This is a book you'll want on the shelf." —Sara Forte, author of The Sprouted Kitchen A self-trained chef and food photographer, Angela Liddon has spent years perfecting the art of plant-based cooking, creating inventive and delicious recipes that have brought her devoted fans from all over the world. Harold McGee's *On Food and Cooking* is a kitchen classic. Hailed by *Time* magazine as "a minor masterpiece" when it first appeared in 1984, *On Food and Cooking* is the bible to which food lovers and professional chefs worldwide turn for an understanding of where our foods come from, what exactly they're made of, and how cooking transforms them into something new and delicious. Now, for its twentieth anniversary, Harold McGee has prepared a new, fully revised and updated edition of *On Food and Cooking*. He has rewritten the text almost completely, expanded it by two-thirds, and commissioned more than 100 new illustrations. As compulsively readable and engaging as ever, the new *On Food and Cooking* provides countless eye-opening insights into food, its preparation, and its enjoyment. *On Food and Cooking* pioneered the translation of technical food science into cook-friendly kitchen science and helped give birth to the inventive culinary movement known as "molecular gastronomy." Though other books have now been written about kitchen science, *On Food and Cooking* remains unmatched in the accuracy, clarity, and thoroughness of its explanations, and the intriguing way in which it blends science with the historical evolution of foods and cooking techniques. Among the major themes addressed throughout this new edition are: Traditional and modern methods of food production and their influences on food quality The great diversity of methods by which people in different places and times have prepared the same ingredients Tips for selecting the best ingredients and preparing them successfully The particular substances that give foods their flavors and that give us pleasure Our evolving knowledge of the health benefits and risks of foods *On Food and Cooking* is an invaluable and monumental compendium of basic information about ingredients, cooking methods, and the pleasures of eating. It will delight and fascinate anyone who has ever cooked, savored, or wondered about food.

The author focuses on the marketing perspective of the topic and illustrates how women's roles in society have shifted during the past century. Among the key issues explored is a peculiar dichotomy of American advertising that served as a conservative reflection of society and, at the same time, became an underlying force of progressive social change. The study shows how advertisers of housekeeping products perpetuated the Happy Homemaker stereotype while tobacco and cosmetics marketers dismantled women's stereotypes to create an entirely new type of consumer.
