## **The SBL Handbook of Style**

Health care is primarily about people-to-people interactions. It is about understanding, diagnosis, physical contact, communication, and, ultimately, providing care. By bringing people together, telecommunication technologies have the potential to improve both the quality of and access to health care in the remotest areas of the developing world. Telemedicine offers solutions for emergency medical assistance, long-distance consultation, administration and logistics, supervision and quality assurance, and education and training for healthcare professionals and providers. This book aims to redress the relative lack of published information on successful telehealth solutions in the developing world. It presents real-life stories from Asia, Africa, and Latin America. It is rich in practical experience and will be of interest to health professionals, development workers, and e-health and telehealth proponents interested in learning about, or contributing to the implementation of, appropriate solutions for 80% of the world's population.

## **Practical Approach to the Management and Treatment of Venous Disorders**

### **Interventional Critical Care**

This book shall assist the microscopist in a practical way, with the help of three mainstays, a. clinical information, b. the resources a standard histopathology laboratory may offer and c. the light microscope, to approach and solve the diagnostic problems he/she may face in the field of dermatopathology. In fact, this is the way in which the senior author of this book has been successfully working over thirty years in his capacity as director of a private dermatopathology laboratory.

### **14th Nordic-Baltic Conference on Biomedical Engineering and Medical Physics**

With the implementation of the “Belt and Road” Initiative and the development of Guangdong-Hong Kong-Macau Greater Bay Area, the demand for translators and interpreters continues to grow in China. The breakthrough in artificial intelligence, which has contributed to an enormous improvement in the quality of machine

translation, means challenges and opportunities for translators and interpreters as well as studies of translation and interpreting. Studies of translation and interpreting have been further expanded and diversified in the era of globalized communications. The interrelation between translation and globalization is essential reading for not only scholars and educators, but also anyone with an interest in translation and interpreting studies, or a concern for the future of our world's languages and cultures. By focusing on the connection between the two, various researches have been conducted in all forms of communication between languages, including translation, interpreting, cross-cultural communication, language teaching, and the various specializations involved in such activities. This has resulted in The Third International Conference on Globalization: Challenges for Translators and Interpreters co-organized by the School of Translation Studies, Jinan University on its Zhuhai campus and South China Business College, Guangdong University of Foreign Studies, November 16-17, 2019. The response to the conference was once more overwhelming, which was partly attributed to the previous two conferences held successfully under the same title. Apart from five keynote speakers, over one hundred and fifty participants came from universities, institutions or organizations from mainland China, Spain, New Zealand, as well as Hong Kong and Macao to attend the event, contributing over 130 papers in total. Among the keynote speakers are internationally renowned scholars in translation studies, such as Dr. Roberto Valdeón, professor of English Linguistics at the University of Oviedo, Spain, and the Chief Editor of *Perspective: Studies in*

Translatology; Dr. Sun Yifeng, chair professor of Translation Studies and head of the English Department at the University of Macau; Dr. Tan Zaixi, distinguished professor of Shenzhen University and Chair Professor of Beijing Foreign Studies University, and Professor Emeritus of Hong Kong Baptist University. After careful evaluation and compilation, 90 papers have been selected for this conference proceedings, which was summarized into the following four topics: “Translation and Interpreting Theory and Practice,” “Translation and Cross-cultural Studies,” “Evaluation of Translation and Interpretation,” and “Studies on the Teaching of Translation.” By no means is it difficult to find some interesting and thought-provoking papers under each topic. For example, concerning “Translation and Interpreting Theory and Practice,” “To Translate or not to Translate? That is the Question----On Metaphor Translation in Chinese Political works” (by Dong Yu) explains that in judging whether or not a Chinese metaphor can be translated into English, an indispensable step is to decide whether or not the two cultural connotations can be connected. But this can easily be influenced by subjective factors. Yu has suggested some ways in which subjective factors could be controlled to some extent so that the translator could be more confident in his or her decision. He has also suggested three steps. The first step is to assume that the cultural connotation of the Chinese metaphor can be connected with that of its English version. For example, the metaphor “雨” in “雨过天晴” could be translated as rain or shine; The second step is to find out whether or not this translated version is acceptable both linguistically and culturally in English. The third step is

