Turmeric

Historical Dictionary of Pyongyang

A comparative and historical analysis of foreign direct investment liberalization in China and India, explaining how the return of these countries' diasporas affects such liberalization.

Creative Management and Development

This book presents the combined proceedings of the 7th International Conference on Computer Science and its Applications (CSA-15) and the International Conference on Ubiquitous Information Technologies and Applications (CUTE 2015), both held in Cebu, Philippines, December 15 - 17, 2015. The aim of these two meetings was to promote discussion and interaction among academics, researchers and professionals in the field of computer science covering topics including mobile computing, security and trust management, multimedia systems and devices, networks and communications, databases and data mining, and ubiquitous computing technologies such as ubiquitous communication and networking, ubiquitous software technology, ubiquitous systems and applications,

security and privacy. These proceedings reflect the state-of-the-art in the development of computational methods, numerical simulations, error and uncertainty analysis and novel applications of new processing techniques in engineering, science, and other disciplines related to computer science.

Dog Days

Drug metabolism/pharmacokinetics and drug interaction studies have been extensively carried out in order to secure the druggability and safety of new chemical entities throughout the development of new drugs. Recently, drug metabolism and transport by phase II drug metabolizing enzymes and drug transporters, respectively, as well as phase I drug metabolizing enzymes, have been studied. A combination of biochemical advances in the function and regulation of drug metabolizing enzymes and automated analytical technologies are revolutionizing drug metabolism research. There are also potential drug-drug interactions with co-administered drugs due to inhibition and/or induction of drug metabolic enzymes and drug transporters. In addition, drug interaction studies have been actively performed to develop substrate cocktails that do not interfere with each other and a simultaneous analytical method of substrate drugs and their metabolites using a tandem mass spectrometer. This Special Issue has the aim of highlighting current progress in drug metabolism/pharmacokinetics, drug interactions, and bioanalysis.

Principles and Practice of Structural Equation Modeling

Creative Management and Development has been updated with newly commissioned and leading edge chapters on intuitive cognition, complexity, emotion, team innovation, development, and well-being. The textbook retains seminal papers on creativity, perception, style, culture, and sustainable development. The contributors to this textbook represent a broad spectrum of perspectives from among the most distinguished names in the field. They give a clear overview of the topics discussed while explaining their practical implications. This textbook is published as a Course Reader for The Open University Course Creativity, Innovation and Change (B822) but will engage and challenge students interested in creative ways of managing, different approaches to developing creativity in organizations and creative leadership.

When My Name Was Keoko

According to the Chinese zodiac, 2018 was the year of the 'earthly dog'. In the middle of the long, hot, and feverish dog days of the summer of 2018, some workers at Shenzhen Jasic Technology took their chances and attempted to form an independent union. While this action was met by the harshest repression, it also led to extraordinary demonstrations of solidarity from small groups of radical

students from all over the country, which in turn were immediately and severely suppressed. China's year of the dog was also imbued with the spirit of another canine, Cerberus—the three-headed hound of Hades—with the ravenous advance of the surveillance state and the increasing securitisation of Chinese society, starting from the northwestern region of Xinjiang. This Yearbook traces these latest developments in Chinese society through a collection of 50 original essays on labour, civil society, and human rights in China and beyond, penned by leading scholars and practitioners from around the world.

Advances in Computer Science and Ubiquitous Computing

Content analysis is one of the most important but complex research methodologies in the social sciences. In this thoroughly updated Second Edition of *The Content Analysis Guidebook*, author Kimberly Neuendorf draws on examples from across numerous disciplines to clarify the complicated aspects of content analysis through step-by-step instruction and practical advice. Throughout the book, the author also describes a wide range of innovative content analysis projects from both academia and commercial research that provide readers with a deeper understanding of the research process and its many real-world applications.

Diasporas and Foreign Direct Investment in China and India

Photocatalysis is a reaction which is accelerated by light while a heterogeneous reaction consists of two phases (a solid and a liquid for example). Heterogeneous Photocatalysis is a fast developing science which to date has not been fully detailed in a monograph. This title discusses the basic principles of heterogeneous photocatalysis and describes the bulk and surface properties of semiconductors. Applications of various types of photoreactions are described and the problems related to the modeling and design of photoreactors are covered.

