He also encompasses the mind-set that is required in order to be successful at publishing and starting your own company. This is not just a how to book, but is the total package that targets a specific model of publishing that is taking the publishing world by storm. Dr. Mruk has produced a highly readable new edition of his original work on an often misunderstood psychological construct--self-esteem. Mruk's view that self-esteem is a critically important influence on psychological adjustment and quality of life is now an accepted tenet in personality theory. Lack of self-esteem is frequently a precursor to depression, suicidal behavior, and other personality disorders. Nonetheless, the clinical diagnosis of self-esteem problems has lacked the basis of an overarching theory. Dr. Mruk's comprehensive analysis distills the literature on self-esteem into practical and reliable treatment methods for both clinicians and researchers. One important concern of governments in developing countries is how to phase out large safety net programs. The authors evaluate the short-run effects of one possible exit strategy-programs that promote self-employment-in Argentina. They provide evidence that a small fraction of beneficiaries were attracted by this program. Overall, potential participants to self-employment are more likely to be female household heads and more educated beneficiaries relative to the average Jefes beneficiaries. Using nonexperimental methods, the authors show that participation in the program does affect the labor supply of participants, by reducing the probability of having an outside job, especially for males, and increasing the total number of hours worked. But the intervention fails to produce on average income gains to participating individuals and households in the short run. The fact that a small subset of former welfare beneficiaries are attracted to the program, coupled with the fact that only a subset