to consider the systematicity of the metaphor in regard with the context in both the source and target texts. This involves a process of recontextualization. When it comes to “Translation and Cross-cultural Studies”, “On Translation of the English Guide-interpreter from the Perspective of Intercultural Communication” (by Fengxia Liua and Xiaoning Bi), points out that inbound tourism serves as a window through which foreign tourists get to know China, so the interaction between the guide-interpreters and foreign tourists are the typical activity of cultural communication. Foreign-language-speaking guides are usually regarded as “people-to-people ambassadors” or “cultural ambassadors”, who have played an essential role in the international tourist industry. Therefore, they argue that it is extremely important for tourist guides to cultivate their cross-cultural communication awareness, enhance their overall communicative competence, observe and distinguish east-and-west differences with multi-dimensional perspective, transcend cultural barriers and learn to use translation skills. “Studies on the Teaching of Translation” is another interesting topic that has attracted enormous attention, such as “Business Translation Teaching from the Perspective of Metaphors” (by Dandan Li) which explores application of conceptual metaphor theory in the translation process of business lexicons, business discourse and business English culture so as to provide a new perspective in business English pedagogy. Another study entitled “Cognitive Studies in Translation” (by Xin Huang), analyzes the cognitive studies of translation / interpreting processes over the past three decades, with focus on the issues examined, the findings reached as

well as the recent development. She explains that cognitive studies of translation process examine the translation competence, on-line translation behaviors such as how the eye gazes and how the words are typed and the brain activities when doing translation. Special interests are paid to the working memory, problem-solving, the executive function and some linguistic relative factors such as text difficulty. Over the past thirty years, the interest in the field has been gaining considerable momentum and increasing issues have been involved. Finally, she concludes that with the advancement of technologies and interdisciplinary approaches, the black box, the previously unforeseeable cognitive activities of how human process translation, can be unfolded. Considering the importance of integrating theory with practice, the proceedings are therefore compiled in such a way as to be balanced and inclusive in the hope of summarizing current accomplishments as well as providing certain insights for teaching and further research in the field of translation and interpretation studies.

### **The Bios Companion**

"University Physics is a three-volume collection that meets the scope and sequence requirements for two- and three-semester calculus-based physics courses. Volume 1 covers mechanics, sound, oscillations, and waves. This textbook emphasizes connections between theory and application, making physics concepts interesting and accessible to students while maintaining the mathematical rigor

inherent in the subject. Frequent, strong examples focus on how to approach a problem, how to work with the equations, and how to check and generalize the result."--Open Textbook Library.

### **Madness and Civilization**

When oral culture becomes literate, in what way does human consciousness itself change? And how does the new form of communication affect the content and meaning of texts? In this book, one of the most original and penetrating thinkers in Greek studies describes the transformation from orality to literacy in classical times and reflects upon its continued meaning for us today. "Fresh insights into the orality-literacy shift in human consciousness from one who has long been studying this shift in ancient Greece and has now brought his vast learning and reflections to bear on our own times. This book is for a wide audience and calls for thoroughly rethinking current views on language, thought, and society from classical scholarship through modern philosophy, anthropology, and poststructuralism."--Walter J. Ong "All in all, we have in this book the summary statement of one of the great pioneers in the study of oral and literate culture, fascinating in its scope and rewarding in its sophistication. As have his other works, this book will contribute mightily to curing the biases resulting from our own literacy."--J. Peter Denny, Canadian Journal of Linguistics "An extremely useful summary and extension of the revisionist thinking of Eric Havelock, whom most

classicists and comparatists would rank among the premier classical scholars of the last three decades. . . . The book presents important (though controversial) ideas in. . . an available format."--Choice