Jade Palace Vendetta

In the second installment in the series, noble ronin Matsuyama Kaze continues the search for his lord's missing child, but when he saves a helpless merchant from a gang of killers, he realizes that everything is not what it seems.

The Septembers of Shiraz

This book presents the history of globalization as a network-based story in the context of Big History. Departing from the traditional historic discourse, in which communities, cities, and states serve as the main units of analysis, the authors instead trace the historical emergence, growth, interconnection, and merging of various types of networks that have gradually encompassed the globe. They also

focus on the development of certain ideas, processes, institutions, and phenomena that spread through those networks to become truly global. The book specifies five macro-periods in the history of globalization and comprehensively covers the first four, from roughly the 9th – 7th millennia BC to World War I. For each period, it identifies the most important network-related developments that facilitated (or even spurred on) such transitions and had the greatest impacts on the history of globalization. By analyzing the world system's transition to new levels of complexity and connectivity, the book provides valuable insights into the course of Big History and the evolution of human societies.

MultiCultural Review

A comprehensive study of the Hongzhou school of Chan Buddhism, long regarded as the Golden Age of this tradition, using many previously ignored texts, including stele inscriptions.

A Big History of Globalization

WINNER OF THE PULITZER PRIZE FOR FICTION An epic novel and a thrilling literary discovery, *The Orphan Master's Son* follows a young man's journey through the icy waters, dark tunnels, and eerie spy chambers of the world's most mysterious

dictatorship, North Korea. NATIONAL BOOK CRITICS CIRCLE AWARD FINALIST • DAYTON LITERARY PEACE PRIZE WINNER • LONGLISTED FOR THE AMERICAN LIBRARY ASSOCIATION'S ANDREW CARNEGIE MEDAL • WINNER OF THE CALIFORNIA BOOK AWARD FOR FICTION • NEW YORK TIMES BESTSELLER NAMED ONE OF THE BEST BOOKS OF THE YEAR BY The New Yorker • The Washington Post • Stephen King, Entertainment Weekly • The Wall Street Journal • Los Angeles Times • San Francisco Chronicle • Financial Times • Newsweek/The Daily Beast • The Plain Dealer • St. Louis Post-Dispatch • Milwaukee Journal Sentinel • Scott Turow, The Millions • Slate • Salon • BookPage • Shelf Awareness "The single best work of fiction published [this year] . . . The book's cunning, flair and pathos are testaments to the still-formidable power of the written word."—The Wall Street Journal Pak Jun Do is the haunted son of a lost mother—a singer "stolen" to Pyongyang—and an influential father who runs Long Tomorrows, a work camp for orphans. There the boy is given his first taste of power, picking which orphans eat first and which will be lent out for manual labor. Recognized for his loyalty and keen instincts, Jun Do comes to the attention of superiors in the state, rises in the ranks, and starts on a road from which there will be no return. Considering himself "a humble citizen of the greatest nation in the world," Jun Do becomes a professional kidnapper who must navigate the shifting rules, arbitrary violence, and baffling demands of his Korean overlords in order to stay alive. Driven to the absolute limit of what any human being could endure, he boldly takes on the treacherous role of rival to Kim Jong Il in an attempt to save the woman he loves,

Sun Moon, a legendary actress “so pure, she didn’t know what starving people looked like.” Part breathless thriller, part story of innocence lost, part story of romantic love, *The Orphan Master’s Son* is also a riveting portrait of a world heretofore hidden from view: a North Korea rife with hunger, corruption, and casual cruelty but also camaraderie, stolen moments of beauty, and love. A towering literary achievement, *The Orphan Master’s Son* ushers Adam Johnson into the small group of today’s greatest writers. Praise for *The Orphan Master’s Son* “An exquisitely crafted novel that carries the reader on an adventuresome journey into the depths of totalitarian North Korea and into the most intimate spaces of the human heart.”—Pulitzer Prize citation “Mr. Johnson has written a daring and remarkable novel, a novel that not only opens a frightening window on the mysterious kingdom of North Korea, but one that also excavates the very meaning of love and sacrifice.”—Michiko Kakutani, *The New York Times* “Rich with a sense of discovery . . . *The Orphan Master’s Son* has an early lead on novel of [the year].”—*The Daily Beast* “This is a novel worth getting excited about.”—*The Washington Post* “[A] ripping piece of fiction that is also an astute commentary on the nature of freedom, sacrifice, and glory.”—*Elle* From the Hardcover edition.

