and researchers in the field.
