This book focuses on the systematic design of architectures, parameters and control of typical hybrid propulsion systems for wheeled and tracked vehicles

based on a combination of theoretical research and engineering practice. Adopting a mechatronic system dynamics perspective, principles and methods from the fields of optimal control and system optimization are applied in order to analyze the hybrid propulsion configuration and controller design. Case investigations for typical hybrid propulsion systems of wheeled and tracked ground vehicles are also provided.

This book examines the experiences of the globalizing Korean automobile industry, with particular focus on the Hyundai Motor Company (HMC), one of the most prominent of the new Korean multinational corporations. It provides an overview of the changing nature of the global automobile industry, before considering in depth the globalization processes that the Korean automobile industry has undertaken. Tracing the development of HMC as it recovered from the failure of its first venture overseas, in Canada, and tried again in India, the authors explore the similarities and differences between the practices which HMC implemented in India and Korea. They highlight the importance of production systems and employment relations as part of HMC's growth, and argue that if Korean companies such as HMC are to compete successfully as global automobile producers they will need to increase the proportion of overseas production, establish global supply chains and improve co-ordination between head office and subsidiaries. Based upon extensive fieldwork in India and Korea, this book is a detailed account of the globalization of the Korean automobile industry and Hyundai Motor Company. Its findings will be of importance to all those who seek to understand the challenges faced by firms that attempt to become global players.

Hungarian R&D Articles

This is the only book that completely lists accurate technical data for all cars imported into the U.S. market from 1946-2000. With many imports approaching the antique status, this book will be a big seller across all generations of car enthusiasts. From the grandiose European carriages of the late Forties to the hot, little Asian imports of the Nineties, every car to grace American roadways from across the Atlantic and Pacific is carefully referenced in this book.

&break;&break;Foreign car devotees will appreciate the attention given to capturing precise data on Appearance and Equipment, Vehicle I.D. Numbers, Specification Charts, Engine Data, Chassis, Technical Data, Options and Historical Information. &break;&break;Collectors, restorers and car buffs will love this key book from noted automotive authors, James Flammang and Mike Covello.