Countries and Territories of the World

An understanding of contemporary North Korea’s literature is virtually impossible without an investigation of its formative period, 1945–1960, which saw a gradual

transformation from the initial "Soviet era" to a Korean version of "national Stalinism." This turbulent epoch established a long-lasting framework for North Korean literature and set up an elaborate system of political control over literary matters, as well as over the people who served in this field. In 1946 Democratic People's Republic of Korea (DPRK) leader Kim Il Sung described the country's writers as "soldiers on the cultural front," thus clearly defining what the nascent Communist regime expected from its intellectuals. As a result, many literary nonentities were rewarded with fame and success (often only to be relegated once again to obscurity within a few years) while many outstanding luminaries of the past were erased from the pages of official publications or even lost their lives. The Soviet cultural impact brought new tropes, artistic images, and rhetoric, which were quickly absorbed into the North Korean discourse. However, the cultural politics of the DPRK and the USSR revealed profound and irreconcilable disparities that were rooted in the different political conditions and traditions of each country. *Soldiers on the Cultural Front* presents the first consistent research on the early history of North Korea's literature and literary policy in Western scholarship. It traces the introduction and development of Soviet-organized conventions in North Korean literary propaganda and investigates why the "romance with Moscow" was destined to be short lived. It reconstructs the biographies and worldviews of major personalities who shaped North Korean literature and teases these historical figures out of popular scholarly myth and misconception. The book also investigates the specific forms of control over intellectuals and literary matters in

North Korea. Considering the unique phenomenon of North Korean literary critique, the author analyzes the political campaigns and purges of 1947–1960 and investigates the role of North Korean critics as "political executioners" in these events. She draws on an impressive variety and number of sources—ranging from interviews with Korean and Soviet participants, public and family archives, and memoirs to original literary and critical texts—to present a balanced and eye-opening work that will benefit those interested in not only understanding North Korean literature and society, but also rethinking forms of socialist modernity elsewhere in the world.

The Content Analysis Guidebook

Kim Jong Il, one of the world's most infamous dictators, rose to power in the mid-1990s in the small East Asian country of North Korea. He succeeded his father, Kim Il Sung, as that nation's leader. Kim Il Sung took power in North Korea—also known as the Democratic People's Republic of Korea, or DPRK—in 1948, and eventually established a state governed by his own version of Communism. Today Kim Jong Il continues his father's tactics of building a powerful cult of personality around himself, while crushing criticism and opposition to his rule. These practices by both Kim Il Sung and Kim Jong Il have largely cut off the DPRK from the outside world. The Kim leaders' harsh policies have led to tragedy within the nation, contributing to devastating famine and creating a network of labor camps in which

many North Koreans are tortured and killed annually. Kim's secrecy and his strict control of information entering or leaving North Korea have also made the nation a largely mysterious place. In Kim Jong Il's North Korea, learn more about this inscrutable nation and its dictator.

Native Speaker

Soon to be a major motion picture starring Adrien Brody and Salma Hayek In the aftermath of the Iranian revolution, rare-gem dealer Isaac Amin is arrested, wrongly accused of being a spy. Terrified by his disappearance, his family must reconcile a new world of cruelty and chaos with the collapse of everything they have known. As Isaac navigates the terrors of prison, and his wife feverishly searches for him, his children struggle with the realization that their family may soon be forced to embark on a journey of incalculable danger.

Securitization of Human Rights

As told by her granddaughter, the biography of a Korean woman born in 1912 into a socially repressive, male-dominated society, describes her struggles to overcome the pains of war, loss, and discrimination

Computer Science and its Applications

A heartwarming tale of courage, resilience and hope from master storyteller and winner of the prestigious Newbery Medal, Linda Sue Park. When her name was Keoko, Japan owned Korea, and Japanese soldiers ordered people around, telling them what they could do or say, even what sort of flowers they could grow. When her name was Keoko, World War II came to Korea, and her friends and relatives had to work and fight for Japan. When her name was Keoko, she never forgot her name was actually Kim Sun-hee. And no matter what she was called, she was Korean. Not Japanese. Inspired by true-life events, this amazing story reveals what happens when your culture, country and identity are threatened.