## **Encyclopedia of Artificial Intelligence**

This work has been selected by scholars as being culturally important and is part of the knowledge base of civilization as we know it. This work is in the public domain in the United States of America, and possibly other nations. Within the United States, you may freely copy and distribute this work, as no entity (individual or corporate) has a copyright on the body of the work. Scholars believe, and we concur, that this work is important enough to be preserved, reproduced, and made generally available to the public. To ensure a quality reading experience, this work has been proofread and republished using a format that seamlessly blends the original graphical elements with text in an easy-to-read typeface. We appreciate your support of the preservation process, and thank you for being an important part of keeping this knowledge alive and relevant.

## **Morals and Dogma of the Ancient and Accepted Scottish Rite of Freemasonry**

## **Popular Photography**

As we embark into the 21st century, we need to address new challenges ranging from population growth, climate change, and depletion of natural resources to providing better health care, food security and peace to humankind, while at the same time protecting natural ecosystems that provide the services which allow life to flourish on Earth. To meet those challenges, profound changes are required in the way that societies conduct their everyday affairs, ways that will lead to better preservation, protection and sustainable management of natural resources with long lasting impacts. The aim of CleanWAS 2016 is to provide productive opportunities for academics and practitioners from interdisciplinary fields of Environmental Sciences to meet, share and bring expertise and ideas in related disciplines. The CleanWAS conference was first organized in the year 2012. It is an annual event organised by the International Water, Air and Soil Conservation society (INWASCON) and is supported by various Malaysian (UKM, UMS, UIAM) and Chinese universities (CUG, NKU, SYSU).

## **Olympus OM's**

This collection focuses on all aspects of science and technology related to friction stir welding and processing.

## **Masters Theses in the Pure and Applied Sciences**

This is a facsimile edition of Sir Charles Eliot's great work on Hinduism and Buddhism, first published in 1921. Begun in 1907, it was practically complete when the World War I broke out. The author lived for some time in the Far East, and paid many visits to India, during which time he was able to collect and collate the vast amount of information presented here. This collection examines, amongst other things, the influence of Indian thought in Eastern Asia, the origin and growth of Hinduism, Eastern polytheism, Hindu and Buddhist scriptures, and new forms of Buddhism.

## **Advances in Environmental Science and Engineering**

Train your mind to achieve new levels of success! Professionals and entrepreneurs do a great job of keeping up appearances. But if they're honest with themselves, they're short on living the life they really want. Train Your Brain For Success provides the perspective to analyze how you got where you are and, more importantly, learn the skills to get where you truly desire to be. Train Your Brain For Success explains specific ways of thinking and acting that will get anyone where they want to go, fast. Learn to condition your mind to move towards success automatically, by discovering greater memory power and fundamental techniques

for boosting reading speed and comprehension. Get a proven strategy for succeeding and becoming a record-breaking performer. Learn to live in the moment Become brilliant with the basics Aggressively take care of your mind Train your mind for new levels of success by boosting memory power, reading speed and comprehension.

### **Friction Stir Welding and Processing VII**

This book constitutes the refereed joint proceedings of the First International Workshop on OR 2.0 Context-Aware Operating Theaters, OR 2.0 2018, 5th International Workshop on Computer Assisted Robotic Endoscopy, CARE 2018, 7th International Workshop on Clinical Image-Based Procedures, CLIP 2018, and the First International Workshop on Skin Image Analysis, ISIC 2018, held in conjunction with the 21st International Conference on Medical Imaging and Computer-Assisted Intervention, MICCAI 2018, in Granada, Spain, in September 2018. The 11 full papers presented at OR 2.0 2018, the 5 full papers presented at CARE 2018, the 8 full papers presented at CLIP 2018, and the 10 full papers presented at ISIC 2018 were carefully reviewed and selected. The OR 2.0 papers cover a wide range of topics such as machine vision and perception, robotics, surgical simulation and modeling, multi-modal data fusion and visualization, image analysis, advanced imaging, advanced display technologies, human-computer interfaces, sensors. The CARE papers cover topics to advance the field of computer-assisted and robotic

endoscopy. The CLIP papers cover topics to fill gaps between basic science and clinical applications. The ISIC papers cover topics to facilitate knowledge dissemination in the field of skin image analysis, as well as to host a melanoma detection challenge, raising awareness and interest for these socially valuable tasks.

