### The Treasure of Cocos Island

The World Bank and IMF are placing increasing emphasis on projects aimed at improving the management of public finances. An integrated treasury system forms the backbone for recording and processing all transactions. This book provides a treasury reference model (TRM) to give guidelines for the design of automated treasury systems for governments. It provides detailed flow charts of the functional processes associated with Treasury systems. This book also includes a diagnostic questionnaire that could be used to evaluate country specific requirements as well as a set of sample functional specifications that could be used for procurement and/or development of the application software that would be required to implement these systems.

### A Hero of Realms

A whip-smart account of the author's turbulent 20s, told in a "self-effacing and wryly humorous young voice in the tenor of Sloan Crosley and Lena Dunham" (Booklist). When 22-year-old Lilibet Snellings moved to Los Angeles on a whim, she unintentionally became a "slash" to keep her head above water—a writer/waitress/actress/Box Girl. One night each week, Lilibet would go to The Standard Hotel in West Hollywood, don a pair of white boy shorts with a matching tank, touch up her lip gloss, and crawl into a giant glass case behind the front desk. There, she could do whatever she wanted—check email, catch up on reading, even sleep—as long as she ignored the many hotel guests who would point and ask the staff, "Is she allowed to use the bathroom?" (Yes.) Dog-paddling through her twenties, Snellings resisted financial bailouts (for the most part) from her parents, while pondering her peculiar position as a human art installation. Was she a piece of art or a piece of ass? Was she allowed to read both Walt Whitman and US Weekly as she lounged in an oversized, waterless aquarium behind a hotel concierge desk? From misinterpreting a modeling agency interview as a talent audition, to avoiding Bond-girl-style deaths at New Year's Eve parties, Snellings shares and laughs at her many mishaps while living in LA. "One part Joan Didion,

one part Holly Golightly, Lilibet Snellings has given us, in Box Girl, a hilarious and utterly original account of coming of age in L.A.” —Dana Goodyear

Ten possible futures. Two lives. One enduring friendship. Sam and Tara. Best friends in a future when artificial intelligence organises our lives, and micropets are the latest craze. Best friends when rationing means cold showers and no internet. Best friends when genetic matching makes asking a girl on a date a minefield of epic proportions. But will they still be best friends in a future when plague wipes out most of humanity? Or a future when the Inquisitor asks Sam to choose one betrayal over another? Michael Pryor, one of Australia's best authors of speculative fiction, imagines what our next 100 years might be like. Utopia or dystopia? Miracle or catastrophe? Whatever might happen, it's just around the corner. Which future will be yours?

## **A Shade of Vampire 30: a Game of Risk**

This paper recounts Chile's experience with capital account policies since the 1990s. We present how two external shocks were confronted under very different macroeconomic and capital account frameworks. We show that during the 1997-98 Asian-LTCM-Russia crisis, a closed capital account and relatively rigid exchange rate severely constrained the monetary policy response to the shock, aggravating the fall in domestic demand. During the 2008-09 crisis, a full-fledged inflation targeting framework allowed the authorities to implement a significant countercyclical response. We argue that domestic stability considerations lay behind the policy regime switch toward capital account liberalization from 1999 onwards.

### **The Divine Center**

Gene Control offers a current description of how gene expression is controlled in eukaryotes, reviewing and summarizing the extensive primary literature into an easily accessible format. Gene Control is a comprehensively restructured and expanded edition of Latchman's Gene Regulation: A Eukaryotic Perspective, Fifth Edition. The first part of the book deals with the fundamental processes of gene control at the levels of chromatin structure, transcription, and post-transcriptional processes. Three pairs of chapters deal with each of these aspects, first describing the basic process itself, followed by the manner in which it is involved in controlling gene expression. The second part of the book deals with the role of gene control in specific biological processes. Certain chapters deal with the importance of gene control in cellular signaling processes and for normal development of the embryo. Another chapter discusses the key roles played by gene-regulatory processes in the specification of differentiated cell types such as muscle cells and neurons. The final chapters discuss the consequences of errors in gene control; the relationship between gene misregulation and human diseases, especially cancer; and potential therapies designed specifically to target particular levels of gene control. Gene Control will be of value to students in biological sciences, as well as to scientists and clinicians interested in how genes are regulated in health and disease.