Natural Locomotion in Fluids and on Surfaces

For the last 6000 years turmeric has been used in Ayurvedic medicine to alleviate pain, balance digestion, purify body and mind, clear skin diseases, expel phlegm, and invigorate the blood. Nowadays, this plant has acquired great importance with its anti-aging, anti-cancer, anti-Alzheimer, antioxidant, and a variety of other medicinal properties. The need of the hour is to verify and validate the traditional uses by subjecting them to proper experimental studies. To do this effectively there needs to be a single comprehensive source of the knowledge to date.

Turmeric: the genus *Curcuma* is the first comprehensive monographic treatment on turmeric. It covers all aspects of turmeric including botany, genetic resources, crop improvement, processing, biotechnology, pharmacology, medicinal and traditional uses, and its use as a spice and flavoring. Bringing together the premier experts in the field from India, Japan, UK, and USA, this book offers the most thorough examination of the cultivation, market trends, processing, and products as well as pharmacokinetic and medicinal properties of this highly regarded spice. While Ayurveda has known for millennia that turmeric cleanses the body, modern science has now discovered that it produces glutathione-s-transferase that detoxifies the body and therefore strengthens the liver, heart, and immune system. By comparing traditional uses with modern scientific discoveries, the text provides a complete view of the medicinal value and health benefits of turmeric. Heavily referenced with an exhaustive bibliography at the end of each chapter, the book collects and collates the currently available data on turmeric. Covering everything from cultivation to medicine, *Turmeric: the Genus Curcuma* serves as an invaluable reference for those involved with agriculture, marketing, processing or product development, and may function as a catalyst for future research into the health benefits and applications of turmeric.

Soldiers on the Cultural Front

Random Acts of Heroic Love

The debut novel from critically-acclaimed and New York Times–bestselling author of *On Such a Full Sea*. In *Native Speaker*, author Chang-rae Lee introduces readers to Henry Park. Park has spent his entire life trying to become a true American—a native speaker. But even as the essence of his adopted country continues to elude him, his Korean heritage seems to drift further and further away. Park's harsh Korean upbringing has taught him to hide his emotions, to remember everything he learns, and most of all to feel an overwhelming sense of alienation. In other words, it has shaped him as a natural spy. But the very attributes that help him to excel in his profession put a strain on his marriage to his American wife and stand in the way of his coming to terms with his young son's death. When he is assigned to spy on a rising Korean-American politician, his very identity is tested, and he must figure out who he is amid not only the conflicts within himself but also within the ethnic and political tensions of the New York City streets. *Native Speaker* is a story of cultural alienation. It is about fathers and sons, about the desire to connect with the world rather than stand apart from it, about loyalty and betrayal, about the alien in all of us and who we finally are. From the Trade Paperback edition.

The Orphan Master's Son

Filling the need for a ready reference that reflects the vast developments in this field, this book presents everything from fundamentals, applications, various reaction types, and technical applications. Edited by rising stars in the scientific community, the text focuses solely on visible light photocatalysis in the context of organic chemistry. This primarily entails photo-induced electron transfer and energy transfer chemistry sensitized by polypyridyl complexes, yet also includes the use of organic dyes and heterogeneous catalysts. A valuable resource to the synthetic organic community, polymer and medicinal chemists, as well as industry professionals.

Jia

DART-MS is a relatively new, but very fast evolving technology. Due to its versatility, it addresses fields of crucial importance to people and community, e.g. food or agricultural, forensic, industrial, environmental, medicinal and clinical analysis.

Visible Light Photocatalysis in Organic Chemistry

WINNER OF THE MAN ASIAN LITERARY PRIZE When sixty-nine-year-old So-nyo is separated from her husband among the crowds of the Seoul subway station, her

family begins a desperate search to find her. Yet as long-held secrets and private sorrows begin to reveal themselves, they are forced to wonder: how well did they actually know the woman they called Mom? Told through the piercing voices and urgent perspectives of a daughter, son, husband, and mother, *Please Look After Mom* is at once an authentic picture of contemporary life in Korea and a universal story of family love. From the Trade Paperback edition.

