Marriage requires not just love, but sacrificial love, says Bryan Chapell. In his newly revised and updated book, Each for the Other, he shows married couples how to emulate the unselfish, sacrificial love of Christ. While imparting invaluable instruction grounded in Scripture, Chapell not only helps husbands and wives understand the nature of God's care but also

affirms the importance of building a spiritual foundation that binds them together as one. By presenting a biblical model of marriage, Chapell encourages couples to dive into the deeper dimensions of their relationship. The result, he says, is a Christ-centered marriage and a grace-filled family. Refreshing and honest, Each for the Other is a perfect guide to show spouses, engaged couples, and marriage counselors what marriage is meant to be.

A Fellowship of Men and Women expertly reveals the depth, variability and scope of alcoholism and recovery. Not a self-help book, it concentrates on understanding the complexities and pain of the disease and the struggle for recovery and a healthy life. A Fellowship of Men and Women speaks poignantly to the ways alcoholism affects lives and relationships, while bringing a new understanding for lives have been bruised by alcoholics. A window into Alcoholics Anonymous, this must-read will keep you engaged until the end. "In A Fellowship of Men and Women, Thomson explores the lives of a group of recovering alcoholics-and some who will never recover. The interlocking stories give the reader a wonderful insiders view" -Kit Reed Catholic Girls, Weird Women, Wired Women, Seven for the Apocalypse.

After surveying political and ideological antisemitism in modern Romanian history and its main exponents (Cuza, Iorga, Paulescu, Goga), discusses the evolution of antisemitic ideas in 1930s intellectual life, the importance of antisemitism in Iron Guard ideology, and the influence of its leader, Codreanu, and of extreme right-wing intellectuals (especially Nae Ionescu and N. Crainic) on representatives of the "young generation" of intellectuals (e.g. Eliade and Cioran). Emphasizes the link between antisemitic and anti-democratic and pro-fascist attitudes. Focuses on specific cases of evolution to radical antisemitism (e.g. Brătescu-Voinești and Manoilescu), and deals with the contradictory case of Panait Istrati, a former left-wing militant. Mentions the use of anti-Jewish theological arguments, antisemitic stereotypes in literature, and forms of anti-Jewish discrimination in "free" professional associations. Underlines the great weight of the "Jewish threat" in Romanian nationalist thinking and its impact on cultural life. The 1930s represented the climax of this trend.

The Economics of Regional Clusters

A saga of the US Navy from the Barbary War of 1803 through the War of 1812. In 1803, a young man joins the crew of what will become the most famous frigate of the early US Navy - USS Constitution. From the sands of North Africa during the first Barbary War, across the aquamarine waters of the Caribbean, we follow the exploits of a young American seaman, Alain de Noux. At the outbreak of the War of 1812, Captain de Noux takes the ship he personally designed to sea to fight the mightiest navy in the world - Britain's Royal Navy. USS Relentless is the newest, largest, fastest frigate in the world, her hull coated in resin that allows her to fly across the waves, her radically-designed sails and special chute-sail that acts as a

spinnaker pulls the big frigate along at nearly eighteen knots. Armed with weapons far in advance of its time - steel cannons with rifled barrels that propel shells farther than any cannon on any ship, along with special binoculars that aid lookouts to see at night, USS Relentless is a most lethal ship. The ship also carries high caliber shells that explode on contact and special carcass rounds filled with white phosphorous, consuming any ship it strikes in flames. USS Relentless challenges all ships, including the huge British ships-of-the-line, contemporary battleships. Terrorizing the Atlantic for months, Relentless is sent on a more important mission, a mission with no return ticket. She will fly the American flag into combat for the first time across the Indian Ocean, attacking the fat merchant ships of Britain's lucrative East India Company. America does not have the means to invade Britain, but USS Relentless can disrupt her most profitable trade routes. Alain finds success in war and finally meets the woman that will change his world, if only for a short time. In his heart, he knows he will die a young man. It is a race. How many ships can the great raider destroy or capture before the Royal Navy's fleet can destroy her? Along the shoals of the Laccadive Islands, In what the world will call The Battle of the Arabian Sea, USS Relentless must fight an entire fleet in order for Alain to get back to the love of his life.

OpenGL is a powerful software interface used to produce high-quality, computer-generated images and interactive applications using 2D and 3D objects, bitmaps, and color images. The OpenGL® Programming Guide, Seventh Edition , provides definitive and comprehensive information on OpenGL and the OpenGL Utility Library. The previous edition covered OpenGL through Version 2.1. This seventh edition of the best-selling "red book" describes the latest features of OpenGL Versions 3.0 and 3.1. You will find clear explanations of OpenGL functionality and many basic computer graphics techniques, such as building and rendering 3D models; interactively viewing objects from different perspective points; and using shading, lighting, and texturing effects for greater realism. In addition, this book provides in-depth coverage of advanced techniques, including texture mapping, antialiasing, fog and atmospheric effects, NURBS, image processing, and more. The text also explores other key topics such as enhancing performance, OpenGL extensions, and cross-platform techniques. This seventh edition has been updated to include the newest features of OpenGL Versions 3.0 and 3.1, including Using framebuffer objects for off-screen rendering and texture updates Examples of the various new buffer object types, including uniform-buffer objects, transform feedback buffers, and vertex array objects Using texture arrays to increase performance when using numerous textures Efficient rendering using primitive restart and conditional rendering Discussion of OpenGL's deprecation mechanism and how to verify your programs for future versions of OpenGL This edition continues the discussion of the OpenGL Shading Language (GLSL) and explains the mechanics of using this language to create complex graphics effects and boost the computational power of OpenGL. The OpenGL Technical Library provides tutorial and reference books for OpenGL. The Library enables programmers to gain a practical understanding of OpenGL

and shows them how to unlock its full potential. Originally developed by SGI, the Library continues to evolve under the auspices of the Khronos OpenGL ARB Working Group, an industry consortium responsible for guiding the evolution of OpenGL and related technologies.

With the explosive increase in the number of mobile devices and applications, it is anticipated that wireless traffic will increase exponentially in the coming years. Moreover, future wireless networks all carry a wide variety of flows, such as video streaming, online gaming, and VoIP, which have various quality of service (QoS) requirements. Therefore, a new mechanism that can provide satisfactory performance to the complete variety of all kinds of flows, in a coherent and unified framework, is needed. In this book, we introduce a framework for real-time wireless networks. This consists of a model that jointly addresses several practical concerns for real-time wireless networks, including per-packet delay bounds, throughput requirements, and heterogeneity of wireless channels. We detail how this framework can be employed to address a wide range of problems, including admission control, packet scheduling, and utility maximization. Table of Contents: Preface / Introduction / A Study of the Base Case / Admission Control / Scheduling Policies / Utility Maximization without Rate Adaptation / Utility Maximization with Rate Adaptation / Systems with Both Real-Time Flows and Non-Real-Time Flows / Broadcasting and Network Coding / Bibliography / Authors' Biographies
