Continental philosophy has entered a new period of ferment. The long deconstructionist era was followed with a period dominated by Deleuze, which has in turn evolved into a new situation still difficult to define. However, one common thread running through the new brand of continental positions is a renewed attention to materialist and realist options in philosophy. Among the leaders of the established generation, this new focus takes numerous forms. It might be hard to find many shared positions in the writings of Badiou, DeLanda, Laruelle, Latour, Stengers, and i ek, but what is missing from their positions is an obsession with the critique of written texts. All of them elaborate a positive ontology, despite the incompatibility of their results. Meanwhile, the new generation of continental thinkers is pushing these trends still further, as seen in currents ranging from transcendental materialism to the London-based speculative realism movement to new revivals of Derrida. As indicated by the title The Speculative Turn, the new

currents of continental philosophy depart from the text-centered hermeneutic models of the past and engage in daring speculations about the nature of reality itself. This anthology assembles authors, of several generations and numerous nationalities, who will be at the centre of debate in continental philosophy for decades to come."

This introductory graduate text is based on a graduate course the author has taught repeatedly over the last ten years to students in applied mathematics, engineering sciences, and physics. Each chapter begins with an introductory development involving ordinary differential equations, and goes on to cover such traditional topics as boundary layers and multiple scales. However, it also contains material arising from current research interest, including homogenisation, slender body theory, symbolic computing, and discrete equations. Many of the excellent exercises are derived from problems of up-to-date research and are drawn from a wide range of application areas.

Every day, billions of photographs, news stories, songs, X-rays, TV shows, phone calls, and emails are being scattered around the world as sequences of zeroes and ones: bits. We can't escape this explosion of digital information and few of us want to-the benefits are too seductive. The technology has enabled unprecedented innovation, collaboration, entertainment, and democratic participation. But the same engineering marvels are shattering centuries-old assumptions about privacy, identity, free expression, and personal control as more and more details of our lives are captured as digital data. Can you control who sees all that personal information about you? Can email be truly confidential, when nothing seems to be private? Shouldn't the Internet be censored the way radio and TV are? is it really a federal crime to download music? When you use Google or Yahoo! to search for something, how do they decide which sites to show you? Do you still have free speech in the digital world? Do you have a voice in shaping government or corporate policies about any of this? Blown to Bits offers provocative answers to these questions and tells intriguing real-life stories. This book is a wake-up call To

The human consequences of the digital explosion.

Kathryn B. McKee's Reading Reconstruction situates Mississippi writer Katharine Sherwood Bonner McDowell (1849-1883) as an astute cultural observer throughout the 1870s and 1880s who portrayed the discord and uneasiness of the Reconstruction era in her fiction and nonfiction works. McKee reveals conflicts in Bonner's writing as her newfound feminism clashes with her resurgent racism, two forces widely prevalent and persistently oppositional throughout the late nineteenth century. Reading Reconstruction begins by tracing the historical

contexts that defined Bonner's life in postwar Holly Springs. McKee explores how questions of race, gender, and national citizenship permeated Bonner's social milieu and provided subject matter for her literary works. Examining Bonner's writing across multiple genres, McKee finds that the author's wry but dark humor satirizes the foibles and inconsistencies of southern culture. Bonner's travel letters, first from Boston and then from the capitals of Europe, show her both embracing and performing her role as a southern woman, before coming to see herself as simply "American" when abroad. Like *unto Like*, the single novel she published in her lifetime, directly engages with Mississippi's postbellum political life, especially its racial violence and the rise of Lost Cause ideology. Her two short story collections, including the raucously comic pieces in *Dialect Tales* and the more nostalgic *Suwanee River Tales*, indicate her consistent absorption in the debates of her time, as she ponders shifting definitions of citizenship, questions the evolving rhetoric of postwar reconciliation, and readily employs humor to disrupt conventional domestic scenarios and gender roles. In the end, Bonner's writing offers a telling index of the paradoxes and irresolution of the period, advocating for a feminist reinterpretation of traditional gender hierarchies, but verging only reluctantly on the questions of racial equality that nonetheless unsettle her plots. By challenging traditional readings of postbellum southern literature, McKee offers a long-overdue reassessment of Sherwood Bonner's place in American literary history.