Introduction to Mediation, Moderation, and Conditional Process Analysis, Second Edition

The three-volume set LNCS 10918, 10919, and 10290 constitutes the proceedings of the 7th International Conference on Design, User Experience, and Usability, DUXU 2018, held as part of the 20th International Conference on Human-Computer Interaction, HCII 2018, in Las Vegas, NV, USA in July 2018. The total of 1171 papers presented at the HCII 2018 conferences were carefully reviewed and selected from 4346 submissions. The papers cover the entire field of human-computer interaction, addressing major advances in knowledge and effective use of computers in a variety of applications areas. The total of 165 contributions included in the DUXU proceedings were carefully reviewed and selected for inclusion in this three-volume set. The 60 papers included in this volume are organized in topical sections on emotion, motivation, and persuasion design, DUXU

and children, DUXU in automotive and transport, and DUXU in culture and art.

Drug Metabolism, Pharmacokinetics and Bioanalysis

"Affluenza is that strange desire we feel to spend money we don't have to buy things we don't need to impress people we don't know . . . A truly modern affliction, affluenza is endemic in Western societies, encouraged by those who profit from a culture of exploitation and waste. So how do we cure ourselves? In this sparkling book of ideas, Richard Denniss shows we must distinguish between consumerism, the love of buying things, which is undeniably harmful to us and the planet, and materialism, the love of things, which can in fact be beneficial. We should cherish the things we own – preserve them, repair them, and then gift or sell them when we no longer need them. We must foster new ways of thinking and acting that do not squander limited resources, and which support the things we value most: vibrant communities and rich experiences. At once a lucid explanation of a critical global issue and a stirring call to action, Curing Affluenza will change the way you think about your place in the world. With special contributions from Bob Brown • Kumi Naidoo • Marilyn Waring • John Quiggin • Leanne Minshull • Jim Stanford • Bill McKibben • Craig Bennett"

Dynamical Models of Biology and Medicine

Waking up in a hospital to learn that his girlfriend has died, backpacker Leo blames himself for her fatal accident and discovers a surprising secret with ties to a POW fugitive's 1917 efforts to traverse the Russian steppes in order to reclaim the woman he loves. 30,000 first printing.

Hongzhou School of Chan Buddhism in Eighth- through Tenth-Century China, The

This important book focuses on North Korean refugee human rights issues—a topic largely ignored in favor of addressing North Korea's domestic politics and deterrence of Pyongyang's nuclear threat.

The Sicily Papers

Cancer Therapy: Prescribing and Administration Basics is a helpful handbook that guides multidisciplinary hematology/oncology practitioners in the practical, day-to-day aspects of cancer therapy prescribing, verification, admixing, administration, and billing. This valuable resource will help practitioners to optimize patient compliance, drug efficacy, and safety by providing patient counseling tips, proper safety and dispensing of oral cancer therapy information, and clinically significant drug interactions. Cancer Therapy: Prescribing and Administration Basics is also a

useful text for healthcare professionals whose primary area of practice is not hematology/oncology but who may be responsible for verifying, preparing, dispensing, or administering cancer therapy agents. This valuable text will provide them with practical information to accurately verify cancer therapy orders before drug preparation and administration and ensure safe use.

Please Look After Mom

Barbara Halliwell, on a grant at Oxford, receives an unexpected package—a centuries-old memoir by a Korean crown princess. An appropriate gift indeed for her impending trip to Seoul, but Barbara doesn't know who sent it. On the plane, she avidly reads the memoir, a story of great intrigue as well as tragedy. The Crown Princess Hyegyong recounts in extraordinary detail the ways of the Korean court and confesses the family dramas that left her childless and her husband dead by his own hand. When a Korean man Barbara meets at her hotel offers to guide her to some of the haunts of the crown princess, Barbara tours the royal courts and develops a strong affinity for everything related to the princess and her mysterious life. Barbara's time in Korea goes quickly, but captivated by her experience and wanting to know more about the princess, she wonders if her life can ever be the way it was before.