### **PROCEEDINGS OF THE THIRD INTERNATIONAL CONFERENCE ON GLOBALIZATION: CHALLENGES FOR TRANSLATORS AND INTERPRETERS**

Contamination of foods and agricultural commodities by various types of toxigenic fungi is a concerning issue for human and animal health. Moulds naturally present in foods can produce mycotoxins and contaminate foodstuffs under favourable conditions of temperature, relative humidity, pH, and nutrient availability. Mycotoxins are, in general, stable molecules that are difficult to remove from foods once they have been produced. Therefore, the prevention of mycotoxin contamination is one of the main goals of the agriculture and food industries. Chemical control or decontamination techniques may be quite efficient; however, the more sustainable and restricted use of fungicides, the lack of efficiency in some foods, and the consumer demand for chemical-residue-free foods require new approaches to control this hazard. Therefore, food safety demands continued

research efforts for exploring new strategies to reduce mycotoxin contamination. This Special Issue contains original contributions and reviews that advance the knowledge about the most current promising approaches to minimize mycotoxin contamination, including biological control agents, phytochemical antifungal compounds, enzyme detoxification, and the use of novel technologies.

### **Environmental Conservation, Clean Water, Air & Soil (CleanWAS)**

### **Office and Operative Hysteroscopy**

14th Nordic - Baltic Conference on Biomedical Engineering and Medical Physics - NBC-2008 - brought together scientists not only from the Nordic - Baltic region, but from the entire world. This volume presents the Proceedings of this international conference, jointly organized by the Latvian Medical Engineering and Physics Society, Riga Technical University and University of Latvia in close cooperation with International Federation of Medical and Biological Engineering (IFMBE) The topics covered by the Conference Proceedings include: Biomaterials and Tissue Engineering; Biomechanics, Artificial Organs, Implants and Rehabilitation; Biomedical Instrumentation and Measurements, Biosensors and

Transducers; Biomedical Optics and Lasers; Healthcare Management, Education and Training; Information Technology to Health; Medical Imaging, Telemedicine and E-Health; Medical Physics; Micro- and Nanoobjects, Nanostructured Systems, Biophysics

### **System on Chip Design Languages**

This volume presents the proceedings of the 7th Asian-Pacific Conference on Medical and Biological Engineering (APCMBE 2008). Themed "Biomedical Engineering – Promoting Sustainable Development of Modern Medicine" the proceedings address a broad spectrum of topics from Bioengineering and Biomedicine, like Biomaterials, Artificial Organs, Tissue Engineering, Nanobiotechnology and Nanomedicine, Biomedical Imaging, Bio MEMS, Biosignal Processing, Digital Medicine, BME Education. It helps medical and biological engineering professionals to interact and exchange their ideas and experiences.

### **Leading in a Culture of Change**

Vols. for 1853- include the transactions of the Royal Photographic Society of Great Britain.

## **Novel Approaches to Minimising Mycotoxin Contamination**

Dealing with a new surgical procedure for out-patients, this book is the result of surgical practice and teaching experience in the field of hysteroscopic procedures.

