YOU CAN'T MAKE THIS STUFF UP! Here is a hilarious collection that catches real-life knuckleheads in outrageous acts of brazen stupidity, giving new meaning to that famous four-letter word: "DUH"! * The Oregon resident who was waxing his 1984 Pontiac--and somehow managed to shove the antenna up his nose . . . GRANDMOTHER OF EIGHT MAKES HOLE IN ONE * The Atlanta Braves pitcher who was treated for five-inch-long welts after he tried to iron his polo shirt while wearing it . . . MINERS REFUSE TO WORK AFTER DEATH * The inmate at a Chesapeake Correctional Facility who filed a five million dollar lawsuit against himself . . . DRUNK GETS NINE MONTHS IN VIOLIN CASE * The woman who couldn't stand the discomfort of having a callus on her right foot, so she blew off her big toe with a shotgun . . . Radio personality John "Kato" Machay's lively compilation of news stories, headlines, and courtroom gaffes proves hands down that truth is dumber than fiction! REMEMBER: To err may be human, but to laugh out loud is divine.

The Gender of Photography

Situated among the North Cascade Mountains of Washington State, in the Glacier Peak Wilderness Area, Miners Ridge contains vast quantities of copper. Kennecott Copper Corporation's plan to develop an open-pit mine there was, when announced in 1966, the first test of the mining provision of the Wilderness Act passed by Congress in 1964. The battle over the proposed "Open Pit, Big Enough to Be Seen from the Moon," as activists called it, drew the attention of both local and national conservationists, who vowed to stop the desecration of one of the West's most scenic places. Kennecott Copper had the full force of the law and mining industry behind it in asserting its extractive rights. Meanwhile the U.S. Forest Service was determined to defend its authority to manage wilderness. An Open Pit Visible from the Moon tells the story of this historic struggle to define the contours of the Wilderness Act—its possibilities and limits. Combining rigorous analysis and deft storytelling, Adam M. Sowards re-creates the contest between Kennecott and its shareholders on one hand and activists on the other, intent on maintaining wilderness as a place immune to the calculus of profit. A host of actors cross these pages—from cabinet secretaries and a Supreme Court justice to local doctors and college students—all contributing to a drama that made Miners Ridge a cause célèbre for the nation's wilderness movement. As locals testified at public hearings and writers penned profiles in the nation's magazines and newspapers, the volatile political economy of copper proved equally influential in frustrating Kennecott's plans. No law or court ruling could keep Kennecott from mining copper, but the pit was never dug. Identifying the contingent factors and forces

that converged and coalesced in this case, Sowards's narrative recalls a critical moment in the struggle over the nation's wild places, even as it puts the unpredictability of history on full display.

It would be unthinkable now to omit early female pioneers from any survey of photography's history in the Western world. Yet for many years the gendered language of American, British and French photographic literature made it appear that women's interactions with early photography did not count as significant

contributions. Using French and English photo journals, cartoons, art criticism, novels, and early career guides aimed at women, this volume will show why and how early photographic clubs, journals, exhibitions, and studios insisted on masculine values and authority, and how Victorian women engaged with photography despite that dominant trend. Focusing on the period before 1890, when women were yet to develop the self-assurance that would lead to broader recognition of the value of their work, this study probes the mechanisms by which exclusion took place and explores how women practiced photography anyway, both as amateurs and professionals. Challenging the marginalization of women's work in the early history of photography, this is essential reading for students and scholars of photography, history and gender studies.

A revolutionary process based on the four chambers of the heart and rooted in Toltec wisdom that brings emotional clarity, healing, and freedom The Warrior Heart Practice is a powerful new method to reconnect with our sense of authenticity and inner-knowing and realign with our true nature. Author of the bestselling book Warrior Goddess Training, HeatherAsh Amara has trained extensively in the Toltec tradition under the tutelage of don Miguel Ruiz, author of

The Four Agreements. The Warrior Heart Practice is a revolutionary system based on the four chambered structure of the human heart. Walking through each of the four chambers—Feeling, Story, Truth, and Intent—readers learn to take stock of their current emotional and mental state and reframe their situation in a new healing light. The process begins in the Feeling chamber as readers accept the emotions they are currently experiencing without fighting or judging them. It then continues into the next chamber as readers witness the Story that they are telling themselves. In the Truth chamber, they learn to thoughtfully and objectively evaluate the reality of the situation. In the final chamber, they learn to define and focus their Intent. The last phase of the practice is the most profound—taking the knowledge they have gathered from the four chambers, readers then walk backwards through each of the four chambers, refocusing their Intent, Truth, Story, and Feelings based on what they've learned during the process. The Warrior Heart Practice leads to deep insights as readers learn to step outside of their preconceptions to realign with their true purposes and goals.

The distinction between basic and applied research was central to twentieth-century science and policymaking, and if this framework has been contested in recent years, it nonetheless remains ubiquitous in both scientific and public discourse. Employing a transnational, diachronic perspective informed by historical semantics, this volume traces the conceptual history of the basic–applied distinction from the nineteenth century to today, taking stock of European developments alongside comparative case studies from the United States and China. It shows how an older dichotomy of pure and applied science was reconceived in response to rapid scientific progress and then further transformed by the geopolitical circumstances of the postwar era.

Does the Bible predict an asteroid or something else? This book will challenge your interpretation of end-times theology and help you sharpen your understanding in light of current times. Does Revelation 8:10-11 describe an asteroid? Is the Wormwood star from Revelation 8 already headed toward Earth? Are NASA and high-level government officials aware of an asteroid that is on a collision course

with our planet? Is that why President Trump sanctioned a colossal increase to planetary defense? Do the prophecies from ancient cultures and religions across the globe all point to a catastrophic planetary event that has scientists and politicians taking extreme preventative measures under the public radar? Earth is not currently prepared for the scope of impact that may be just around the corner, and people in high places know it. But what will the biblical Wormwood actually be? Traditional scholarly interpretation claims it will be an asteroid. Others postulate that the eschatological poisoning of one-third of all Earth's waters and the devastation of our planet's ecology might not be as detectable as we may believe: it could hit suddenly and without warning, like an angel of God appearing in the sky with fire and light, bringing judgment in an instant. Follow Thomas Horn as he blazes a trail through these questions and many others, posing answers that very few in the church today are willing to provide.

FEATURES AND BENEFITS: Examines asteroid threats to Earth, including Apophis (named after the Egyptian god of chaos), which is a topic of serious discussion among experts in planetary defense. Includes interviews with government impact specialists, scientists, Bible scholars, and prophecy experts.