Curing Affluenza

A foreign film importer, Gi-yeong is a family man with a wife and daughter. An aficionado of Heineken, soccer, and sushi, he is also a North Korean spy who has been living among his enemies for twenty-one years. Suddenly he receives a mysterious email, a directive seemingly from the home office. He has one day to return to headquarters. He hasn't heard from anyone in over ten years. Why is he being called back now? Is this message really from Pyongyang? Is he returning to receive new orders or to be executed for a lack of diligence? Has someone in the South discovered his secret identity? Is this a trap? Spanning the course of one day, *Your Republic Is Calling You* is an emotionally taut, psychologically astute, haunting novel that reveals the depth of one particularly gripping family secret and the way in which we sometimes never really know the people we love. Confronting moral questions on small and large scales, it mines the political and cultural transformations that have transformed South Korea since the 1980s. A lament for the fate of a certain kind of man and a certain kind of manhood, it is ultimately a searing study of the long and insidious effects of dividing a nation in two.

Still Life With Rice

Design, User Experience, and Usability: Users, Contexts and Case Studies

This book is intended to serve as a guide to the principles, assumptions, strengths, limitations, and applications of structural equation modeling (SEM) for researchers and students who do not have extensive quantitative backgrounds. Some familiarity with basic concepts such as correlation is assumed, but higher levels of statistical knowledge are not required. Accordingly, the presentation is conceptually rather than mathematically oriented, the use of formulas and symbols is kept to a minimum, and many examples are offered of the application of SEM to a wide variety of research problems in psychology, education, and health sciences, among other areas. This book also has a home page on the Internet (www.guilford.com --> Kline).

Direct Analysis in Real Time Mass Spectrometry

Offering a concise overview of Pyongyang's history and development, the 'Historical Dictionary of Pyongyang' presents a comprehensive historical survey of the city in the form of an alphabetical list of keywords and names, with accompanying definitions. Both well-researched and authoritative, the volume draws upon a wide range of modern sources, and contains an introductory essay

about the city, a chronology, a list of acronyms and abbreviations, and an array of photographs.

The Red Queen

Lauded for its easy-to-understand, conversational discussion of the fundamentals of mediation, moderation, and conditional process analysis, this book has been fully revised with 50% new content, including sections on working with multicategorical antecedent variables, the use of PROCESS version 3 for SPSS and SAS for model estimation, and annotated PROCESS v3 outputs. Using the principles of ordinary least squares regression, Andrew F. Hayes carefully explains procedures for testing hypotheses about the conditions under and the mechanisms by which causal effects operate, as well as the moderation of such mechanisms. Hayes shows how to estimate and interpret direct, indirect, and conditional effects; probe and visualize interactions; test questions about moderated mediation; and report different types of analyses. Data for all the examples are available on the companion website (www.afhayes.com), along with links to download PROCESS. New to This Edition *Chapters on using each type of analysis with multicategorical antecedent variables. *Example analyses using PROCESS v3, with annotated outputs throughout the book. *More tips and advice, including new or revised discussions of formally testing moderation of a mechanism using the index of moderated mediation; effect size in mediation analysis; comparing conditional

effects in models with more than one moderator; using R code for visualizing interactions; distinguishing between testing interaction and probing it; and more. *Rewritten Appendix A, which provides the only documentation of PROCESS v3, including 13 new preprogrammed models that combine moderation with serial mediation or parallel and serial mediation. *Appendix B, describing how to create customized models in PROCESS v3 or edit preprogrammed models.

Marching Through Suffering

This volume developed from a Workshop on Natural Locomotion in Fluids and on Surfaces: Swimming, Flying, and Sliding which was held at the Institute for Mathematics and its Applications (IMA) at the University of Minnesota, from June 1-5, 2010. The subject matter ranged widely from observational data to theoretical mechanics, and reflected the broad scope of the workshop. In both the prepared presentations and in the informal discussions, the workshop engaged exchanges across disciplines and invited a lively interaction between modelers and observers. The articles in this volume were invited and fully refereed. They provide a representative if necessarily incomplete account of the field of natural locomotion during a period of rapid growth and expansion. The papers presented at the workshop, and the contributions to the present volume, can be roughly divided into those pertaining to swimming on the scale of marine organisms, swimming of microorganisms at low Reynolds numbers, animal flight, and sliding and other

related examples of locomotion.