## **Phytopathology in Plants**

The present volumes contain selected papers in the fields of Environmental Chemistry and Biology; Environmental Materials; Environmental Safety and Health; Environmental Planning and Assessment; Environmental Analysis and Monitoring; Environmental Engineering; Pollution Control Projects (Air, Water, Solid); Waste Disposal and Recycling; Water Supply and Drainage Engineering; Sound, Noise and Vibration Control; Clean Production Processes; Hydrology and Water Resources Engineering; Architectural Environment & Equipment Engineering; Soil and Water Conservation and Desertification Control; Environmental Protection; Cultivation and Conservation of Forest; Plant Protection and Biotechnology; Geographic Information and Remote Sensing Science; Land Resources Environment and Urban Planning. This up-to-date, comprehensive and worldwide state-of-the art knowledge will be of great value to anyone working in these fields.

## **World Congress on Medical Physics and Biomedical Engineering**

## **2018**

This book provides a comprehensive, state-of-the art review of the interventional procedures that can be performed in intensive care settings. The book addresses fundamentals of the indications and technical aspects of procedures, and identifies pitfalls and resource needs. In addition, a section is dedicated to a discussion of the staff-preparation, hemodynamic, and anesthetic concerns necessary for all procedures. Chapters focus on the following specific concerns: airway, thoracic, ENT, vascular, abdominal, genitourinary, neurologic, and musculoskeletal. A brief review of the existing literature addressing these particular topics accompanies each section. Extensive illustrations and diagrams are also included to enhance the readers' experience. Authored by a multi-disciplinary team of experts in their fields, *Interventional Critical Care: A Manual for Advanced Care Practitioners* serves as a comprehensive resource for advanced care practitioners and physicians for performing and preparing for procedures in the ICU.

## **The PC Engineer's Reference Book**

## **Telehealth in the Developing World**

"This book is a comprehensive and in-depth reference to the most recent developments in the field covering theoretical developments, techniques, technologies, among others"--Provided by publisher.

## **OR 2.0 Context-Aware Operating Theaters, Computer Assisted Robotic Endoscopy, Clinical Image-Based Procedures, and Skin Image Analysis**

"At the very time the need for effective leadership is reaching critical proportions, Michael Fullan's *Leading in a Culture of Change* provides powerful insights for moving forward. We look forward to sharing it with our grantees." --Tom Vander Ark, executive director, Education, Bill and Melinda Gates Foundation "Fullan articulates clearly the core values and practices of leadership required at all levels of the organization. Using specific examples, he convinces us that the key change principles are equally critical for leadership in business and education organizations." --John Evans, chairman, Torstar Corporation "In *Leading in a Culture of Change*, Michael Fullan deftly combines his expertise in school reform with the latest insights in organizational change and leadership. The result is a compelling and insightful exposition on how leaders in any setting can bring about lasting, positive, systemic change in their organizations." --John Alexander, president, Center for Creative Leadership "Michael Fullan's work is remarkable. He

masterfully captures how leaders can significantly improve their learning and performance, even in the uncontrollable, chaotic circumstances in which they practice. A tour de force." --Anthony Alvarado, chancellor of instruction, San Diego City Schools "Too often schools and businesses are seen as separate and foreign places. Michael Fullan blends the best of knowledge from each into an exemplary template for improving leadership in both." --Terrence E. Deal, coauthor of *Leading with Soul* Business, nonprofit, and public sector leaders are facing new and daunting challenges--rapid-paced developments in technology, sudden shifts in the marketplace, and crisis and contention in the public arena. If they are to survive in this chaotic environment, leaders must develop the skills they need to lead effectively no matter how fast the world around them is changing. *Leading in a Culture of Change* offers new and seasoned leaders' insights into the dynamics of change and presents a unique and imaginative approach for navigating the intricacies of the change process. Michael Fullan--an internationally acclaimed expert in organizational change--shows how leaders in all types of organizations can accomplish their goals and become exceptional leaders. He draws on the most current ideas and theories on the topic of effective leadership, incorporates case examples of large scale transformation, and reveals a remarkable convergence of powerful themes or, as he calls them, the five core competencies. By integrating the five core competencies--attending to a broader moral purpose, keeping on top of the change process, cultivating relationships, sharing knowledge, and setting a vision and context for creating coherence in organizations--leaders will be

empowered to deal with complex change. They will be transformed into exceptional leaders who consistently mobilize their compatriots to do important and difficult work under conditions of constant change.

