### Help Your Kids With Music

Semiretired mob guy Eddie DeCooch is caught trafficking contraband cigarettes through Trenton, New Jersey. When DeCooch fails to show for a court appearance, bond enforcement agent Stephanie Plum is assigned the task of finding him and dragging his decrepit ass back to jail. Not such an easy job, it turns out, since DeCooch has learned a lot of tricks over the years and isn't afraid to use his gun. He's already shot Loretta Ricci, an innocent old lady, and left her for worm food in his shed. He wouldn't mind shooting Stephanie next. Likeable losers (and Steph's former high school classmates) Walter "MoonMan" Dunphy and Dougie "The Dealer" Kruper have inadvertently become involved with DeCooch. They've gotten sucked into an operation that is much more than simple cigarette smuggling and holds risks far greater than anyone could

have imagined. When Dougie disappears, Steph goes into search mode. When Mooner disappears, she calls in the heavy artillery and asks master bounty hunter Ranger for help. Ranger's price for the job? One night with Stephanie, dusk to dawn. Not information she's want to share with her sometime live-in roommate, vice cop Joe Morelli, A typical dilemma in the world of Plum. And on the homefront, Stephanie's "perfect" sister, Valerie, has decided to move back to Trenton, bringing her two kids from hell with her. Grandma Mazur is asking questions about being a lesbian, and Bob, the bulimic dog, is eating everything in sight--including the furniture. Mud wrestling, motorcycles, fast cars, fast food, and fast men. It's Seven Up. Absolutely Janet Evanovich at her very best.

### **How to Survive Middle School**

Net als in haar vorige boeken ('Math doesn't suck', 'Kiss my math', Hot X, Algebra exposed') houdt McKellar een pleidooi voor wiskunde. Op haar kenmerkende enthousiaste manier laat ze zien dat kennis van wiskunde je niet alleen goede schoolresultaten bezorgt, maar ook van belang is in het dagelijkse leven. Geometrie bijvoorbeeld traint onze hersenen in logisch denken. Altijd handig om in een discussie niet alleen de emoties de bovenhand te laten halen.

If you live for wildly addictive, life-affirming taste sensations that knock you off your feet, but can't figure out how to make them at home, you have just found your kindred cookbook spirit. Welcome to Flavorbomb. You keep a running list of restaurants you go to for your favorite flavorbombs--a vibrant, pungent Caesar salad, extra crispy garlic fries, or a spicy puttanesca pasta maybe. You might even be able to articulate exactly what it is about those dishes that you find so addictive. But when you try to reproduce the same flavors at home, you find yourself falling short. If any of the above sounds familiar, this book is for you. For the past 25 years Bob Blumer has eaten his way around the globe, traveling millions of miles in search of culinary adventures and inspiring foods for three TV series and six cookbooks. Along the way, he's broken eight food-related Guinness World Records, competed in some of the most outrageous food competitions on the planet, cooked alongside countless amazing chefs, and sampled every local street food imaginable at ramshackle carts, hawker stalls, and night markets from Italy to India. These collective experiences have formed the backbone of Bob's cooking in ways that culinary school can't begin to teach. In Flavorbomb he channels everything he has gleaned into recipes and practical tips to help you you create bold, stimulating flavors, that will leave those you cook for in a state of bliss. Prepare to become a rock star in your own kitchen. The first half of the book is the real "money." It's full of tips, strategies, ingredients, techniques, and gear that will help you crack the code--and gain the confidence to take the leap on your own and turn any dish into a flavorbomb. We're talking developing the courage to season with wild abandon, brown your food to within an inch of its life, double down on the ingredients that can increase the pleasure factor, and taste and adjust on the

fly. The second half consists of 75 step-by-step recipes that use all the tricks in your arsenal to deliver the addictive, life-affirming dishes we all crave. And because Bob gets more excited by tacos than truffles, his outsider approach to creating addictive flavors won't require you to buy frivolous top-shelf ingredients or use super-sophisticated techniques. Instead, every recipe starts by building the foundation, and then adding layers of flavors and textures at every step of the way. If there's a hack or a simple trick that can save you time or up the ante--it's in here. Every recipe was thoroughly tested and had to earn its place in the book. Get ready to cook like every bite is your last. Read Flavorbomb and your cooking will be forever changed!

Ever the optimist, Anna forges on until she discovers that the papers she grades are not the work of her students, but of their high-priced, college-educated tutors. After uncovering this underground economy, where a teacher can make the same hourly rate as a Manhattan attorney, Anna is seduced by lucrative offers--one after another. Wiskunde is niet meteen het meest populaire vak op school. Meisjes hebben vaak koudwatervrees om er aan te beginnen. Maar wiskunde hoeft niet saai of moeilijk te zijn. Veel hangt af van de manier van aanpakken van de leerstof. Dit handboek wiskunde is bedoeld voor meisjes in het secundair onderwijs. De auteur wil meisjes aansporen om wiskunde niet uit de weg te gaan en hun studiekeuze niet te laten bepalen door het aantal uren wiskunde. Het boek is laagdrempelig opgevat. Zo komen alle voorbeelden om de leerstof te verduidelijken uit de leefwereld van de meisjes. De toon van het boek is luchtig (grappige titels) maar de inhoud is wel degelijk serieus. Extra's in het boek zijn een aantal kwisjes en de verhalen van vrouwen over het belang van wiskunde voor het uitoefenen van hun job.

The daughter of a Chilean father and a Filipina mother, Cecilia Rodriguez Aragon grew up as a shy, timid child in a small midwestern town during the 1960s. Targeted by school bullies and dismissed by many of her teachers, she worried that people would find out the truth: that she was INTF. Incompetent. Nerd. Terrified. Failure. This feeling stayed with her well into her twenties when she was told that “girls can’t do science” or “women just don’t know how to handle machines.” Yet in the span of just six years, Cecilia became the first Latina pilot to secure a place on the United States Unlimited Aerobatic Team and earn the right to represent her country at the Olympics of aviation, the World Aerobatic Championships. How did she do it? Using mathematical techniques to overcome her fear, Cecilia performed at air shows in front of millions of people. She jumped out of airplanes and taught others how to fly. She learned how to fund-raise and earn money to compete at the world level. She worked as a test pilot and contributed to the design of experimental airplanes, crafting curves of metal and fabric that shaped air to lift inanimate objects high above the earth. And best of all, she surprised everyone by overcoming the prejudices people held about her because of her race and her gender. Flying Free is the story of how Cecilia Aragon broke free from expectations and rose above her own limits by combining her passion for flying with math and logic in unexpected ways. You don’t have to be a math whiz or a science geek to learn from her story. You just have to want to soar.