How Global Capital is Remaking International Education

The first novel about present-day North Korea to be published in the West. A moving and true-to-life tale of courage in the face of oppression and exile. Hyejin Kim's *Jia* follows the adventures of an orphaned young woman, Jia, who has the grace of a dancer but the misfortune of coming from a politically suspect family. In the isolated mining village of her childhood, Jia's father, a science teacher, questions government intrusion into his classroom and is taken away by police, never to be heard from again. Now Jia must leave the village where her family has been sent as punishment to carve a path for herself. Her journey takes her first to Pyongyang, and finally to Shenyang in northeast China. Along the way, she falls in love with a soldier, befriends beggars, is kidnapped, beaten, and sold, negotiates Chinese culture, and learns to balance cruel necessity with the possibilities of kindness and love. Above all, Jia must remain wary, always ready to adapt to the "capricious political winds" of modern North Korea and China.

Your Republic Is Calling You

This book offers a first look at transnational education corporations, new firms that

operate international schools. The quiet rise of transnational education corporations – or TECs – has implications for education systems around the globe, as corporate interests gain a greater stake in the way schools operate. The story of their ascendance links government policies in one corner of the world with profound effects in others. In the past decade, TECs have burst onto the international schooling scene. Private firms, publicly listed firms, and private equity groups have transformed international education into an industry valued at over USD 30 billion. Nowhere has the impact been stronger and more sudden than in Asia. The top three international education firms with a presence in Asia run more than 20 schools in East and Southeast Asia with another six in India. Each educates tens of thousands of students around the globe and has an annual revenue of over USD 300 million. TECs offer a window onto the creation of new markets and the complex positions of governments in regulating social affairs. This book helps readers to understand who these firms are, what they do and how they have grown.

Kim Jong Il's North Korea (Revised Edition)

The 4th FTRA International Conference on Computer Science and its Applications (CSA-12) will be held in Jeju, Korea on November 22~25, 2012. CSA-12 will be the most comprehensive conference focused on the various aspects of advances in computer science and its applications. CSA-12 will provide an opportunity for

academic and industry professionals to discuss the latest issues and progress in the area of CSA. In addition, the conference will publish high quality papers which are closely related to the various theories and practical applications in CSA. Furthermore, we expect that the conference and its publications will be a trigger for further related research and technology improvements in this important subject. CSA-12 is the next event in a series of highly successful International Conference on Computer Science and its Applications, previously held as CSA-11 (3rd Edition: Jeju, December, 2011), CSA-09 (2nd Edition: Jeju, December, 2009), and CSA-08 (1st Edition: Australia, October, 2008).

Cancer Therapy: Prescribing and Administration Basics

Marching Through Suffering is a deeply personal portrait of the ravages of famine and totalitarian politics in modern North Korea since the 1990s. Featuring interviews with more than thirty North Koreans who defected to Seoul and Tokyo, the book explores the subjective experience of the nation's famine and its citizens' social and psychological strategies for coping with the regime. These oral testimonies show how ordinary North Koreans, from farmers and soldiers to students and diplomats, framed the mounting struggles and deaths surrounding them as the famine progressed. Following the development of the disaster, North Koreans deployed complex discursive strategies to rationalize the horror and hardship in their lives, practices that maintained citizens' loyalty to the regime

during the famine and continue to sustain its rule today. Casting North Koreans as a diverse people with a vast capacity for adaptation rather than as a monolithic entity passively enduring oppression, Marching Through Suffering positions personal history as key to the interpretation of political violence.

Heterogeneous Photocatalysis

Mathematical and computational modeling approaches in biological and medical research are experiencing rapid growth globally. This Special Issue Book intends to scratch the surface of this exciting phenomenon. The subject areas covered involve general mathematical methods and their applications in biology and medicine, with an emphasis on work related to mathematical and computational modeling of the complex dynamics observed in biological and medical research. Fourteen rigorously reviewed papers were included in this Special Issue. These papers cover several timely topics relating to classical population biology, fundamental biology, and modern medicine. While the authors of these papers dealt with very different modeling questions, they were all motivated by specific applications in biology and medicine and employed innovative mathematical and computational methods to study the complex dynamics of their models. We hope that these papers detail case studies that will inspire many additional mathematical modeling efforts in biology and medicine