## **7th Asian-Pacific Conference on Medical and Biological Engineering**

The "one-stop" reference for authors preparing manuscripts in biblical studies and related fields.

## **Popular Photography**

This book (vol. 1) presents the proceedings of the IUPESM World Congress on Biomedical Engineering and Medical Physics, a triennially organized joint meeting of medical physicists, biomedical engineers and adjoining health care professionals. Besides the purely scientific and technological topics, the 2018 Congress will also focus on other aspects of professional involvement in health care, such as education and training, accreditation and certification, health technology assessment and patient safety. The IUPESM meeting is an important forum for medical physicists and biomedical engineers in medicine and healthcare learn and share knowledge, and discuss the latest research outcomes and

technological advancements as well as new ideas in both medical physics and biomedical engineering field.

### **The Muse Learns to Write**

Since the beginning of human civilization, plants have been our true companions. Plants contribute not only to our existence but also serve us through discovery, design and the treatment of various diseases where there is no satisfactory cure in modern medicine. This has focused Natural Product Chemists to unravel plants therapeutic potential in the light of modern analytical and pharmacological understandings. Presence of multiple active phytochemicals in medicinal plants offers exciting opportunity for the development of novel therapeutics, providing scientific justification for their use in traditional medicines. Non-food plants have been recognized as biofactories for the production of eco-friendly value added materials including agricultural, food products, enzymes, nutraceuticals etc. They have also been widely explored for personal care, industrial products and sources of energy generation. The proven efficacy of botanicals has been appreciated by the scientific community and strengthened plant-human relationship. The synergism in the Phytoproducts, the result of the interaction of two or more moieties, is not simply additive but multiplicative. Recent acceptance of the Food and Drug Administration (US) for herbal-medicine based preparation has renewed interest in Natural Product Research. The year 2011 is declared as the International

Year of Chemistry (IYC 2011) by the United Nations Assembly. On this occasion, the present conference CPHEE 2011 aims to offer chemists from diverse areas to come to a common platform to share the knowledge and unveil the chemistry and magic potentials of phytoproducts for the mankind.

### **Power, Process and Participation**

#### **Popular Photography**

This book focuses on participatory capacity-building in ways that address the practical needs and strategic interests of the disadvantaged and disempowered - it examines how differences in class, ethnicity, race, caste, religion, age and gender lead to the 'politics of exclusion'. It offers innovative, accessible tools to enable facilitators from both inside and outside communities to empower those who are frequently omitted from decision-making processes. The style and approach are interactive, stimulating reflection and involvement by all parties. Power, Process and Participation aims to enable facilitators from inside and outside communities to involve and empower those commonly excluded in decision making processes. It provides a balanced overview of how 'participation' has been used in this context and raises the questions that all those involved in this type of activity should ask

themselves. There are three distinct sections: Part 1: Definitions, history and issues - which provides an overview of some of the broad issues underlying the themes addressed in this book. A useful brief history is given of well known participatory methodologies and key questions are asked on the use and misuse of 'participation': whose ends does it serve, who is involved and what are the power relations, appropriate time frames and scale and how should it proceed in order to best serve the interests of the people involved? Part 2: Methods and ethics in our research and our use of the mediaN251pp - Whose expertise counts? How is it acknowledged? These are explored in the context of contributors' experience of undertaking research with women in Zimbabwe. Questions of ownership and consent as well as other issues are discussed further in the context of the use of video in participatory communication. Part 3: Tools for environmental and social change - The longest section in the book gives 35 tools and how to use them in facilitating participation. An introductory session explains how to use the section. Tools are cross referenced and for each the purpose, materials, process and estimated time is provided. For a number of the tools, examples of how they have been used in practice are included. Power, Process and Participation describes itself as a manual and although it does not immediately look like one, it is readable, logically arranged and combines instructions on how tools can be used with examples of how they have been used in practice. There are notes on how to use the book and how to choose from the tools offered. This book would be useful to anyone looking for both an overview of participation and how it can be used and

misused; and guidance on facilitating the process.

