Kathleen Cheetham presents her original garment patterns and detailed sewing instruction so plus-size women can create a closetful of flattering shapes and silhouettes. By working with the 4 enclosed patterns, step-by-step construction, and fitting instruction, readers can create a wardrobe of versatile and stylish garments—which can be adapted for office wear, casual wear, or evening wear, just by varying the colors, fabrics, and finishing details. The four enclosed patterns are for pants, a blouse, skirt, and jacket—to create 20 unique garments. Each garment is shown in petite to full sizes, from size 14 to 24. The author also includes her patented Perfect Fit guide for each garment style, based on grading rules she has developed herself for her own line of commercial patterns. Author also provides a gallery of 51 outfits for a wardrobe made with the four patterns.

Since the 1660s, the Seminary of Montreal -- a French, male religious community -- had been an integral part of the merchant, seigneurial, and clerical elite that dominated Montreal. Its significance in pre-industrial society was strengthened by its role as seigneur of Montreal Island and titular parish priest. The Seminary survived the British conquest, but came under increasing attack in the early nineteenth century from industrial producers and large capitalists landlords who resented the Seminary's seigneurial expropriations. By the 1830s, anticlerical

elements in the peasantry and other popular classes had joined in the attack.

Hug Your Sewing Machine

As a sewing machine repair person for over twenty five years, I've seen almost every problem that can happen with your home sewing machine. I've seen people so frustrated with their new found treadle sewing machine that they were ready to set it aside for looks only, just because they couldn't figure out how to use or operate it. Normally the old treadles no longer have instruction books with them, therefore it's up to the owner to try to figure things out. Even a basic thing like putting on a new belt is an impossible task when you don't know where to begin and what steps to take to get it in the right position and secured properly. If you stop and think about it, the treadle machine is the machine all sewing machines of today were modeled after. The electric motor was added to take the place of the foot power of the treadle machines. The shuttle was changed from the bullet style to the present style of a small round flat shuttle directly under the feed dog and needle bar. I've had many requests to try to locate an instruction manual for treadle sewing machines, to no avail. After years of request after request for

information on treadle sewing machines, I was finally talked into writing a book of general instruction for the treadle machine. Keep in mind that there are many different styles, brands and manufacturers of treadle sewing machines, and some are made in other countries. With that in mind, I could not include each of them specifically and cover the small differences they each may have, therefore this book is written in a "generic" style so that the information could be applied to any treadle machine.

New Hampshire Register, State Year-book and Legislative Manual

A much-needed book on cutting-edge textile design and practice with experimental design ideas, unusual materials and the latest techniques. The author takes you from finding original ideas through the design process - with exercises - to the latest techniques various artists use to transform the designs into finished textiles. The book covers: paper, felt, machine embroidery, recycling, hand stitch, working with and combining unusual materials, layering different media, working in three-dimensions and also in large scale. Showcased textiles include quilt art, quirky boxes, cloth dolls and large-scale textile installations - a collection of the best and most exciting textile art today. With technique information and several projects for readers to try, plus inspirational work by existing and emerging textile artists, this

is an essential book for all those working in textiles.

'How To Rewire Vintage Sewing Machines' is an easy to follow guide for rewiring the original lights, motors and foot controllers on your vintage sewing machines. Also included is how to add a new light, motor and foot controller. For this book, vintage sewing machines pertains to those made through 1960. While the process of rewiring is actually quite simple, it's not for everyone. It's imperative that you are able to identify the hot, cold & neutral wires. You also need to be able to identify which connections these wires are compatible with in the terminal box. When in doubt always seek the advice of a professional. This manual is meant as a reference, not as a substitute for a professional repairman. Let's save vintage sewing machines, one machine at a time.

Thread Magic

Ellen Anne Eddy is an internationally known fiber artist whose wall tapestries transcend the traditional concept of quilting. Using hand-dyed fabrics, sheers, laces, lame's and machine embroideries she creates the illusions of water, mist and flame. Ellen's designs blend scenes from the natural world with her own dreams and visions. Her masterful fusion of techniques and materials describe life in micro and macrocosm. Fish and bugs, frogs and birds weave in and out of her quilts, serving as a media for both social commentary and personal observation. The series of quilts featured in Thread Magic offers a rich visual treat for quilters. A comprehensive technical section provides information that will enable quilters of all skill levels to add Ellen's techniques to their own creative repertoires.
