Introductory Mathematical Analysis for Business, Economics

Introductory Mathematical Analysis for Business, Economics, and the Life and Social Sciences, Books a la Carte Edition / Edition 13 available in Other Format Add to Wishlist ISBN-10:

Introductory Mathematical Analysis for Business, Economics

Description. This book is ideal for one- or two-semester or two- or three-quarter courses covering topics in college algebra, finite mathematics, and calculus for students in business, economics, and the life and social sciences. Haeussler, Paul, and Wood establish a strong algebraic foundation that sets this text apart from other applied mathematics texts, paving the way for students to solve real-world problems that use calculus.

Introductory Mathematical Analysis for Business, Economics

For courses in Mathematics for Business and Mathematical Methods in Business. This classic text continues to provide a mathematical foundation for students in business, economics, and the life and social sciences. Abundant applications cover such diverse areas as business, economics, biology, medicine, sociology, psychology, ecology, statistics, earth science, and archaeology.

[PDF]Introductory Mathematical Analysis for Business

MAT 211: Mathematics for Business Analysis. Topics in business analysis, including: Lagrange multipliers, linear programming, linear algebra, intermediate probability, random variables, discrete distributions, and continuous distributions. Enroll requirements: Prerequisite (s): MAT 210, MAT 251, MAT 265 or MAT 270 with C or better.