## **Robotic Cardiac Surgery**

Michel Foucault examines the archeology of madness in the West from 1500 to 1800 - from the late Middle Ages, when insanity was still considered part of everyday life and fools and lunatics walked the streets freely, to the time when such people began to be considered a threat, asylums were first built, and walls were erected between the "insane" and the rest of humanity.

## **University Physics**

## **Hinduism and Buddhism**

## **The Leica Manual a Manual for the Amateur and Professional Covering the Entire Field of Leica Photography**

"Innovation is universally recognized as a key components of first world economies that is vital for continued prosperity. Innovation is driven by the generation of

effective novelty in other words, creativity. However, both in higher education and also in business and industry, insufficient effort is being made to encourage and develop creativity, with negative consequences for innovation. This is partly due to inadequate understanding of what creativity is and how it can be fostered. This book draws on complementary views of creativity and innovation as a business process and as a social-psychological model to create a more detailed and more highly differentiated model which is capable of serving as a practical foundation for diagnosing, analyzing, optimizing and fostering creativity and innovation in a variety of organizational settings. It is built around a large number of case studies and down-to-earth examples, and offers many concrete suggestions for fostering what the authors call functional creativity."--Publisher's website.

### **Chemistry of Phytopotentials: Health, Energy and Environmental Perspectives**

This volume includes the latest research into the diseases that affect non-vascular plants. The chapters bring to light the most recent studies of pathogen identification, disease etiology, disease cycles, economic impact, plant disease epidemiology, plant disease resistance, how plant diseases affect humans and animals, pathosystem genetics, and management of plant diseases. The information provided here helps readers to stay current with this field's ongoing

research and ever-developing knowledge base.

### **Popular Photography**

Robotic Cardiac Surgery is a comprehensive guide to robotic/totally endoscopic cardiac surgery. The book is intended to provide in-depth information regarding the history of robotic surgical systems, their components and principles. It emphasizes patient selection, perioperative management, anesthesia considerations and management, operative techniques and management, postoperative care and results. Extensive, detailed photographs and illustrations of different kinds of robotic surgery are also included. It provides cardiac surgeons, cardiac anesthesiologists, and perfusionists with a comprehensive review of current robotic cardiac surgeries and related knowledge. Changqing Gao, MD, is a professor at the Department of Cardiovascular Surgery, PLA General Hospital, Beijing, China.

### **Popular Photography**

This book is the third in a series of books collecting the best papers from the three main regional conferences on electronic system design languages, HDLCon in the United States, APCHDL in Asia-Pacific and FDL in Europe. Being APCHDL bi-annual,

this book presents a selection of papers from HDLCon'01 and FDL'01. HDLCon is the premier HDL event in the United States. It originated in 1999 from the merging of the International Verilog Conference and the Spring VHDL User's Forum. The scope of the conference expanded from specialized languages such as VHDL and Verilog to general purpose languages such as C++ and Java. In 2001 it was held in February in Santa Clara, CA. Presentations from design engineers are technical in nature, reflecting real life experiences in using HDLs. EDA vendors presentations show what is available - and what is planned-for design tools that utilize HDLs, such as simulation and synthesis tools. The Forum on Design Languages (FDL) is the European forum to exchange experiences and learn of new trends, in the application of languages and the associated design methods and tools, to design complex electronic systems. FDL'01 was held in Lyon, France, around seven interrelated workshops, Hardware Description Languages, Analog and Mixed signal Specification, C/C++ HW/SW Specification and Design, Design Environments & Languages, Real-Time specification for embedded Systems, Architecture Modeling and Reuse and System Specification & Design Languages.
